### **EXPLANATION**

This is a request to enter into a contract with the Northbridge Environmental Management Consultants (Northbridge) to provide maintenance and related support for the ongoing operation of the Loans and Grants Tracking System (LGTS). This request is **retroactive** due to limited staff resources and the time needed to request multiple quotes from software companies. NHDES worked with NHDOIT to obtain this contract and received two quotes from software companies as well as one from Northbridge directly. Because both quotes included an upcharge, it was determined that contracting directly with Northbridge was the most cost effective approach and provided NHDES with a cost savings of over \$28,000. The following quotes were:

1.	Zones LLC	\$507,764
2.	Software House Int	\$506,416
3.	Northbridge	\$472,000

NHDES operates the Clean Water State Revolving Fund (CWSRF), the Drinking Water State Revolving Fund (DWSRF), the Drinking Water and Groundwater Trust Fund (DWGT), the Per- and Polyfluoroalkyl Substances Remediation Loan Fund (PFAS RLF), and the American Rescue Plan Act (ARPA) grant programs. NHDES requires maintenance and support for its existing LGTS system. The LGTS system is used by 16 other states to track federal and state water infrastructure funding programs. The database provides project tracking capabilities and financial information on funds disbursed and loan repayment schedules. The LGTS system also provides the reporting capabilities required by the Governor's Office for Emergency Relief and Recovery (GOFERR) for the distribution of ARPA funds. The contract will cover on-call support for user assistance and maintenance issues, system support and maintenance, state-requested enhancements to existing functions and reporting, and updates and improvements to the core system.

ARPA is a \$1.9 trillion economic stimulus bill passed by the 117th United States Congress and signed into law by President Biden on March 11, 2021, to speed up the United States' recovery from the economic health effects of the COVID-19 pandemic and the resultant recession. The Act defines eligible uses of the state and local funding, including responding to public health emergencies, responding to workers performing essential work during the COVID-19 emergency, providing revenue relief to states and making investments in water, sewer, and broadband infrastructure. This is an allowable use of ARP FRF funds under Section 602 (c)(1)(D) to make necessary investments in water, sewer, or broadband infrastructure.

We respectfully request your approval of this item.

Robert R. Scott Commissioner Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.

## EXHIBIT B SCOPE OF SERVICES

The objective of this agreement is to provide three years of annual maintenance and related support for the ongoing operation of the Loans and Grants Tracking System (LGTS). The support will be provided on an annual basis for fiscal years 2023, 2024, and 2025. Support services will include the following aspects:

- On-call support and training for user assistance and operation issues
- System support and routine system maintenance, including core system updates
- State-requested enhancements to existing functions and reporting

The specific tasks to be performed consist of the following:

### Task 1 – Provide On-Call Support and Training for Web LGTS and Operation Support

Northbridge will provide on-call and e-mail support as questions arise during the use of the new LGTS Web software. At least one support person will be available via email or by telephone during normal business hours once the web software is fully implemented to support the users and address software issues that arise. Should any software bugs surface during this period, Northbridge will promptly analyze the issue and correct it within 5 working days in the form of software updates.

Northbridge will also provide additional training through hands on support to the users. Often that training and support is accomplished through Web conferences to address specific issues. However, staff may also request more formal training sessions conducted via web conference or an on-site working session in conjunction with one of the other tasks. For such events, Northbridge will prepare a draft agenda prior to the event for review and finalization before the event begins. Northbridge will conduct the requested training utilizing the agreed upon agenda.

Schedule: Annual support for fiscal years 2023, 2024, and 2025

### Task 2- System Support and Routine System Maintenance

Northbridge will provide routine system maintenance and support services, including troubleshooting system and application issues and resolve errors and performance problems with LGTS, conducting routine maintenance tasks, monitoring system usage, and making system modifications as needed. If

Grantee Initials 1/4/5/22

required, Northbridge will recommend and implement hardware and software upgrades. Northbridge will review logs and system messages on a regular monthly basis to insure system is operating and performing as it should and we will support IT and the users with all aspects of maintaining well run LGTS systems. As appropriate, any new functions that become available in the core LGTS system, that New Hampshire wishes to have implemented, will be installed as part of routine maintenance.

Schedule: Annual support for fiscal years 2023, 2024, and 2025

### Task 3 –LGTS Updates and Future Enhancements

Northbridge will work with New Hampshire to receive, discuss and prioritize changes and enhancements to the LGTS system. Based on each requested change, we will log the request in a tracking system for the system, prepare a cost estimate for the change, communicate cost and schedule, receive direction on whether to proceed with the change, and when moving forward track the change from development to testing to implementation.

Enhancements might include report changes, business logic changes, form changes, database additions, and the development of new functions. For each change, Northbridge will undertake the programming changes required and when appropriate install them in the Test environment for user testing. Based on feedback received from testing Northbridge will make final changes and implement the enhancements into the production system.

Northbridge strives to improve the standard features and processes of LGTS based on issues and feedback from all LGTS user states. Because these improvements are based on the experience of all user, these upgrades can provide a mutually beneficial outcome across all SRF programs. Under this maintenance agreement, Northbridge will periodically install upgrades, as necessary, to the New Hampshire LGTS that will include improvements originating from other states.
