His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$137,806,238 from \$5,928,058,454 to \$6,065,864,692 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and retroactively effective July 1, 2023, subject to Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 71.9% of the price limitation increase, the other non-federal fund share is 12.3%, and the general fund is 15.8% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	66%	1.7%	32.3%
Standard Medicaid Population (Medicaid Care Management)	50.8%	17.2%	32%
NOTE New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points through September 2023; and 1.5 percentage points through December 2023).			

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

amended on December 08, 2021 (Item #6-1), as amended on June 15, 2022 (Item # Tabled Item 20A), as amended on December 21, 2022 (Item #13A), and as amended on June 14, 2023 (Item 17)

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2024 and 2025, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments; however, the Department has received authorization from CMS for the 14-month rating period and related costs in these Amendment #10 contracts given the end of the MCOs' contract terms scheduled to expire August 31, 2024. During typical rating cycles, rates are updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2024 and two months of SFY2025.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is **retroactive** because House Bill 2 modified the rates effective July 1, 2023. This request covers the rating period of July 1, 2023 through August 31, 2024. The methodology used to develop the previous Amendment #10 RY 2024 capitation rates is largely consistent with the capitation rate methodology in this Amendment #11. House Bill 2 Legislative changes signed into law after Amendment #10 was approved with effective dates July 1, 2023 are the primary basis for the retroactive request.

As explained in Amendment #10, with the end of Continuous Coverage as of March 31, 2023 and the federal Public Health Emergency (PHE) on May 11, 2023, the full 6.2% enhanced Federal Medical Assistance Percentage (FMAP) received under the Families First Coronavirus Response Act available to states like New Hampshire has ended as of March 31, 2023. New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points April through September 2023; and 1.5 percentage points during the months October through December 2023.

Coinciding with the end of continuous coverage, enrollment is expected to be lower in the 14-month rating period compared to SFY 2023. As of March 31, 2023 just under 104,000 enrollees were protected from redeterminations of eligibility due to continuous enrollment coverage. Full regular eligibility operations commenced effective April 1, 2023. As of October 23, 2023, Medicaid managed care enrollment stood at nearly 182,000, down from the peak of 251,357 at the end of March 2023.

For Amendment #11 relative to the rates, key changes include:

1. The Rate Year (RY) 2024 MCM capitation rates cover the July 1, 2023 through August 31, 2024 period to accommodate the start of a new MCO contract that will be effective September 1, 2024.

2. Capitation rates include a preliminary acuity adjustment reflecting unwind experience through August 2023 due to the enrollment mix changes based on the Department's unwind process.
3. Updated projected enrollment reflecting emerging enrollment through August 2023.
4. Implementation of certain facility rate increases, including:
 - a. State-owned hospital per diem rates (November 2023)
 - b. Inpatient hospital DRG weights (October 2023)
 - c. FQHC fee schedule (July 2023)
 - d. Outpatient cost-to-charge ratios (SFY 2024)
 - e. Legislative changes outlined in House Bill 2 (\$35.5 million)(October 2023; January 2024)
5. Implementation of 12-month continuous coverage for children (required of all states).
6. Updated prescription drug carve-out list.
7. Updated Children's Hospital directed payment.
8. The composite capitation rates are based on projections of MCO enrollment for RY 2024, which include considerations for the unwind process following the end of the public health emergency (PHE).
9. The Amendment #11 rate change is predominantly attributable to House Bill 2 and the acuity changes related to the Medicaid unwind.
10. The overall administrative cost allowance for Amendment #11 for the Standard Medicaid population, is 7.5%, a decrease by 0.2% from Amendment #10. The decrease is 0.3% for the GAHCP population to 8.3%. This relates to holding the administration allowance steady for the HB 2 rate increases. The total spending for administrative costs is projected to decline from \$8.7 million a month in SFY 2023 to \$6.8 million a month in RY 2024 under this amendment.
11. In RY 2024, the MCOs' overall medical loss ratio (MLR) for at-risk services of 91.0% for the Standard Medicaid population and 90.2% for the GAHCP population are based on projected enrollment distribution for the rating period; a 1.5% risk margin is applied as a percentage of revenue prior to the directed payments and the 2% premium tax allowance. The risk corridor from Amendment #10 remains in effect.

The recent price limitation history comparing Amendments #8&9 to #10&11 is immediately below in the table. Please note the Amendment #10&11 cover 14-months versus a period of 12-months for #8&9.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. Chapter 79, Section 407, Laws of 2023, authorized the Granite Advantage Health Care Program through December 31, 2030.

The methodology shall also incorporate a custom risk weight related to the cost of opioid addiction services. Scored individuals are those with at least six months of eligibility and claims experience in the base data. The methodology shall exclude diagnosis codes related to radiology and laboratory services to avoid including false positive diagnostic indicators for tests run on an individual. The adjustment will be updated for Amendment #11 capitation rates, as appropriate.

6.2.13 DHHS reserves the right to terminate or implement the use of a risk adjustment process for all or specific eligibility categories or services if it is determined to be necessary to do so to maintain actuarially sound rates or as a result of credibility considerations of a population's size as determined by DHHS's actuary.

[42 CFR 438.8(j); 42 CFR 438.8(c)]

6.3.4.1.8.1. [Amendment #8:] Payments related to the Withhold and Incentive Program shall be excluded from the minimum and maximum MLR settlement.

6.4 Financial Responsibility for Dual-Eligible Members

6.4.1 [Amendment #7:] For Medicare Part A crossover claims and Medicare Part B crossover claims billed on the UB-04, the MCO shall pay the patient responsibility amount (deductible and coinsurance) for covered services. 6.12.1.1 [Amendment #3:] The MCO capitation rates reflect a target medical loss ratio (MLR) which measures the projected medical service costs as a percentage of the total MCO capitation rates. The risk corridor would limit MCO gains and losses if the actual MLR is different than the target MLR.

6.12.1.2 [Amendment #3:] The MCM program target MLR for at-risk services is 89.6% for Standard Medicaid and 88.7% for GAHCP based on the September 2019 to June 2020 projected enrollment distribution. Target MLRs will be calculated separately for each MCO based on their actual enrollment mix by rate cell.

6.12.1.3 [Amendment #3:] Table 1 summarizes the share of gains and losses relative to the target MLR for each party.

6.12.1.4 [Amendment #3:] The settlement will be done separately for the Standard Medicaid and GAHCP populations.

6.12.1.5 [Amendment #3:] Other MCM program risk mitigation provisions will apply prior to the risk corridor (i.e., Boston Children's Hospital risk pool, high cost patient stop loss arrangement, and prospective risk adjustment).

6.12.1.6 [Amendment #3:] The numerator of each MCO's actual MLR will include all payments made to providers, such as fee-for-service payments, subcapitation payments, incentive payments, and settlement payments.

6.12.1.7 [Amendment #3:] Payments and revenue related to directed payments and premium taxes will be excluded from the numerator and denominator of each MCO's actual MLR, which is

consistent with the treatment of directed payments and premium taxes in federal MLR calculations.

6.12.1.8 [Amendment #3:] The 85% minimum MLR provision in the MCM contract will apply after the risk corridor settlement calculation. The 85% minimum MLR provision is adjudicated using federal MLR reporting rules, which produce a different MLR than the MLR calculated for risk corridor settlement purposes.

6.12.1.9 [Amendment #3:] The timing of the risk corridor settlement will occur after the contract year is closed and substantial paid claims runout is available.

6.12.2 [Amendment #4:] Subject to CMS approval, DHHS shall implement a risk corridor as described in Table 1, for the July 2020 to June 2021 (SFY 2021) contract period to address the uncertainty of future medical costs given the COVID-19 pandemic.

6.12.2.2 [Amendment #4:] The MCM program target MLR for at-risk services is 89.5% for Standard Medicaid and 88.6% for GAHCP based on the July 2020 to June 2021 projected enrollment distribution. The 85% minimum MLR provision is adjudicated using federal MLR reporting rules, which produce a different MLR than the MLR calculated for risk corridor settlement purposes.

6.12.2.9 [Amendment #4:] The timing of the risk corridor settlement will occur after the contract year is closed and substantial paid claims runout is available.

6.12.3 [Amendment #4:] The Granite Advantage Health Care Plan (GAHCP) risk corridor calculation shall be applied after the risk adjustment calculation.

6.12.3.1 [Amendment #4:] The timing of the risk corridor settlement will occur after the contract year is closed and substantial paid claims runout is available.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$1,209,229,580 from \$4,718,828,874 to \$5,928,058,454 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and effective July 1, 2023, subject to Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 67.47% of the price limitation increase, the other non-federal fund share is 15.69%, and the general fund is 16.84% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	65.4%	1.4%	33.2%
Standard Medicaid Population (Medicaid Care Management)	50.9%	22.6%	26.5%

NOTE New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points through September 2023; and 1.5 percentage points through December 2023).

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 7

amended on December 08, 2021 (Item #6-1), as amended on June 15, 2022 (Item # Tabled Item 20A), and as amended on December 21, 2022 (Item #13A).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2024 and 2025, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments; however, the Department has received authorization from CMS for the 14-month rating period and related costs in these Amendment #10 contracts given the end of the MCOs' contract terms scheduled to expire August 31, 2024. During typical rating cycles, rates are updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2024 and two months of SFY2025.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request covers the rating period of July 1, 2023 through August 31, 2024. The methodology used to develop the previous Amendment #9 SFY 2023 capitation rates is largely consistent with the capitation rate methodology in this Amendment #10.

With the end of Continuous Coverage as of March 31, 2023 and the federal Public Health Emergency (PHE) on May 11, 2023, the full 6.2% enhanced Federal Medical Assistance Percentage (FMAP) received under the Families First Coronavirus Response Act available to states like New Hampshire has ended as of March 31, 2023. New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points April through September 2023; and 1.5 percentage points October through December 2023.

Coinciding with the end of continuous coverage, enrollment is expected to be lower in the 14-month rating period compared to SFY 2023. As of March 31, 2023 just over 103,000 enrollees were protected from redeterminations of eligibility due to continuous enrollment coverage. Full regular eligibility operations commenced effective April 1, 2023. As of May 29, 2021 Medicaid enrollment stood at 210,074, down from the peak of 251,357 at the end of March 2023.

For Amendment #10 relative to the rates, key changes include:

1. The Rate Year (RY) 2024 MCM capitation rates cover the July 1, 2023 through August 31, 2024 period to accommodate the start of a new MCO contract that will be effective September 1, 2024.
2. Capitation rates include a preliminary acuity adjustment increase due to the enrollment mix changes based on the Department's unwind process, and will be updated in Amendment #11 capitation rates based on experience. Specifically, a greater number of lower acuity individuals are expected to become ineligible as compared to higher acuity people. The Department anticipates about 80% of Medicaid protected enrollees will have gone through the redetermination unwind process by October 1, 2023.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 7

3. The increase cited above in the capitation rate is, however, offset entirely by the updated base encounter data in Standard Medicaid and GAHCP. Specifically, the transition from CY 2019 to SFY 2022 MCO encounter base experience data, and inclusion of non-CMHC encounter data for the GAHCP population enrolled in a behavioral health rate cell, so as not to reduce funding supporting CMHC workforce availability and beneficiary access.
4. The RY 2024 capitation rates include directed payments to community mental health centers (CMHCs), critical access hospitals (CAHs), state-owned hospitals for professional psychiatric services, and children's hospitals (subject to CMS approval); these amounts are included in the MCO capitation rates. MCOs are not at-risk for the amount of these directed payments. Per member cost increases outlined in Table 2 for the directed payment to CAHs is largely a function of the pool of dollars spread over the lower enrollment expected in RY 2024.
5. An overall 7.7% administrative cost allowance for the Standard Medicaid population; an increase by 0.1% from Amendment #9, and 8.6% for the GAHCP population; an increase of 0.2%; however, the total spending for administrative costs is projected to decline from \$8.7 million a month in SFY 2023 to \$6.8 million a month in RY 2024 under this amendment.
6. In RY 2024, the MCOs' targeted medical loss ratio (MLR) for at-risk services of 90.8% for the Standard Medicaid population and 89.9% for the GAHCP population are based on projected enrollment distribution for the rating period; a 1.5% risk margin is applied as a percentage of revenue prior to the directed payments and the 2% premium tax allowance; and includes a continuation of the risk corridor.

