EXPLANATION

During the Fall of 2022, NHDES went out for solicitation of interest to community water systems serving a population greater than 150 people. Forty-six (46) proposals were received, evaluated, and ranked based on criteria included in the request for proposals, such as the ability to demonstrate a “shovel-ready” drinking water infrastructure project following the planning efforts and an ability to make improvements to the sustainability of the system. Out of the forty-six project proposals, twenty-three (23) were selected to be funded under the American Rescue Plan Act (ARPA) funds. See attachment A for the proposal rankings and list of reviewers.

The City of Portsmouth will use the funds to assess engineering solutions to improve the water quality and pressure for the Lafayette Road water storage tank. Through the strategic planning efforts, the results of the assessment will provide a path forward to better improve the community’s water quality.

ARPA of 2021 is a \$1.9 trillion economic stimulus bill passed by the 117th United States Congress and signed into law by President Biden on March 11, 2021, to speed up the United States’ recovery from the economic and health effects of the COVID-19 pandemic and the resultant recession. The Act defines eligible uses of the state and local funding, including responding to public health emergencies, responding to workers performing essential work during the COVID-19 emergency, providing revenue

relief to states and making investments in water, sewer, and broadband infrastructure. This is an allowable use of ARP FRF funds under Section 602 (c)(1)(D) to make necessary investments in water, sewer, or broadband infrastructure.

In the event grant funds become no longer available, general funds will not be requested to support this program. These grant agreements have been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.

Robert R. Scott
Commissioner

EXHIBIT B
SCOPE OF SERVICES

The City of Portsmouth will contract with an engineering firm to complete the following outlined tasks. The goal of the project is to evaluate the options for engineering solutions and operational modifications for the improvement of the water quality and pressure in the Lafayette Road Water Storage Tank and surrounding water distribution system.

Task 1 – Preliminary Engineering

The scope of work will include an assessment of historic water use, water turnover and pressure in the Lafayette Road Water Storage Tank. Historic water quality data will be compiled and utilized along with additional water quality sample results to develop a baseline data set.

Options for improving the water quality in the Lafayette Road tank will be identified and evaluated for their feasibility, costs (capital & operation), effectiveness, system impacts, and long-term functionality. The options will include at a minimum:

- mixing techniques,
- reducing storage and maintaining pressure with a pumping/ motor-operated valve system,
- potentially adding fire pump capabilities,
- creating additional pressure zones in the southern portion of the water system to address turnover and pressure and,

- replacing the tank with a smaller, elevated tank.

The scope of work also will include a routine tank inspection with a remotely-operated vehicle (ROV) to assess sediment accumulation, coating condition, and structural improvement needs. The results of this report will be used to scope a follow-up tank repair, painting and maintenance contract. This project will also include a distribution system pressure analysis through the deployment of pressure loggers. The results can be used for updating the Portsmouth Water System distribution network computer model, which in turn can be used to evaluate the effects of the tank modification options on the system pressure.

Task 2 – Meetings

Project meetings will be scheduled as needed with a minimum of a kick off meeting, mid-project update meeting, and a wrap-up final reporting meeting. The NHDES will be invited to attend each of these meetings. Up to three additional conference calls/zoom meetings are anticipated to work through questions, review draft documents, and coordinate field activities.

Deliverables:

The final deliverable of this project will be a Lafayette Road Water Storage Tank Improvement Plan that will contain the results and summaries of the water quality and water pressure assessments, the tank inspection report, and detailed descriptions and conceptual plans of the options considered for improving the water quality conditions. These engineered options will include thorough discussions on the feasibility, effectiveness, system impacts, and long-term functionality along with cost estimates for their construction and operation, and a recommended course of action.

- Updates to the Portsmouth Water System distribution network computer model will be provided with updated electronic files. A description of the changes will be included in the Plan report.
- The final Plan will be delivered as two (2) hard copies to the City of Portsmouth and an electronic version in PDF format. Draft documents and reports will be provided to the City and the NHDES in electronic format for review and comment. Final documents will be completed after receipt and incorporation of comments by the City and NHDES.

An invitation for NHDES participation in meetings is a requirement. Quarterly progress report forms must be completed by grant recipients or their subcontractor and submitted to NHDES every three months, beginning with the first full 3 month quarter after grant approval from the Governor and Council.

EXHIBIT C BUDGET & PAYMENT METHOD

The NHDES shall pay to the Grantee the total reimbursable program for eligible work which shall not exceed the Grant Limitation of \$50,000.

Reimbursement requests for program costs shall be made no more than once per calendar month by the Grantee using the approved reimbursement form as supplied by the NHDES, which shall be completed and signed by the Grantee. The reimbursement form shall be accompanied by proper supporting documentation based upon direct costs incurred. The Grantee will maintain adequate documentation to substantiate all project related costs. All
