Dept. Environmental Services, NPS Restoration Program, Grants-Federal	\$150,000

EXPLANATION

NHDES requests approval to enter into a grant agreement for \$150,000 with the Town of Durham to complete the *Restoration of the Oyster River Herring Run through Removal of the Mill Pond Head-of-Tide Dam and Installation of Fish Passage on the Oyster Reservoir Dam* project (the project). NHDES issued a Request for Proposals (RFP) for the 2023 Watershed Assistance Grants program in June 2022. The fifteen proposals received were ranked based on the criteria included in the RFP: water quality improvement or protection; cost/benefit ratio; local capacity to complete the project; relative value or significance of the water body; consideration of the project's impact on communities with environmental justice concerns; the project's incorporation of changing environmental conditions; and general quality and thoroughness of the proposal. Based on the results of the selection process and available federal grant funding levels, seven implementation projects were selected to receive funding. Please see Attachment B for a list of project rankings and NHDES review team members.

Watershed Assistance Grants focus on the reduction of nonpoint source (NPS) pollution. NPS pollution occurs when rainfall, snowmelt, or irrigation waters travel through the ground or across land, transporting materials that are then introduced into groundwater or deposited into rivers, lakes, and coastal waters. Pollutants can include chemicals, sediments, nutrients, and toxins that often have harmful effects on drinking water supplies, recreation, fisheries, and wildlife. Land development or changes in land use can also cause NPS pollution by disrupting the natural hydrology of a water body,

Page 2 of 2

increasing impervious surfaces, and contributing to the loss of aquatic habitat. Watershed Assistance Grants address NPS pollution by promoting responsible land use practices through the installation of best management practices, restoration of habitats, and reduction of nutrient loading on the watershed scale.

The Oyster River Dam, also known as the Mill Pond Dam, is located on the Oyster River as it flows through the Town of Durham prior to its discharge into Little Bay. The dam impounds fresh water from the Oyster River. The Mill Pond Dam Impoundment (24 acres) is on New Hampshire's 303(d) list, as an impaired waterbody for failing to support the designated use of Aquatic Life Integrity due to insufficient concentrations of dissolved oxygen (DO) and excess concentrations of Chlorophyll-*a*.

In addition to the degradation of water quality in the impoundment, the NHDES Dam Bureau has identified several safety deficiencies associated with the current dam, including concerns with its overall structural integrity and stability. The dam does not meet current NHDES dam safety standards which require such "low-hazard" dams to pass a 50-year storm event with at least one foot of freeboard between the water surface and the top of the dam abutments. This project will remove the dam and corresponding fish ladder and result in unobstructed fish passage for migratory species and improved water quality for the Oyster River.

The project costs are budgeted at \$250,050. NHDES will provide \$150,000 (60%) of the project costs through a federal grant, and the Town of Durham will provide the remaining costs through cash and in-kind services. A budget estimate is provided in Attachment A.

In the event that federal funds become no longer available, general funds will not be requested to support this program. The agreement has been approved by the Office of the Attorney General as to form, execution, and content.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

Additional Requirements of the Agreement

Quality Assurance

All project activities which are to be guided by a quality assurance (QA) document such as a Quality Assurance Project Plan (QAPP) or Site Specific Project Plan (SSPP) must not begin prior to NHDES/U.S. EPA approval of that QA document. In the event that sampling, modeling, or other such activities precede QA document approval, the data will not be considered valid, and the grantee will forfeit the ability to receive payment for those activities.

Outreach Materials

All materials produced for public distribution shall be reviewed and approved by NHDES prior to distribution and shall include the NHDES logo and the following citation: "Funding for this project was provided in part by a Watershed Assistance Grant from the NH Department of Environmental Services with Clean Water Act Section 319 funds from the U.S. Environmental Protection Agency". All final work products must meet the applicable Americans with Disabilities Act (ADA) Title II Regulations to the extent practicable and shall be guided by best practices outlined in the Revised Section 508 Standards of the Rehabilitation Act and the Web Content Accessibility Guidelines (WCAG). At minimum, final work products shall include sans-serif fonts, underlined and descriptive text links, color best practices, captions for audio and video content, headers in tables, images with alt text, gender-neutral text, and consideration of the Plain Writing Act. Examples of final work products and outreach materials include, but are not limited to, project reports, press releases, newsletter articles, websites, videos and signage.

Operations and Maintenance

Management practices implemented as agreed upon in the scope of services of this grant agreement and with grant funds or matching funds under a Section 319 Watershed Assistance Grant, shall be properly operated and maintained for the intended purposes during the life span of the project. The life span of a project shall be determined by the Grantee, tailored to the types of practices expected to be funded in this project, and agreed upon by NHDES. The Grantee shall provide NHDES with an engineering estimate of the design life of the best management practice(s) (BMPs), or in the case of small-scale BMPs which do not have a design life estimation completed by an engineer, the design life of that practice shall be estimated to be ten years.

Operation includes the administration, management, and performance of non-maintenance actions needed to keep the completed practice safe and functioning as intended. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacement of the practice to its original condition if one or more components fail. The Grantee shall assure that any sub-award of Section 319 funds similarly include the same condition in the sub-award. Additionally, both U.S. EPA and NHDES reserve the right to periodically inspect a practice during the life span of the project to ensure that operation and maintenance are occurring. If it is determined that the participants are not operating and maintaining these practices in an appropriate manner, NHDES may request a refund for that practice supported by the grant.

A handwritten signature in blue ink is written over the 'Grantee Initials' and 'Date' labels. The signature appears to be 'J. J. [unclear]' and the date is '2/2/23'.

Method of Payment and Contract Price

The State shall pay to the Grantee the total reimbursable program costs in accordance with the following requirements:

Procurements of goods or services made with grant funds, or those credited as match, shall comply with the terms of this agreement, and must be reported to NHDES. Reimbursement requests for program costs shall be made by the Grantee using a payment request form as supplied by the State, which shall be completed and signed by the Grantee. The payment request form shall be accompanied by proper supporting documentation in the amount of each requested disbursement and required matching funds. Documentation of reimbursable and matching costs may include invoices for supplies, equipment, services, contractual services, and a report of personnel, travel, and indirect costs. For projects that demonstrate progress solely through the submission of interim progress reports, payments shall be made upon receipt, review and approval of the interim progress report and accompanying payment request form. Payments shall be made to the Grantee no more frequently than monthly.

The total reimbursement shall not exceed the grant award of \$150,000. The cumulative match value for the project shall meet or exceed the amount of grant funds received multiplied by 0.667 (e.g. \$150,000 grant X 0.667 = \$100,050 minimum match required) of non-federal cash and in-kind services.

Funding is provided through a Watershed Assistance Grant from the NH Department of Environmental Services with Clean Water Act Section 319 funds from the U.S. Environmental Protection Agency.

A handwritten signature in blue ink is written over the 'Grantee Initials' and 'Date' labels. The signature is stylized and appears to be 'J. [unclear]'. The date is written as '1/23/23'.