.....

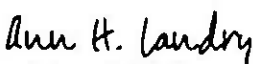

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 7

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4, Section 351, of the 2019 NH Regular Legislative Session. The current GAHCP is subject to a reauthorization as of December 31, 2023. Both the House and Senate have legislation to reauthorize, though for different lengths of time.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into Retroactive amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$245,113,188 from \$4,473,715,686 to \$4,718,828,874 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and effective retroactive to July 1, 2022, upon Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 81% of the price limitation increase, the other non-federal fund share is 12%, and the general fund is 7% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	69.34%	1.07%	29.59%
Standard Medicaid Population (Medicaid Care Management)	53.6%	22.4%	24.00%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 6

amended on December 08, 2021 (Item #6-1), and as amended on June 15, 2022 (Item # Tabled Item 20A).

Funds are available in the accounts outlined in the attached fiscal details and are available in the State Fiscal Year (SFY) 2023, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is Retroactive because it covers the rating period of July 1, 2022 through June 30, 2023. The methodology used to develop the previous Amendment #8 SFY 2023 capitation rates is largely consistent with the capitation rate methodology in this Amendment #9.

The federal Public Health Emergency (PHE) continues to have an impact on program costs. In order for states to receive the 6.2% enhanced Federal Medical Assistance Percentage (FMAP) the Families First Coronavirus Response Act requires continuous enrollment by states for individuals who were or became Medicaid eligible since March 13, 2020 through at least April 2023. The PHE end date was not noticed on November 12, 2022, so an end of the PHE in January is off the table unless there is Congressional intervention. The PHE, therefore, is likely to run through April 2023.

As of the beginning of December, the NH Medicaid program has 100,481 individuals protected from disenrollment due to continuous enrollment, out of an enrollment of over 246,616 as of December 5, 2022. Absent the continuous enrollment requirement, as of November 30, 2022, more than 29,000 people are known to be ineligible based on completed redeterminations of eligibility (or nearly 12% of current enrollees). Another nearly 35,000 individuals are potentially ineligible since they have not yet completed an annual redetermination of eligibility, which is not required during the PHE. Over 36,000 are both overdue in completing a redetermination and potentially ineligible based on yet to be verified information available to DHHS. Any material disenrollment is unlikely in this rate year, and is likely to begin no earlier than May 1, 2023.

While the State continues to receive 6.2% enhanced FMAP on certain Medicaid expenditures, the enhanced federal payment excludes the NH Granite Advantage Health Care Program at 90% FMAP already, and where enrollment growth for NH has been the greatest both on a percentage (81.6%), and an absolute enrollment growth basis (41,924) since mid-March 2020. For Amendment #9 relative to the rates:

1. An end of year retroactive non-budget neutral rate adjustment based on actual enrollment was not actuarially made by the State's actuary, as the acuity impact is very likely de minimis.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 8

2. Rates are calibrated to reflect a PHE end date in April 2023. Once ended, beneficiaries whose eligibility determination shows they no longer meet eligibility criteria will be disenrolled from Medicaid as Federal guidance permits. In order to minimize gaps in healthcare coverage, DHHS, the MCOs, providers and other stakeholders are working to engage beneficiaries. The disenrollment activity is expected to reduce program membership and related costs over the course of the unwind enrollment period.
3. The rates per person aggregate modestly decrease, while the price limitation has increased to reflect the much higher than anticipated enrollment related to the PHE continuing. Generally, states anticipate that when the PHE disenrollment commences, the premiums will rise per person, but the number of people enrolled will decline. Over time, this will lead to lower contract price limitations due to declining enrollment. The enrollment decline and related cost-savings will be realized from exiting individuals who generally have lower illness burden and lower healthcare costs.
4. Tables 1A and 1B in the Appendix depict monthly capitation rates, by major population eligibility groups, and the percent change from the prior Amendment. The rates in Table 1A exclude directed payments which are fixed costs, while Table 1B includes the fixed costs. The price limitation change is calculated off of the Table 1B capitation rates. The rates in the aggregate decline favorably by 0.7% for standard and 2.4% for the GAHCP. Taken together, standard and GAHCP capitation rates decline favorably by 1.5%.
5. Table 2 lays out the capitation rate change components. The top half of the chart shows program changes that increased costs unfavorably by \$7.15 million. The two largest changes are related to legislation enacted into law in the recent legislative session to improve birthing services and ambulance rates. The third largest captures professional billing for Medicaid at state-owned psychiatric facilities. The bottom half of the chart reflects the actuarial rating adjustments that lowered costs by \$27.56 million. The three largest changes are an acuity adjustment, fixed costs that do not increase with the increase in enrollment, and staffed bed constraints in psychiatric capacity.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$1,127,921,908 from \$3,345,793,778 to \$4,473,715,686, with no change to the completion date of August 31, 2024, and effective July 1, 2022, upon Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	66.1%	1.6%	32.3%
Standard Medicaid Population (Medicaid Care Management)	52.7%	22.2%	25.1%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

(Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), and as amended on December 08, 2021 (Item #6-1).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2023, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request covers the rating period of July 1, 2022, through June 30, 2023. There are three key purposes for this amendment. They are:

1. Amendment #8 Target Medical Loss Ratio, Administrative Allowance, and Rates

- The Department's actuary projects an overall MCO medical loss ratio (MLR) for at-risk services of 90.8% for the Standard Medicaid population and 90.1% for the GAHCP population in SFY 2023, which includes the rate development highlights below.
 - An overall 7.7% administrative cost allowance for the Standard Medicaid population, and 8.4% for the GAHCP population; representing a reduction in percentages from SFY 2022 as funding remains consistent with the current contract period.
 - A 1.5% risk margin applied as a percentage of revenue prior to the directed payments and the 2.0% premium tax allowance.
 - The composite capitation rates shown are based on DHHS projections of MCO enrollment for SFY 2023, which include considerations for the unwind process following the end of the Public Health Emergency (PHE) with enrollment returning to near pre-PHE levels by March 2023. It is likely in the future Amendment #9 that enrollment will need to be recalibrated if the federal government continues to extend the federal PHE.
- Included in the Appendix to this letter:
 - Table 1A shows the rate impact excluding directed payments, as well as with and without the SMI/SED (Severely Mentally Ill/Severely Emotionally Disturbed) 1115 waiver amendment to the Substance Use Disorder Treatment and Recovery Access (SUD-TRA) Demonstration at 3.8% to the total composite rate.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 8

- o Table 1B takes into account directed payments and reflects a change of 1.8%.
- o Table 2 shows the component changes leading to the 1.8% increase in composite rate.
- o The price limitation is \$168,631,814 less than SFY 2022 (prior to any legislation enacted after the contract date).

2. Risk Mitigation Structure

- Retrospective acuity adjustment due to the uncertainty surrounding the continuous membership unwind process following the end of the PHE as authorized by the Center for Medicare and Medicaid Services (CMS) Division of Managed Care Policy on May 11, 2022. The purpose is to appropriately account for this uncertainty; DHHS will implement a non-budget neutral retroactive acuity adjustment to include a preliminary acuity assumption that will be updated following the contract year to reflect the actual population covered throughout SFY 2023; the preliminary risk adjustment for the expected enrollment composition changes the amount to an \$11.9 million increase.

- Minimum and maximum medical loss ratio (MLR) remains in effect for SFY 2023, to protect against a windfall or underfunding of services within the Program.

The minimum MLR is set on a program-wide basis for each major population, such that maximum profit achievable is 4%, which is equal to the 1.5% target margin plus the amount between the target MLR and the minimum MLR (2.5%). Based on the target MLRs, the minimum MLR will be 88.3% for the Standard Medicaid population and 87.6% for the GAHCP population.

The maximum MLR is also set on a program-wide basis for each major population 3.5% above the target MLR, such that MCOs will have a maximum loss of 2.0%. Based on the target MLRs the maximum MLR will be 94.3% for the Standard Medicaid population and 93.6% for the GAHCP population.

The final minimum and maximum MLRs for Standard Medicaid and GAHCP will be updated for the final retroactive acuity factor and any other changes implemented covering the amendment period starting January 2023.

- Other existing adjustment factors risk-neutral to the State continue in the Program. The risk mitigation structure is consistent with the structure included in the SFY 2022 capitation rates with the one modification to include a retrospective acuity adjustment that addresses uncertainty caused by the end of the PHE.
- On page 9 of the *2022-2023 Medicaid Managed Care Rate Development Guide*, "CMS recommends all states implement a 2-sided risk mitigation strategy for rating periods impacted by the Public Health Emergency." Due to population and cost uncertainty related to the ongoing PHE and the anticipated enrollment redetermination process.

3. Other Program Rate Adjustments

- SFY 2023 component changes in Table 2 (see Appendix) are expressed relative to the same components in the SFY 2022 rates.
- Incorporation of the Institution for Mental Disease (IMD) SMI/SED Waiver effective July 1, 2022 (pending CMS approval), DHHS will implement its SMI/SED (Severely

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 8

Mentally Ill/Severely Emotionally Disturbed) 1115 waiver amendment to the Substance Use Disorder Treatment and Recovery Access (SUD-TRA) Demonstration.

The waiver amendment allows DHHS to claim additional federal matching funds for Medicaid enrollees aged 21 through 64 years treated in an Institution for Mental Disease (IMD), including at New Hampshire Hospital and Hampstead Hospital for lengths-of-stay greater than 15 days and no more than 60 days for an individual (the average length-of-stay for all beneficiaries cannot exceed 30 days).

- Medical trend adjustment since the start of the COVID-19 pandemic and PHE, service utilization levels in the Medicaid program have lagged behind CY 2019 utilization by rate cell and on an aggregate basis; therefore, capitation rates assume SFY 2023 utilization levels will be consistent with CY 2019. As such, utilization trends from CY 2019 to SFY 2023 remain constant with the exception of Applied Behavioral Analysis (ABA) services with an annual trend rate from CY 2019 to SFY 2023 at 21.7%. ABA services are an evidence-based consultation, assessment and treatment option for children with autism spectrum disorder or other developmental conditions that can improve social, communication, and learning skills.
- Preliminary acuity adjustment is an increase because it reduces costs by a lower amount in SFY 2023 than SFY 2022 largely due to the current estimate of enrollment timing and trajectory during the PHE unwind.
- Pharmacy trend and savings. The pharmacy trend assumptions in Table 2 are based on a combination of historical New Hampshire Medicaid data analysis, Milliman's research on utilization and cost trends, and publicly available trend reports and forecasts.

Pharmacy savings were shown in the preferred drug list (PDL) analysis. The pharmacy savings analysis undertaken for this amendment included savings related to adjustments for prescribing efficiency opportunities for several drug classes related to asthma, HIV, and autoimmune disorders. The savings amounted to \$907,740 for the rating period, though the savings were less than SFY 2022 resulting in a cost increase for this line item. Lastly, the J-code class of injectable drugs reflects market trends.

- Opioid addiction treatment trend adjustment to the base experience data underlying the MCM capitation rates to account for the estimated change in both prevalence and cost of treatment for the opioid addiction treatment population. Based on the Actuary's review of SFY 2015 through October 2021 MCO encounter data, they determined the proportion of opioid addiction population started to decrease for several rate cells. This decrease in the proportion of opioid addiction population results in adjustments of less than 1.00 for several rate cells.
- Directed payment adjustment to remove the completed SFY 2022 HCBS (Home and Community Based Service) payments related to time limited American Rescue Plan enhanced FMAP for HCBS.
- Funding for 14 additional Community Residential Beds coming into service. Expanded services to fund an additional 14-bed community residential services at roughly \$958,000 (including administration, premium tax and margin).

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 8

- Reimbursement adjustments to reflect recent or expected changes in the Medicaid Fee-for-Service (FFS) provider fee schedule based on Medicare Fee Schedule changes including:
 - Current Ambulatory Surgical Center fee schedule effective January 1, 2022;
 - Professional and other services fee schedules effective January 1, 2022; and
 - J-code repricing effective July 1, 2022, and other routine fee schedule updates.
- Other adjustments included in the rate change driver table (Table 2) for the SFY 2023 rates:
 - Base data update (e.g., lower/higher incurred but not reported (IBNR) expenses than previously estimated);
 - Enrollment projection impact on fixed dollar items (e.g., Community Mental Health Agreement funding);
 - Changes in FFS fee schedule from SFY 2022 to SFY 2023;
 - Refreshed financial data items from the MCOs (e.g., provider incentive payments);
 - Changes in enrollment information (e.g., retroactive change in rate cell assignment);
 - Changes in stop loss attachment point for high-cost member claims; and
 - Changes in program effective dates (e.g., Behavioral Health Crisis Treatment Centers (BHCTC), genetic testing)

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. In the event the contract is not approved before June 30, 2022, the available federally permitted retroactive risk adjustment mitigation to account for the uncertainty of the PHE unwind will not be available to New Hampshire.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$107,893,151 from \$3,237,900,627 to \$3,345,793,778, with no change to the completion date of August 31, 2024, and effective retroactive to July 1, 2021 upon Governor and Council approval. Funding sources are as follows:

	Federal	Other	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	67.40%	0%	32.60%
Standard Medicaid Population (Medicaid Care Management)	53.57%	0%	46.43%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. Additionally, the American Rescue Plan of 2021 potentially provides an additional 10% FMAP for a one year period (April 1, 2021-March 31, 2022) for certain home and community based services (HCBS) covered in this contract based on an approved Centers for Medicare and Medicaid Services (CMS) HCBS spending plan. The Department will request Fiscal Committee approval to accept and expend additional amounts for January 2022 forward. The adjusted price limitation, given the enhanced FMAP and provisions in HB 2, should be sufficient to stay within the budget for SFY 2022. Legislation under consideration by Congress could impact the CHIP and Standard Federal share amounts.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9); December 18, 2019 (Item #15); May 20, 2020 (Item #7A), June 10, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 4

(Item #6), January 22, 2021 (Item #9), and as amended on June 30, 2021 (Item # Tabled Item 8A).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY)2022, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2022.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is **Retroactive** because it covers the rating period of July 1, 2021, through June 30, 2022. There are three key purposes for this amendment:

- First, is to incorporate the impact of acuity (i.e., the measure of beneficiaries' collective medical conditions) due to an increase in new enrollment as the result of an extended federal public health emergency and extended continuous enrollment. Generally, there has been a decrease in acuity that moderates claims expense costs compared to the rates approved under Amendment #6;
- Second, is to incorporate the increased costs of legislative changes from both federal legislation and state actions in the most recent legislative session; and
- Third, is to incorporate fee schedule updates, and an adjustment for pharmacy management.

Further Explanation

Amendment #7 adjusts the SFY 2022 capitation rates. The Department's contracted actuary, Milliman, projects an overall MCO medical loss ratio (MLR) for at-risk services of 90.7% for the Standard Medicaid population and 90.0% for the GAHCP population in SFY 2022, which includes the rate development highlights below.

Milliman used the following methodology to develop the New Hampshire MCM program capitation rates:

1. Rate methodology

The methodology used to develop the Amendment #7 SFY 2022 MCM capitation rates is consistent with the Amendment #6 capitation rate methodology.

2. Changes in enrollment

CMS instructed the Department to review emerging enrollment and Public Health Emergency (PHE) conditions for Amendment #7. The updated capitation rates are based

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 4

on the Department's updated projections of MCO enrollment for SFY 2022 which include continued enrollment growth through SFY 2022..

3. Acuity adjustment

For the Amendment #7 SFY 2022 MCM capitation rates, Milliman updated the acuity adjustment factors taking into account the nature of the new enrollment compared to historical enrolled individuals.

4. Federal and State Legislative actions

a. Home and community based services (HCBS) enhanced federal funding

HCBS directed payments available under Section 9817 of the American Rescue Plan Act (ARPA) provide enhanced federal funding for state Medicaid spending on home and community based services. Beginning April 1, 2021, through March 31, 2022, states are eligible to receive a ten (10) percentage point increase in their FMAP for specified HCBS services. In order to claim the enhanced FMAP eligible under the MCO contracts, the Department is proposing to implement a new directed payment initiative estimated at \$28 million for certain eligible HCBS state plan services (pending CMS approval). Rates for directed payments do not include an additional allowance for administrative expense or risk margin for this addition. The directed payment is subject to premium tax.

b. State Legislative benefit updates

i. Home visiting services for pregnant women and infants ages 0-1 year consistent with HB 2 beginning October 1, 2021, were prorated 9-months at estimated annual costs of \$1.853 million.

ii. Genetic testing reimbursement for hospitals in accordance with HB 600.

5. Fee schedule updates, include:

a. DRG inpatient hospital unit cost trend updates using the actual 2022 DRG weights effective October 1, 2021. A review of the newly released weights suggests a 0.0% unit cost trend between 2021 and 2022 compared to the Amendment #6 assumption of a 0.56% increase based on historical data.

b. Neuro-psychiatric testing codes within the Calendar Year 2021 fee schedule included a number of incorrect entries for several neuro-psychiatric testing codes which prompted an update to reimbursement adjustment factors. The estimated impact of the correction is an increase of approximately \$135,000 for SFY 2022.

c. Other fee schedule changes, include:

i. Unit cost adjustment for latex gloves and a fee schedule update for vaccine administration account for an additional \$310,000 in SFY 2022.

ii. New durable medical equipment (DME) and supplies (breast milk storage bags, peristeen pumps) with annual costs estimated at \$280,200 and \$135,000, respectively (effective October 1, 2021).

iii. Behavioral health crisis treatment center program services transferring to the State's redesigned Mobile Crisis Response Program.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 4

- iv. Preferred drug list (PDL) updates to include different formulations of drugs already included on the PDL.
- v. Community residential services beds service projection updates.

6. Prescription drug savings adjustments

An adjustment to rates is included to account for differences in MCO pharmacy management (e.g., adherence to generally accepted quantity limits for three (3) therapeutic classes; opioid prescribing patterns; prior authorization denial rates) with annual savings of \$1.59 million incorporated into the rates.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. In the event the contract is not approved, available federal relief to HCBS providers and their direct care workers would not be available.

Respectfully submitted,

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total shared price limitation by \$1,188,660,571 from \$2,049,240,056 to \$3,237,900,627, with no change to the completion date of August 31, 2024 effective July 1, 2021 or upon Governor and Council approval, whichever is later. Funding sources are as follows:

	Federal	Other	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	71.88%	0.50%	27.62%
Standard Medicaid Population (Medicaid Care Management Account)	53.12%	22.56%	24.32%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of federal medical assistance percentage (FMAP) for the CHIP population could become available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. Additionally, the American Rescue Plan of 2021 potentially provides an additional 10% FMAP for a one year period (April 1, 2021-March 31, 2022) for certain home and community based services covered in this contract based on approved Centers for Medicare and Medicaid Services (CMS) spending plan, which is subject to further federal guidance at this juncture. If the additional funding is received the Department will request Fiscal Committee authority to accept, and expend additional amounts for January 2022 forward.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 5

April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), and January 22, 2021 (Item #9).

Funds are available in the accounts outlined in the attached fiscal details for State Fiscal Year (SFY) 2021, and are anticipated to be available in the SFYs 2022 through 2023 with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes and legislatively approved rate increases are included as well.

EXPLANATION

This request covers the rating period of July 1, 2021 through June 30, 2022.

Summary of Key Changes

Exhibit A. Program Change Summary:

1. A carry forward of staffing requirements from amendment #5
2. Added provision that Members shall not be required to change covered prescription drugs more than once per calendar year, with limited exceptions.
3. Further extension of additional preferential auto-assignment awards for high-performing MCO(s) consistent with Alvarez & Marsal's report recommendation incorporated initially the last MCO contract amendment.
4. New CMS Managed Care Rule provisions effective July 1, 2021 concerning beneficiary/member rights.
5. Update to the National Committee for Quality Assurance (NCQA) reporting compliance requirements.
6. New Directed Payment for Community Residential Services provided by Community Mental Health Centers (CMHCs) and Psychiatric Designated Receiving Facilities (DRFs); continuation of Directed Payments for Durable Medical Equipment (DME), CMHCs, and Critical Access Hospitals (CAHs).
7. The inclusion of CMS requested language for historical directed payments terms.
8. Elimination of risk corridor and replacement with Minimum and Maximum Medical Loss Ratios (MLRs), the effect of which reduces the state's risk compared to the SFY 2020 and 2021 Risk Corridors. The state has greater enrollment risk due to the unpredictable length of the federal public health emergency.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 5

9. The minimum MLR is set at 88.2% for the Standard Medicaid population and 87.4% for the Granite Advantage Health Care Program (GAHCP) population. The maximum MLR shall be 94.2% for the Standard Medicaid population and 93.4% for the GAHCP population.

10. Any incentive payments made to higher-performing MCOs as part of the Withhold and Incentive Program shall not impact the minimum or maximum MLR provision of the contract.

11. For the period July 1, 2021 through June 30, 2022 rating period, MCOs will receive a one-time kick payment for each Member psychiatric admission stay with DRG code 880-887 subject to limited exceptions.

12. Sets the MCO administrative allowance for SFY 2022 at the 40th percentile, or \$35.78 PMPM (Per Member Per Month) SFY 21 had a blended administrative allowance of \$37.00 PMPM.

The state's actuary Milliman used the following methodology to develop the New Hampshire MCM program capitation rates:

1. Summarize CY 2018 and CY 2019 MCO encounter experience data for the Standard Medicaid and GAHCP Medically Frail eligible population and the March 2019 to December 2019 MCO encounter data for the GAHCP Non-Medically Frail population.
2. Project estimated statewide SFY 2022 MCM program medical costs for all covered services by rate cell.
3. Blend the projected SFY 2022 costs based on CY 2018 and CY 2019 encounter data.
4. Adjust SFY 2022 projected medical costs for all rate cells for benefits not included in the base experience data, expected administrative expenses, margin, and premium tax.

Medicaid enrollment is projected to remain elevated through the end of the federal Department of Health and Human Services declared PHE. There still exists uncertainty related to the end of the PHE. As such, Milliman prepared two (2) separate enrollment scenarios: 1) the PHE ends December 2021, and 2) the PHE ends September 2021:

- Each scenario assumes enrollment returning to pre-COVID levels due to the reinstatement of eligibility redetermination activities three (3) months following the end of the PHE.
- The changes in enrollment are anticipated to impact the average acuity of beneficiaries. For rate cells modeled to have significant enrollment differences due to the PHE; newer enrollees having lower illness burden, the rate development includes an acuity adjustment for each scenario.
- The Department will initially pay capitation rates based on the December 2021 scenario, but will retroactively pay capitation rates under the September 2021 scenario if the PHE ends prior to October 1, 2021.

The capitation rates do not include provisions for expected vaccination administration fees related to COVID-19 in SFY 2022. The cost of vaccination administration fees remain carved out of the MCM program. Based on the interplay of other funding sources. The SFY 2022 capitation rates do not include any explicit adjustments for the following:

- COVID-19 Testing and Treatment Cost: The prevalence of COVID-19 infection rates in SFY 2022 is dependent on many variables that make it difficult to predict to include an

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 5

estimate for the cost of testing for and treating individuals with COVID-19 including, but not limited to:

- The take-up rate and timing of COVID-19 vaccinations;
- The emergence of COVID-19 variants and the efficacy of vaccines on these variants; and
- The implementation of social distancing measures.

Milliman advises, there is not a publicly available model that includes COVID-19 infection rate or hospital admissions through June 2022. In addition, the publicly available models have materially changed short-term and long-term projections of COVID-19 prevalence in reaction to emerging data. While Milliman reviewed historical MCM data for the cost of testing and treating COVID-19 in CY 2020, given the unpredictable patterns of COVID-19 prevalence to date in New Hampshire and the changing national models there is a range of potential impacts on the SFY 2022 rates.

The most significant fiscal impact of COVID-19 to date has been the deferral of non-essential services, either through government-enacted policies, the impact of social distancing on the administration of services, or personal choice. Milliman reviewed MCM emerging claims data incurred through February 2021 by population type (to remove the impact of membership mix changes). As of February 2021, there was still measurable reductions in claim costs for each population compared to the PMPMs prior to the pandemic in CY 2019. However, Milliman advises it is difficult to use this historical data to project the impact of deferred services for SFY 2022 for many reasons.

- Utilization by service category has varied in CY 2020 and early CY 2021 as the level of COVID-19 diagnoses and hospital admissions has changed in New Hampshire over the course of the pandemic. Therefore, the unknown future prevalence of COVID-19 will be a key variable in future service utilization changes relative to pre-pandemic levels.
- Limited data is available to understand how beneficiary behavior will change during and after the roll-out of the COVID-19 vaccination. As such, there could still be a wide range of possibilities as to when service utilization may return to pre-pandemic levels or if there will be increased utilization due to pent up demand.
- In the MCM data Milliman reviewed it is difficult to isolate the impact of deferred services from changes in utilization due to other drivers, such as member acuity changes or change in service mix.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

In response to the pandemic, the mix of services used to treat patients has changed, such as the use of telehealth services. It is unknown if these provider and patient changes will persist after the end of the pandemic.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP necessary to cover the program are not sufficient, the projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

December 30, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by decreasing the total shared price limitation by \$128,374,314 from \$2,177,614,370 to \$2,049,240,056, with no change to the completion date of August 31, 2024 effective retroactive to July 1, 2020 upon Governor and Council approval.

Funds for Granite Advantage Health Program (GAHCP) are 90% Federal and 10% Other (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 74.23% Federal and 25.77% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 52.5% Federal, 24.15% General and 23.35% Other funds. An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population could become available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. If the forgoing materialize, DHHS would go to the Fiscal Committee to increase, accept, and expend amounts for January 2021 forward.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), and most recently amended with Governor and Council approval on June 10, 2020 (Item #6).

Funds are available in the accounts outlined in the financial section for State Fiscal Year 2021, and are anticipated to be available in the State Fiscal Years 2022 through 2025, with authority to adjust amounts within the price limitation between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for State Fiscal Years 2020-2021.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

See attached fiscal details.

EXPLANATION

This request is **Retroactive** because this Amendment covers the retrospective rating period July 1, 2020 through June 30, 2021. The State negotiated in the original SFY2021 rates the opportunity to refresh actuarial estimates. The State was able to use this added flexibility from CMS due to the Public Health Emergency, uncertainties related to COVID-19 treatment and costs, and utilization impact on non-COVID services. The most material initial actuarial estimate was for the costs of deferred care from the prior contract period. As the Public Health Emergency has continued this became a key assumption to revisit as has the enrollment and the composition thereof.

Fiscal table budget amounts reflect more current utilization and enrollment experience, enhanced FMAP available and accepted thus far. Adjustments to administrative costs, program changes and legislatively approved rate increases are included as well.

CMS published a new Medicaid Managed Care rule in November 2020 with provisions effective either December 14, 2020 or July 1, 2021. Those provisions taking effect in December 2020 are incorporated herein and are procedural rather than economic in impact to this Agreement.

Summary of Key Changes

The reduction in price limitation reflects a slightly less steep enrollment growth based on the State of New Hampshire's employment recovery with a greater than expected length of the PHE and maintenance of effort required to earn the enhanced FMAP. DHHS had forecast average monthly enrollment for the contract year of just over 215,000 people, whereas based on experience DHHS now forecast about 208,000 people. This reduction along with a 3% reduction globally in the capitation rates to be paid to the MCOs accounts for the favorable price limitation change.

The 3% capitation rate reduction is a function of net changes, totaling \$38,077,712. The single largest favorable change is related to more favorable COVID-19 cost experience of \$30,774,811. Rather than a 1.2% increase in this SFY 21 period for care deferred care before June 30, 2020, the adjustment for the full twelve month period is a 1.3% decrease.

The second largest favorable adjustment is for MCO administrative costs of \$17,406,265 (or 2.5% of capitation excluding directed payments and premium tax) for the period of January through June, 2021. This reduction reflects an analysis of what the PHE has permitted the MCOs to implement under the contract, what is likely to be able to be advanced in this period given an extension of the PHE due to waves of COVID-19 surge as well as recalibration of those activities where the return on investment looks longer than anticipated back when the contract was developed.

These and other administrative allowance adjustments represent an adjusted administrative allowance consistent with the 50th percentile for the full period (previously, the 75th percentile) and the 32nd percentile for the last six months. Administrative cost benchmarks of other Medicaid managed care plans and within the MCM program were assessed by the state's actuaries.

Offsetting these two key favorable cost adjustments are increases related to the HB4 3.1% provider rate increase amounting to \$13,775,736 for the period January through June 2021 and an increase in the Boston Children's Hospital risk pool of \$4,847,238 for the full twelve month period

reflecting more recent reported experience, other changes can be seen in Table A. The resulting composite capitation rates can be seen in Table B; the net is a 3% reduction.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 90% Federal and 10% Other; funds for the Child Health Insurance Program are 74.23% federal as appropriated by Congress and 25.77% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 52.50% Federal as appropriated by Congress, 24.15% General and 23.35% Other funds.

In the event that the non-federal Other funds for the GAHCP necessary to cover the program are not sufficient, the projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

Respectfully submitted,

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to retroactively amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schrafft's City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), and by increasing the shared price limitation by \$1,361,049,281 from \$816,565,089 to an amount not to exceed \$2,177,614,370, with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval.

Funds for Granite Advantage Health Program (GAHCP) are 90% Federal and 10% Other (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 67.88% Federal and 32.12% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51.01% Federal, 22.56% General and 26.43% Other funds. An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population could become available if the public health emergency (PHE) continues. The CARES Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. The funding percentage of the Child Health Insurance Program (CHIP) is already subject to enhancement through September 2020; the CARES Act would enhance that to 80.84% if the PHE continues into the first quarter of State Fiscal Year 2021. If the forgoing materialize, DHHS would go to the Fiscal Committee to increase, accept, and expend amounts.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A).

Funds are available in the following accounts for State Fiscal Year 2021, and are anticipated to be available in the State Fiscal Years 2022 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align

EXPLANATION

This request covers the period July 1, 2020 through June 30, 2021 (prior contract period was a ten month period). The amounts herein make an initial actuarial estimate for the costs of deferred care from the prior contract period. The budget amounts in the fiscal tables reflect enrollment experience and trend as a result of the public health emergency and the maintenance of effort requirements. Thus far through May 22, 2020, from the date of the PHE, total enrollment has increased overall by more than 7% with the Granite Advantage Health Care Program (GAHCP) over 11%. For State Fiscal Year 2021, enrollment is projected to increase additionally 5.3% for the standard population and 16.5% for the GAHCP.

There is undoubtedly, a high level of uncertainty for future COVID-19 treatment and testing costs, and the acuity of the spike in new enrollment due to the effects of the COVID-19 and the PHE and related economic conditions. Additionally, the impacts on future utilization and deferred care, unrelated to COVID-19 are not reliably known. Therefore, DHHS proposes a retroactive actuarial rate refresh based on experience from the first quarter of the contract back to July 1, 2020 to incorporate more recent actuarial experience, HB 4 rate adjustments, and any further legislative policy changes. The retroactive actuarial rate refresh will necessitate another contract amendment anticipated in February 2021:

Summary of Changes

The amendment to the three (3) MCM capitated and risk-based vendor Agreements; including capitation rate adjustments for September 2019 to June 2020, and July 2020 through June 2021, as well as Exhibit A narrative contract changes, reflect the following changes:

The State Fiscal Year 2021 capitation rates below reflect three program changes from the September 2019 to June 2020 capitation rates.

They are:

1. Revised rate cell structure that incorporates the GAHCP Behavioral Health population into the existing Behavioral Health rate cells and a separate Children's Health Insurance Program (CHIP) rate cell;
2. Targeted savings opportunities through increased care management activities consistent with the MCM contract effective September 1, 2019; and
3. Implementation of a hospital directed payment to promote access to high-quality acute care services provided by critical access and non-critical access hospitals across New Hampshire.

The State Fiscal Year 2021 capitation rates include a continued five million dollar directed payment to community mental health centers (CMHCs), and a new thirty million dollar directed payment to hospitals (both subject to CMS approval). While the amounts are included in the MCO capitation rates, the MCOs are not at-risk for the amount of these directed payments. Both directed payments are included to support quality and access initiatives of the MCM Program.

Capitation Rate Tables 1A and 1B below show the statewide rate change by population compared to the September 2019 to June 2020 capitation rates included in the April 22, 2020 rate certification. The two tables compare rates with and without the new hospital directed payment.

Table 1A capitation rates exclude the new hospital directed payment.

situation and the extent to which future experience conforms to the assumptions made in the capitation rate development calculations.

The amendment also includes narrative and other content changes as described below.

They include:

2. Reference to payments standards for directed payments described in actuarial certification materials for the rating period;

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to retroactively amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schrafft's City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM). The shared price limitation remains unchanged, not to exceed \$816,565,089, in State Fiscal Year 2020, retroactive to September 1, 2019 with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval. After reconciliation of membership, however, we did a reallocation of funds within the price limitation as reflected in the accounting tables.

Funds for Granite Advantage Health Program are 93% Federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020 (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 77.6% Federal and 22.4% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal, 22.7% General and 26.3% Other funds.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9), and December 18, 2019 (Item #15).

Funds are available in the following accounts for State Fiscal Year 2020, and are anticipated to be available in the State Fiscal Years 2021 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

EXPLANATION

This request is retroactive to September 1, 2019 in order to reallocate 1.5% of the capitation payments to ensure access to care for Medicaid beneficiaries and help provide financial stability for safety-net providers. Network providers' provision of access to Medicaid beneficiaries could decrease without consideration of the impact of COVID-19. The directed payments described herein are intended to help, in part, providers remain available to beneficiaries and ensure network adequacy under CMS regulations.

In addition, this amendment will address the CMS requirement to strike contract language that directs administration and funds previously appropriated for the Granite Advantage Health Care Program's (GAHCP) community engagement requirements administered through the managed care contracts. This is because Community engagement requirements have been vacated by the court.

Summary of Changes

DHHS therefore proposes to make the following changes to components of the capitation rates in order to fund the proposed directed payment funding pool:

1. Reduce service costs by 1.5% for all services to recognize the expected net impact of reductions in non-emergency and elective service costs due to the COVID-19 pandemic social distancing guidelines, increased COVID-19 treatment costs, the impact of waiving certain prior authorization requirements, and reduced population acuity due to projected enrollment increases related to the recession
 - a. The MCOs have agreed to continue their capitation arrangement with the community mental health centers (CMHCs) at current payment levels and waive any related maintenance of effort (MOE) provisions for state fiscal year (SFY) 2020.
2. Reduce the per member per month (PMPM) administrative allowance for all rate cells by 1.5% to recognize that significantly fewer MCM program members are enrolled in care management programs compared to the 15% expectation in the MCM contract.
3. Further reduce the administrative allowance for the GAHCP Non-Medically Frail population by \$0.45 PMPM to remove costs related to the GAHCP work and community engagement requirement. The related funding is repurposed for the directed payment pool.
4. Reduce the gain/loss margin to reflect the shifting of revenue from at-risk services to the new non-risk directed payments. The gain/loss margin still represents 1.5% of at-risk revenue.
5. Calculate the amount available for the new directed payment funding pool, which is approximately \$11.7 million assuming the original projected enrollment level (i.e., not incorporating likely enrollment growth resulting from the recession).
6. The original CMHC directed payment remains unchanged.
7. The PMPM premium tax allowance remains unchanged because the capitation rates by rate cell are unchanged after the reallocation by component.

Safety-net Provider Directed Payments

Pending CMS approval, DHHS will require each MCO to pay a percentage distribution and initial allocation for specific qualifying services provided by the six safety-net provider classes based on January 2019 to June 2019 MCO encounter payments as described in Table 1 below.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

FQHCs and RHCs	32.0%	\$3,744,000	\$374,400

Personal Care	7.7%	900,900	90,090
Total Pool	100.0%	\$11,700,000	\$1,170,000

¹ Approximate values of the direct payment pool are based on the initial enrollment projections in the January 14, 2020 rate setting report. Actual monthly pool funding will be determined by actual MCM program enrollment multiplied by the PMPM directed payment funding for each rate cell in the September 2019 to June 2020 MCM program capitation rates.

An identified portion of the actuarially sound per member per month capitation payment to the MCOs multiplied by the member months the plan is paid for the month will form a pool to be used every month to make percentage add-on payments to the defined safety-net provider classes. The pool will be 1.5% of the capitation payments made to the MCOs, or approximately \$12 million for the September 2019 to June 2020 contract year (depending on actual enrollment). DHHS will establish the percentage of the pool that will be allocated to a separate sub-pool for each of the six safety-net provider classes based on historical MCO payments to these providers.

At the end of the month, the amount in each sub-pool will be divided by the payments made by the MCOs to the defined safety-net provider class for qualifying services adjudicated in the month. This calculation will determine the amount of the uniform percentage add-on for the month. The additional payments will be sent to the safety-net providers in the following month. It is anticipated that payments will be made on the following schedule:

- May 2020 payment: based on September 2019 to March 2019 encounters
- June 2020 payment: based on April 2020 encounters
- July 2020 payment: based on May 2020 encounters
- August 2020 payment: based on June 2020 encounters

Every add-on payment will be directly tied to a qualifying paid encounter, and include the ability to tie each payment to a specific service provided to a specific beneficiary through the data consistent with the managed care rule. As warranted to account for changes in the provider environment, CMS has advised that DHHS may amend its directed payment request.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 6

Elements Supporting CMS Approval

The CMS requirement for a directed payment approval under the COVID-19 parameters is to require implementation of a risk corridor for the September 2019 through June 2020 contract period to address the uncertainty of future medical costs given the COVID-19 pandemic.

In addition, as recommended in CMS guidance documents, additional administrative changes include:

1. For the September 2019 to June 2020 contract year, DHHS shall waive the quality withhold provisions of the Agreement due to the impact of the COVID-19 pandemic.
2. For the May 1, 2020 to June 30, 2020 time period, DHHS shall modify the auto-assignment algorithm to incorporate equal auto-assignment among the three MCOs due to atypical enrollment increase.

Should the Governor and Executive Council not authorize this request beneficiary access and provider stability of safety-net providers will be at greater risk.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to retroactively amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schraffts City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, and by increasing the shared price limitation by \$18,750,925 from \$797,814,164 to an amount not to exceed \$816,565,089, in State Fiscal Year 2020, retroactive to September 1, 2019 with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval.

Funds for Granite Advantage Health Program are 93% Federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020 (as defined in RSA 126-AA:3, 1); funds for the Child Health Insurance Program are 77.6% Federal and 22.4% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal, 22.7% General and 26.3% Other funds.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9).

Funds are available in the following accounts for State Fiscal Year 2020 and are anticipated to be available in the State Fiscal Years 2021 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align with the state budget process is included in the explanation below. For these reasons, expenditures for the program are identified only for State Fiscal Year 2020.

EXPLANATION

This request is retroactive because of the delay in adopting a biennial budget and the need to update the capitated rates to reflect the various provisions of the budget that are incorporated into the Medicaid Care Management Program.

The amendment to the three (3) Medicaid Care Management (MCM) capitated and risk-based Agreements, including adjustments for September 2019 to June 2020 capitation rates for the MCOs and Exhibit A narrative contract changes, reflect the following changes:¹

Minimum Durable Medical Equipment (DME) fee schedule: Effective January 1, 2020, DHHS shall implement a minimum fee schedule DME services. The estimated impact of this change is approximately \$3.2 million over the January 2019 through June 2020 period.

Psychiatric boarding services: To improve continuity of care for mentally ill MCM members, DHHS shall fund psychiatric consultation services for individual in a psychiatric boarding situation. These services shall be effective March 1, 2020. The estimated impact of this change is approximately \$0.1 million over the March 2020 through June 2020 period.

Fee schedule updates: In accordance with annual CMS updates, reimbursement adjustments reflect the State Fiscal Year 2020 Federally Qualified Health Center (FQHC) encounter rates and the October 2019 (Diagnosis-Related Group) DRG rates.

Boston Children's Hospital (BCH) service funding: Funding for inpatient and outpatient BCH services shall reflect recent expenditure patterns prompting implementation of a risk pool in order to better allocate funds. As a result, claims incurred at the facility shall be excluded from stop-loss protections to avoid unintended interactions between the MCM Program's risk pool and stop-loss risk protection features. The estimated impact of this change is approximately \$1.4 million over the September 2019 through June 2020 period.

Non-Emergency Medical Transportation (NEMT) and Community Mental Health Center (CMHC) service costs: Increases in the Non-Medically Frail population's service costs for NEMT and CMHC costs for the January 2019 to June 2019 period warrant an increase to the base period data. The estimated impact of this change is approximately \$3.1 million over the September 2019 through June 2020 period.

MCO supplemental pharmacy rebates: Review of rebate eligible therapeutic classes revealed current spending did not support the preliminary 0.5% supplemental pharmacy rebate assumption; therefore, the rebate assumption is reduced from 0.5% to 0.1%.

Medically frail acuity adjustment: Review of emerging medical loss ratio (MLR) experience for the Medically Frail population indicated a likely difference in member health acuity between the base data period and emerging experience warrants adjustment to the base period data. The estimated impact of this change is approximately \$7.9 million over the September 2019 through June 2020 period.

Medicaid provider rate increases: House Bill 4, Section 348, of the 2019 NH Regular Legislative Session, directs increases to most Medicaid provider rates (excluding prescription drugs, designated receiving facility (DRF), and substance use disorder (SUD) residential treatment services), including State Plan Services and Waiver Programs by 3.1% effective

¹ Federal law requires managed care rates be reviewed no less frequently than a 12-month period. The Department aligns this process with the State Fiscal Year. The certified rate established for the program reflected in this contract is within the Department's budget for State Fiscal Year 2020. As in the past, the Department and Milliman will work with the legislature through the budget process to ensure the program is funded consistent with the budget.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 5

January 1, 2020, and an additional 3.1% effective January 1, 2021. The estimated impact of this change is approximately \$9.6 million over the January 2020 through June 2020 period.

Designated Receiving Facility (Involuntary) beds and rate increases: House Bill 4, Section 356, of the 2019 NH Regular Legislative Session, authorizes 8 to 10 new DRF beds, and increases the diagnosis related group (DRG) base rate reimbursement for all existing and newly established DRF beds when certain conditions are met. The new rates and additional beds are targeted for implementation on January 1, 2020. The estimated impact of the change is approximately \$2.2 million for the January 2020 through June 2020 period.

Mobile crisis team (MCT): Senate Bill 11, of the 2019 NH Regular Legislative Session, directs DHHS to create a new adult MCT to supplement those already in place. The new MCT is targeted for implementation on April 1, 2020. The estimated impact of this change is \$0.3 million over the April 2020 through June 2020 period.

The rate adjustments for all of the above program changes are for the ten month capitation rate period for Standard Medicaid and NH Granite Advantage Health Care Program for the September 2019 through June 2020 period with comparison to the previously approved rates are described in Table 1 below. The adjustment period is only 10 months because the prior contract was extended by two months to help effectuate the transition period for the new MCO and the new contract, which was approved by the Executive Council for a September 1, 2019 start date. The Department's actuary, Milliman, has certified a rate that is actuarially sound for this program.

In addition, Exhibit A narrative contract changes include:

1. Amendment #1 edits carried forward, with adjustments as needed.
2. Transitional housing program services and community residential services: Coverage for these supportive services has been adjusted to reflect a July 1, 2020 start date to correspond with related Request for Proposals activities.
3. Provider payment: Clarifications to provider payments are dependent upon New Hampshire Medicaid fee schedules.
4. Drug Utilization Review (DUR) program: Inclusion of contract provisions to address new federal compliance requirements for the MCM Program's DUR program.
5. Technical corrections: Technical corrections include edits to pharmacy encounter date submission timeframes.
6. Zolgensma: Addition of gene therapy medication, Zolgensma, as a drug covered by New Hampshire Medicaid effective September 1, 2019 due to its extremely high cost and low incidence rate, which makes cost for the treatment difficult to predict for inclusion in MCM capitation rates, including related risk protection processes.
7. Hepatitis C medications: With stabilization of treatment demand, Hepatitis C prescription drugs are carved into the program starting September 2019.
8. Downside risk mitigation: Inclusion of a downside risk mitigation process for the Granite Advantage Health Care Program (GAHCP) Medically Frail and Non-Medically Frail populations for the September 2019 through June 2020 period.
9. Local Care Management: The contract reflects a terminology change, "Local Care Management Network(s)", to better reflect the nature of the program's local care management model.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 93% federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020; funds for the Child Health Insurance Program are 77.6% federal as appropriated by Congress and 22.4% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal as appropriated by Congress, 22.7% General and 26.3% Other funds.

In the event that Federal funds become no longer available or are decreased below the 93% level for calendar year 2019 or 90% level for calendar year 2020, for the Granite Advantage Health Program, sums necessary to cover a projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

EXPLANATION

The purpose of this request is to amend the three (3) Medicaid Care Management (MCM) capitated, and risk-based Agreements by changing the program start date from July 1, 2019 to September 1, 2019. The amendment is necessary to provide a sufficient readiness ramp up period for the Department and the Contractors known as the Managed Care Organizations (MCOs) so the health care services to 180,000 eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, are implemented smoothly, and by decreasing the price limitation by (\$126,335,836) from \$924,150,000 to an amount not to exceed \$797,814,164 in State Fiscal Year 2020, September 2019-June 2020.

The proposed change in program start date, to a later date, was necessary to provide Governor and Executive Council sufficient time to review the new contracts, hold two informational hearings, and to allow the Department and the MCOs the needed time for readiness to occur for the new Agreements. These three (3) MCOs will serve approximately 180,000 members including pregnant women, children, parents/caretakers, non-elderly, non-disabled adults under the age of 65, and individuals who are aged, blind or disabled, among others, as described in the Medicaid Care Management (MCM) contracts. The MCOs will cover the acute care, behavioral health, and pharmacy services for all Members and work with the Department to address the crucial social determinants of health in accordance with the attached MCM contracts.

The MCOs will provide a person-centered, integrated, and comprehensive delivery system that offers a very substantial array of accessible Medicaid services, taking into account each Member's physical well-being, behavioral health (mental health and substance use disorders), and social circumstances. The Department will challenge its MCO partners to work responsively with the provider community and MCM Members to improve access to care and promote healthy behaviors. New Hampshire's MCM program will incentivize value over volume, enhance program efficiency, and hold MCOs accountable for demonstrable improvements in health outcomes.

Table One represents a ten-month year capitation rate for the Standard Medicaid and the NH Granite Advantage Health Care Program for the period September 2019 through June 2020 with a comparison to the SFY 2020 rates in the February 15, 2019 signed contracts approved by the Governor and Executive Council of March 27, 2019 (Tabled, 2/20/2019 Late item #A). This allows alignment with State of New Hampshire fiscal year through SFY 2024. The change to the completion date of August 31 2024 is requested to allow for the full 60-month contract that was specified in the request for proposals.

In the event that Federal funds become no longer available or are decreased below the 93% level for calendar year 2019 or 90% level for calendar year 2020, for the Granite Advantage Health Program, consistent with RSA 126-AA:3, no state general funds shall be deposited into the fund and medical services for this population would end consistent with RSA 126-AA:3, VI and the terms and conditions of the federal waiver issued by the Centers for Medicare and Medicaid Services.

EXPLANATION

The purpose of this request is to enter into capitated, risk-based Agreements to provide acute care and other medical services to eligible and enrolled Medicaid participants New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management. ~~These three (3) Vendors will serve approximately 180,000 members including pregnant women, children, parents/caretakers, non-elderly, non-disabled adults under the age of 65, and individuals who are aged, blind or disabled, among others, as described in the Medicaid Care Management (MCM) contracts. The Managed Care Organizations (MCOs) will cover the acute care, behavioral health, and pharmacy services for all Members and work with the Department of Health and Human Services (DHHS) to address the crucial social determinants of health in accordance with the attached MCM contracts.~~

The MCO Vendors will provide a person-centered, integrated, and comprehensive delivery system that offers a very substantial array of accessible Medicaid services, taking into account each Member's physical well-being, behavioral health (mental health and substance use disorders), and social circumstances. DHHS will challenge its MCO partners to work responsively with the provider community and MCM Members to improve access to care and promote healthy behaviors. New Hampshire's MCM program will incentivize value over volume, enhance program efficiency, and hold MCOs accountable for demonstrable improvements in health outcomes.

Two of the Vendors, Boston Medical Center Health Plan Inc., and Granite State Health Plan Inc., are respectively otherwise known as Well Sense Health Plan, and New Hampshire Healthy Families. The Department presently contracts with both of these Vendors to provide New Hampshire's Medicaid Care Management program.

His Excellency, Governor Christopher T. Sununu,
and the Honorable Council

I. Procurement Process

These contracts represent the culmination of the Department's first re-procurement of the MCM program since its commencement in December 2013. The Department's process for the development of the program reflected in the contracts and the contracts themselves represent a significant improvement over the prior procurement process and the program itself. The Department -- for the first time ever -- put out the Request for Proposals for public comment and held public information sessions in each of the Executive Council Districts last July in Concord, Keene, Manchester, Nashua, Littleton and Portsmouth before it was issued to potential respondents.

These three (3) Vendors were selected through a competitive bid process. A Request for Proposals RFP-2019-OMS-MANAG-02 was posted on the Department of Health and Human Services' web site from August 30, 2018 through October 31, 2018. A mandatory bidder's conference was held on September 7, 2018. In-person attendance at the Mandatory Bidder's Conference was a requirement to submit a proposal. The Department received four (4) proposals. The proposals were reviewed and scored by a team of individuals with program specific knowledge. The Bid Summary is attached.

II. Central Features of the New MCM Program

This procurement was also focused on improving the program for beneficiaries and providers and introducing many new features. The goals of the new MCM program are to

- Improve care of Members
- Improve health outcomes
- Reduce inpatient hospitalization and re-admissions
- Improve continuity of care across the full continuum of care
- Improve transition planning when care is completed
- Improve medication management
- Reduce unnecessary emergency services
- Decrease the total cost of care
- Increase member satisfaction
- Improve provider participation in the program

In order to help achieve these goals, the new contracts make many changes in the current program. These include the following:

- **Additional Care Coordination and Care Management** resources to provide significantly more beneficiary support to those in greater need, including providing it at a local level. MCOs must provide Care Management for at least 15% of high-risk/high-need members, and MCOs must conduct local care management or contract with a designated care management entity for at least 50% of high-risk/high-need members.
- **Behavioral Health (Mental Health and Substance Use Disorder)** provisions support integration of care with physical health, implementation of the Department's new 10-year Mental Health Plan, and advance SUD treatment. MCOs are required to take into account each person's physical health, behavioral health (mental health and substance use disorders), and social and economic needs. MCOs are required to work with Members, Providers, integrated delivery networks (IDNs), and community mental health

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

programs (CMHPs) to integrate physical health and behavioral health and address social determinants of health that affect health outcomes and the cost-effectiveness of care.

- **Emergency Room Waiting Measures** include the provision of additional clinical staff to support the provision of services in hospital emergency departments to reduce the need for Members to wait for inpatient services.
- **Support the Community Mental Health Centers and Substance Use Disorder Providers** by entering into capitated payment arrangements with Community Mental Health Programs and Providers, and reimburse substance use disorder providers at rates no less than the DHHS fee-for-service rates. MCOs must also contract with any willing peer recovery provider.
- **Alternative Payment Models (APMs)** provisions require MCOs to incentivize value over volume and significantly reduce current fee for service billing arrangements.
- **Community Engagement** specifies a role for the MCOs to support beneficiaries in fulfilling the Community Engagement requirement, including assisting their members with understanding qualifying activities and exemptions.
- **New Provider Supports** require MCOs to implement prompt and accessible credentialing and re-credentialing processes that will be used to conduct provider outreach and support; standardize work processes to ensure efficient implementation of the program and minimal provider burden relative to claims billing processes, reporting, and prior authorizations; meet prompt payment requirements and pay claims based on the effective date of the Current Procedural Terminology code, and establish a provider grievance and appeals process.

- **Pharmacy Counselling and Management** are strengthened to help improve the safety and therapeutic benefits to beneficiaries and the economy of the program.
- **Beneficiary Choice and Competition** is increased by providing Medicaid beneficiaries with three high-quality MCOs from which to choose.

- **Incentives and opportunities for beneficiaries to participate in healthy behaviors** must be provided by MCOs to improve individual health.
- **Cost transparency** through reference based pricing and incentives to beneficiaries.
- **Accountability for results** is increasing because a share of payment to MCOs will be directly linked to their performance, ensuring accountability for results, particularly in high priority areas such as addressing substance use disorders, integrating physical and behavioral health, providing robust care management, and reducing unnecessary use of high-cost services.
- **Public Reporting** is an added contract element. Each selected MCO will be responsible for submitting an annual report to the Governor and the legislature reporting on how the MCO has addressed State priorities for the MCM Program, including those specified in RSA 126-AA and in other State statute, policies, and guidelines; what innovative programs it has established; how it is addressing social determinants of health of its members, and how it is improving the population health of the state and other key metrics of the program.
- **Heighten program compliance and integrity provisions** have been added that allow for liquidated damages to be applied to the MCOs around contractual performance; provisions that incent MCO performance around collections for third party liability and coordination of benefits; and general fraud waste and abuse.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 6

- **Medical Loss Ratio** is specified in the contract at a minimum amount of 85% that must be spent on service delivery to beneficiaries, any amount less is to be rebated back to the Program.

iii. Rate-making and Budget

The Department's actuary, Milliman, has certified a rate that is actuarially sound for this program. These rates are reflected in Table I below:

Table I New Hampshire Department of Health and Human Services SFY 2020 Capitation Rate Change Based on Projected SFY 2020 MCO Enrollment by Rate Cell			
Population	January 2019 to June 2019 Capitation Rate	SFY 2020 Capitation Rate	Percentage Change
Standard Medicaid			
Base Population	\$303.54	\$315.15	3.8%
CHIP*	188.36	196.71	4.4%
Behavioral Health Population	1,294.03	1,386.51	7.1%
Total Standard Medicaid	\$371.26	\$389.03	4.8%
Granite Advantage Health Care Program			
Medically Frail	\$993.36	\$1,025.07	3.2%
Non-Medically Frail	423.21	482.80	14.1%
Total GAHCP	\$532.03	\$586.30	10.2%
Total	\$416.29	\$444.28	6.7%

*The CHIP capitation rate is an average of the specific rate cells in which CHIP members are enrolled. We do not develop a CHIP specific capitation rate.

Federal law requires that managed care rates be reviewed no less frequently than a 12-month period. The Department aligns this process with the state fiscal year. Over the last several years, the rates have been reviewed and an amendment made to the MCM contracts in May or June for the fiscal year beginning on July 1st. In order to maintain actuarial soundness, the rates are also required to be reviewed in the event of significant program changes. For example, while the Department established rates for FY 2019 last spring, the Department was required to refresh and update the rates when the Medicaid expansion program was brought back into managed care on January 1, 2019 – in the middle of the state fiscal year.

This year, there are items in both the Governor's budget and in other legislation now pending that, if and when enacted, would require Milliman to revise the rates. Specifically, there are proposals to (i) raise the rates paid to community based designated receiving facilities, (ii) add transitional housing for persons who can be discharged from New Hampshire Hospital; (iii) add mobile crisis teams or other behavioral health crisis services. All of these

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 6 of 6

additional services will have to be incorporated into the capitated rates for the managed care program consistent with their effective dates.

As a result, the Department anticipates that following the end of the legislative session, Milliman will review all program changes and any other relevant information, and adjust the rates as necessary. The Department would expect to bring an amendment to the contract in the September or October time frame for this purpose.

The certified rate established for the program that is reflected in this contract is within the Department's budget for state fiscal year 2020. Even though that the rates have been increased, a decline in the number of persons enrolled in Medicaid and a decline in the acuity of the population that has reduced expenditures in certain of the highest rate cells accounts for a reduction of total expenditure in the program within the current budget. As we have in the past, the Department and Milliman will work with the legislature in the budget process to ensure that the program is funded consistent with the budget.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 93% Federal as appropriated by Congress and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020; funds for the Child Health Insurance Program are 79.4% Federal as appropriated by Congress and 20.6% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal as appropriated by Congress, 24.3% General and 24.7% Other funds.

In the event that Federal funds become no longer available or are decreased below the 93% level for calendar year 2019 or 90% level for calendar year 2020, for the Granite Advantage Health Program, consistent with RSA 126-AA:3, no state general funds shall be deposited into the fund and medical services for this population would end consistent with RSA 126-AA:3, VI and the terms and conditions of the federal waiver issued by the Centers for Medicare and Medicaid Services

Respectfully submitted,

Jeffrey A. Meyers
Commissioner

4.14 Alternative Payment Models

4.14.1 As required by the special terms and conditions of The NH Building Capacity for Transformation waiver, NH is implementing a strategy to expand use of APMs that promote the goals of the Medicaid program to provide the right care at the right time, and in the right place through the delivery of high-quality, cost-effective care for the whole person, and in a manner that is transparent to DHHS, Providers, and the stakeholder community.

4.14.2 In developing and refining its APM strategy, DHHS relies on the framework established by the Health Care Payment Learning and Action Network APM framework (or the "HCP-LAN APM framework") in order to:

4.14.2.1 Clearly and effectively communicate DHHS requirements through use of the defined categories established by HCP-LAN;

4.14.2.2 Encourage the MCO to align MCM APM offerings to other payers' APM initiatives to minimize Provider burden; and

4.14.2.3 Provide an established framework for monitoring MCO performance on APMs.

4.14.3 Prior to and/or over the course of the Term of this Agreement, DHHS shall develop the DHHS Medicaid APM Strategy, which may result in additional guidance, templates, worksheets and other materials that elucidate the requirements to which the MCO is subject under this Agreement.

4.14.4 Within the guidance parameters established and issued by DHHS and subject to DHHS approval, the MCO shall have flexibility to design Qualifying APMs (as defined in Section 4.14 of this Agreement) consistent with the DHHS Medicaid APM strategy and in conformance with CMS guidance.

4.14.5 The MCO shall support DHHS in developing the DHHS Medicaid APM Strategy through participation in stakeholder meetings and planning efforts, providing all required and otherwise requested information related to APMs, sharing data and analysis, and other activities as specified by DHHS.

4.14.6 For any APMs that direct the MCO's expenditures under 42 CFR 438.6(c)(1)(i) or (ii), the MCO and DHHS shall ensure that it:

4.14.6.1 Makes participation in the APM available, using the same terms of performance, to a class of Providers providing services under the contract related to the reform or improvement initiative;

4.14.6.2 Uses a common set of performance measures across all the Providers;

4.14.6.3 Does not set the amount or frequency of the expenditures; and

4.14.6.4 Does not permit DHHS to recoup any unspent funds allocated for these arrangements from the MCO. [42 CFR 438.6(c)]

4.14.7 Required Use of Alternative Payment Models Consistent with the New Hampshire Building Capacity for Transformation Waiver

4.14.7.1 Consistent with the requirements set forth in the special terms and conditions of NH's Building Capacity for Transformation waiver, the MCO shall ensure through its APM Implementation Plan (as described in Section 4.14) that fifty percent (50%) of all MCO medical expenditures are in Qualifying APMs, as defined by DHHS, within the first twelve (12) months of this Agreement, subject to the following exceptions:

4.14.7.1.1 If the MCO is newly participating in the MCM program as of the Program Start Date, the MCO shall have eighteen (18) months to meet this requirement; and

4.14.7.1.2 If the MCO determines that circumstances materially inhibit its ability to meet the APM implementation requirement, the MCO shall detail to DHHS in its proposed APM Implementation Plan an extension request: the reasons for its inability to meet the requirements of this section and any additional information required by DHHS.

4.14.7.1.2.1. If approved by DHHS, the MCO may use its alternative approach, but only for the period of time requested and approved by DHHS, which is not to exceed an additional six (6) months after the initial 18 month period.

4.14.7.1.2.2. For failure to meet this requirement, DHHS reserves the right to issue remedies as described in Section 5.5.2 (Liquidated Damages) and Exhibit N, Section 3.2 (Liquidated Damages Matrix).

4.14.7.2 MCO Incentives and Penalties for APM Implementation

4.14.7.2.1 Consistent with RSA 126-AA, the MCO shall include, through APMs and other means, Provider alignment incentives to leverage the combined DHHS, MCO, and providers to achieve the purpose of the incentives.

4.14.7.2.2 MCOs shall be subject to incentives, at DHHS' sole discretion, and/or penalties to achieve improved performance, including preferential auto-assignment of new members, use of the MCM Withhold and Incentive Program (including the shared incentive pool), and other incentives.

5.3.4.7 If any government entity, either from restitutions, recoveries, penalties or fines imposed following a criminal prosecution or guilty plea, or through a civil settlement or judgment, or any other form of civil action, receives a monetary recovery from any entity or individual, the entirety of such monetary recovery belongs exclusively to the State, and the MCO and any involved Subcontractor have no claim to any portion of such recovery.

6.2.12.1.2 [Amendment #2:] Each unscored member shall be assigned a demographic-only risk weight instead of receiving the average risk score for each MCO's scored members in the same rate cell. The risk adjustment methodology shall also incorporate a specific adjustment to address cost and acuity differences between the scored and unscored populations, which shall be documented by a thorough review of historical data for those populations based on generally accepted actuarial techniques.

6.12.1.1 [Amendment #3:] The MCO capitation rates reflect a target medical loss ratio (MLR) which measures the projected medical service costs as a percentage of the total MCO capitation rates. The risk corridor would limit MCO gains and losses if the actual MLR is different than the target MLR.

6.12.1.2 [Amendment #3:] The MCM program target MLR for at-risk services is 89.6% for Standard Medicaid and 88.7% for GAHCP based on the September 2019 to June 2020 projected enrollment distribution. Target MLRs will be calculated separately for each MCO based on their actual enrollment mix by rate cell.

6.12.1.6 [Amendment #3:] The numerator of each MCO's actual MLR will include all payments made to providers, such as fee-for-service payments, subcapitation payments, incentive payments, and settlement payments.

The 85% minimum MLR provision is adjudicated using federal MLR reporting rules, which produce a different MLR than the MLR calculated for risk corridor settlement purposes.

6.12.1.9 [Amendment #3:] The timing of the risk corridor settlement will occur after the contract year is closed and substantial paid claims runout is available.

6.12.2 [Amendment #4:] Subject to CMS approval, DHHS shall implement a risk corridor as described in Table 1, for the July 2020 to June 2021 (SFY 2021) contract period to address the uncertainty of future medical costs given the COVID-19 pandemic.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$1,209,229,580 from \$4,718,828,874 to \$5,928,058,454 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and effective July 1, 2023, subject to Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 67.47% of the price limitation increase, the other non-federal fund share is 15.69%, and the general fund is 16.84% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	65.4%	1.4%	33.2%
Standard Medicaid Population (Medicaid Care Management)	50.9%	22.6%	26.5%

NOTE New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points through September 2023; and 1.5 percentage points through December 2023).

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 7

amended on December 08, 2021 (Item #6-1), as amended on June 15, 2022 (Item # Tabled Item 20A), and as amended on December 21, 2022 (Item #13A).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2024 and 2025, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments; however, the Department has received authorization from CMS for the 14-month rating period and related costs in these Amendment #10 contracts given the end of the MCOs' contract terms scheduled to expire August 31, 2024. During typical rating cycles, rates are updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2024 and two months of SFY2025.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request covers the rating period of July 1, 2023 through August 31, 2024. The methodology used to develop the previous Amendment #9 SFY 2023 capitation rates is largely consistent with the capitation rate methodology in this Amendment #10.

With the end of Continuous Coverage as of March 31, 2023 and the federal Public Health Emergency (PHE) on May 11, 2023, the full 6.2% enhanced Federal Medical Assistance Percentage (FMAP) received under the Families First Coronavirus Response Act available to states like New Hampshire has ended as of March 31, 2023. New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points April through September 2023; and 1.5 percentage points October through December 2023.

Coinciding with the end of continuous coverage, enrollment is expected to be lower in the 14-month rating period compared to SFY 2023. As of March 31, 2023 just over 103,000 enrollees were protected from redeterminations of eligibility due to continuous enrollment coverage. Full regular eligibility operations commenced effective April 1, 2023. As of May 29, 2021 Medicaid enrollment stood at 210,074, down from the peak of 251,357 at the end of March 2023.

For Amendment #10 relative to the rates, key changes include:

1. The Rate Year (RY) 2024 MCM capitation rates cover the July 1, 2023 through August 31, 2024 period to accommodate the start of a new MCO contract that will be effective September 1, 2024.
2. Capitation rates include a preliminary acuity adjustment increase due to the enrollment mix changes based on the Department's unwind process, and will be updated in Amendment #11 capitation rates based on experience. Specifically, a greater number of lower acuity individuals are expected to become ineligible as compared to higher acuity people. The Department anticipates about 80% of Medicaid protected enrollees will have gone through the redetermination unwind process by October 1, 2023.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 7

3. The increase cited above in the capitation rate is, however, offset entirely by the updated base encounter data in Standard Medicaid and GAHCP. Specifically, the transition from CY 2019 to SFY 2022 MCO encounter base experience data, and inclusion of non-CMHC encounter data for the GAHCP population enrolled in a behavioral health rate cell, so as not to reduce funding supporting CMHC workforce availability and beneficiary access.
4. The RY 2024 capitation rates include directed payments to community mental health centers (CMHCs), critical access hospitals (CAHs), state-owned hospitals for professional psychiatric services, and children's hospitals (subject to CMS approval); these amounts are included in the MCO capitation rates. MCOs are not at-risk for the amount of these directed payments. Per member cost increases outlined in Table 2 for the directed payment to CAHs is largely a function of the pool of dollars spread over the lower enrollment expected in RY 2024.
5. An overall 7.7% administrative cost allowance for the Standard Medicaid population, an increase by 0.1% from Amendment #9, and 8.6% for the GAHCP population; an increase of 0.2%; however, the total spending for administrative costs is projected to decline from \$8.7 million a month in SFY 2023 to \$6.8 million a month in RY 2024 under this amendment.
6. In RY 2024, the MCOs' targeted medical loss ratio (MLR) for at-risk services of 90.8% for the Standard Medicaid population and 89.9% for the GAHCP population are based on projected enrollment distribution for the rating period; a 1.5% risk margin is applied as a percentage of revenue prior to the directed payments and the 2% premium tax allowance; and includes a continuation of the risk corridor.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. The current GAHCP is subject to a reauthorization as of December 31, 2023. Both the House and Senate have legislation to reauthorize, though for different lengths of time.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into Retroactive amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$245,113,188 from \$4,473,715,686 to \$4,718,828,874 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and effective retroactive to July 1, 2022, upon Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 81% of the price limitation increase, the other non-federal fund share is 12%, and the general fund is 7% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 128-AA:3, I)	0%
Child Health Insurance Program (CHIP)	69.34%	1.07%	29.59%
Standard Medicaid Population (Medicaid Care Management)	53.6%	22.4%	24.00%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #8), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

amended on December 08, 2021 (Item #6-1), and as amended on June 15, 2022 (Item # Tabled Item 20A).

Funds are available in the accounts outlined in the attached fiscal details and are available in the State Fiscal Year (SFY) 2023, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is Retroactive because it covers the rating period of July 1, 2022 through June 30, 2023. The methodology used to develop the previous Amendment #8 SFY 2023 capitation rates is largely consistent with the capitation rate methodology in this Amendment #9.

The federal Public Health Emergency (PHE) continues to have an impact on program costs. In order for states to receive the 6.2% enhanced Federal Medical Assistance Percentage (FMAP) the Families First Coronavirus Response Act requires continuous enrollment by states for individuals who were or became Medicaid eligible since March 13, 2020 through at least April 2023. The PHE end date was not noticed on November 12, 2022, so an end of the PHE in January is off the table unless there is Congressional intervention. The PHE, therefore, is likely to run through April 2023.

As of the beginning of December, the NH Medicaid program has 100,481 individuals protected from disenrollment due to continuous enrollment, out of an enrollment of over 246,616 as of December 5, 2022. Absent the continuous enrollment requirement, as of November 30, 2022, more than 29,000 people are known to be ineligible based on completed redeterminations of eligibility (or nearly 12% of current enrollees). Another nearly 35,000 individuals are potentially ineligible since they have not yet completed an annual redetermination of eligibility, which is not required during the PHE. Over 36,000 are both overdue in completing a redetermination and potentially ineligible based on yet to be verified information available to DHHS. Any material disenrollment is unlikely in this rate year, and is likely to begin no earlier than May 1, 2023.

While the State continues to receive 6.2% enhanced FMAP on certain Medicaid expenditures, the enhanced federal payment excludes the NH Granite Advantage Health Care Program at 90% FMAP already, and where enrollment growth for NH has been the greatest both on a percentage (81.6%), and an absolute enrollment growth basis (41,924) since mid-March 2020. For Amendment #9 relative to the rates:

1. An end of year retroactive non-budget neutral rate adjustment based on actual enrollment was not actuarially made by the State's actuary, as the acuity impact is very likely de minimis.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 6

2. Rates are calibrated to reflect a PHE end date in April 2023. Once ended, beneficiaries whose eligibility determination shows they no longer meet eligibility criteria will be disenrolled from Medicaid as Federal guidance permits. In order to minimize gaps in healthcare coverage, DHHS, the MCOs, providers and other stakeholders are working to engage beneficiaries. The disenrollment activity is expected to reduce program membership and related costs over the course of the unwind enrollment period.
3. The rates per person aggregate modestly decrease, while the price limitation has increased to reflect the much higher than anticipated enrollment related to the PHE continuing. Generally, states anticipate that when the PHE disenrollment commences, the premiums will rise per person, but the number of people enrolled will decline. Over time, this will lead to lower contract price limitations due to declining enrollment. The enrollment decline and related cost-savings will be realized from exiting individuals who generally have lower illness burden and lower healthcare costs.
4. Tables 1A and 1B in the Appendix depict monthly capitation rates, by major population eligibility groups, and the percent change from the prior Amendment. The rates in Table 1A exclude directed payments which are fixed costs, while Table 1B includes the fixed costs. The price limitation change is calculated off of the Table 1B capitation rates. The rates in the aggregate decline favorably by 0.7% for standard and 2.4% for the GAHCP. Taken together, standard and GAHCP capitation rates decline favorably by 1.5%.
5. Table 2 lays out the capitation rate change components. The top half of the chart shows program changes that increased costs unfavorably by \$7.15 million. The two largest changes are related to legislation enacted into law in the recent legislative session to improve birthing services and ambulance rates. The third largest captures professional billing for Medicaid at state-owned psychiatric facilities. The bottom half of the chart reflects the actuarial rating adjustments that lowered costs by \$27.56 million. The three largest changes are an acuity adjustment, fixed costs that do not increase with the increase in enrollment, and staffed bed constraints in psychiatric capacity.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$1,127,921,908 from \$3,345,793,778 to \$4,473,715,686, with no change to the completion date of August 31, 2024, and effective July 1, 2022, upon Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	66.1%	1.6%	32.3%
Standard Medicaid Population (Medicaid Care Management)	52.7%	22.2%	25.1%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

(Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), and as amended on December 08, 2021 (Item #6-1).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2023, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request covers the rating period of July 1, 2022, through June 30, 2023. There are three key purposes for this amendment. They are:

1. Amendment #8 Target Medical Loss Ratio, Administrative Allowance, and Rates

- The Department's actuary projects an overall MCO medical loss ratio (MLR) for at-risk services of 90.8% for the Standard Medicaid population and 90.1% for the GAHCP population in SFY 2023, which includes the rate development highlights below.
 - An overall 7.7% administrative cost allowance for the Standard Medicaid population, and 8.4% for the GAHCP population; representing a reduction in percentages from SFY 2022 as funding remains consistent with the current contract period.
 - A 1.5% risk margin applied as a percentage of revenue prior to the directed payments and the 2.0% premium tax allowance.
 - The composite capitation rates shown are based on DHHS projections of MCO enrollment for SFY 2023, which include considerations for the unwind process following the end of the Public Health Emergency (PHE) with enrollment returning to near pre-PHE levels by March 2023. It is likely in the future Amendment #9 that enrollment will need to be recalibrated if the federal government continues to extend the federal PHE.
- Included in the Appendix to this letter:
 - Table 1A shows the rate impact excluding directed payments, as well as with and without the SMI/SED (Severely Mentally Ill/Severely Emotionally Disturbed) 1115 waiver amendment to the Substance Use Disorder Treatment and Recovery Access (SUD-TRA) Demonstration at 3.8% to the total composite rate.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 8

- o Table 1B takes into account directed payments and reflects a change of 1.8%.
- o Table 2 shows the component changes leading to the 1.8% increase in composite rate.
- o The price limitation is \$168,631,814 less than SFY 2022 (prior to any legislation enacted after the contract date).

2. Risk Mitigation Structure

- Retrospective acuity adjustment due to the uncertainty surrounding the continuous membership unwind process following the end of the PHE as authorized by the Center for Medicare and Medicaid Services (CMS) Division of Managed Care Policy on May 11, 2022. The purpose is to appropriately account for this uncertainty; DHHS will implement a non-budget neutral retroactive acuity adjustment to include a preliminary acuity assumption that will be updated following the contract year to reflect the actual population covered throughout SFY 2023; the preliminary risk adjustment for the expected enrollment composition changes the amount to an \$11.9 million increase.

- Minimum and maximum medical loss ratio (MLR) remains in effect for SFY 2023, to protect against a windfall or underfunding of services within the Program.

The minimum MLR is set on a program-wide basis for each major population, such that maximum profit achievable is 4%, which is equal to the 1.5% target margin plus the amount between the target MLR and the minimum MLR (2.5%). Based on the target MLRs, the minimum MLR will be 88.3% for the Standard Medicaid population and 87.6% for the GAHCP population.

The maximum MLR is also set on a program-wide basis for each major population 3.5% above the target MLR, such that MCOs will have a maximum loss of 2.0%. Based on the target MLRs the maximum MLR will be 94.3% for the Standard Medicaid population and 93.6% for the GAHCP population.

The final minimum and maximum MLRs for Standard Medicaid and GAHCP will be updated for the final retroactive acuity factor and any other changes implemented covering the amendment period starting January 2023.

- Other existing adjustment factors risk-neutral to the State continue in the Program. The risk mitigation structure is consistent with the structure included in the SFY 2022 capitation rates with the one modification to include a retrospective acuity adjustment that addresses uncertainty caused by the end of the PHE.
- On page 9 of the 2022-2023 Medicaid Managed Care Rate Development Guide, "CMS recommends all states implement a 2-sided risk mitigation strategy for rating periods impacted by the Public Health Emergency." Due to population and cost uncertainty related to the ongoing PHE and the anticipated enrollment redetermination process.

3. Other Program Rate Adjustments

- SFY 2023 component changes in Table 2 (see Appendix) are expressed relative to the same components in the SFY 2022 rates.
- Incorporation of the Institution for Mental Disease (IMD) SMI/SED Waiver effective July 1, 2022 (pending CMS approval), DHHS will implement its SMI/SED (Severely

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 8

Mentally Ill/Severely Emotionally Disturbed) 1115 waiver amendment to the Substance Use Disorder Treatment and Recovery Access (SUD-TRA) Demonstration.

The waiver amendment allows DHHS to claim additional federal matching funds for Medicaid enrollees aged 21 through 64 years treated in an Institution for Mental Disease (IMD), including at New Hampshire Hospital and Hampstead Hospital for lengths-of-stay greater than 15 days and no more than 60 days for an individual (the average length-of-stay for all beneficiaries cannot exceed 30 days).

- Medical trend adjustment since the start of the COVID-19 pandemic and PHE, service utilization levels in the Medicaid program have lagged behind CY 2019 utilization by rate cell and on an aggregate basis; therefore, capitation rates assume SFY 2023 utilization levels will be consistent with CY 2019. As such, utilization trends from CY 2019 to SFY 2023 remain constant with the exception of Applied Behavioral Analysis (ABA) services with an annual trend rate from CY 2019 to SFY 2023 at 21.7%. ABA services are an evidence-based consultation, assessment and treatment option for children with autism spectrum disorder or other developmental conditions that can improve social, communication, and learning skills.
- Preliminary acuity adjustment is an increase because it reduces costs by a lower amount in SFY 2023 than SFY 2022 largely due to the current estimate of enrollment timing and trajectory during the PHE unwind.
- Pharmacy trend and savings. The pharmacy trend assumptions in Table 2 are based on a combination of historical New Hampshire Medicaid data analysis, Milliman's research on utilization and cost trends, and publicly available trend reports and forecasts.

Pharmacy savings were shown in the preferred drug list (PDL) analysis. The pharmacy savings analysis undertaken for this amendment included savings related to adjustments for prescribing efficiency opportunities for several drug classes related to asthma, HIV, and autoimmune disorders. The savings amounted to \$907,740 for the rating period, though the savings were less than SFY 2022 resulting in a cost increase for this line item. Lastly, the J-code class of injectable drugs reflects market trends.

- Opioid addiction treatment trend adjustment to the base experience data underlying the MCM capitation rates to account for the estimated change in both prevalence and cost of treatment for the opioid addiction treatment population. Based on the Actuary's review of SFY 2015 through October 2021 MCO encounter data, they determined the proportion of opioid addiction population started to decrease for several rate cells. This decrease in the proportion of opioid addiction population results in adjustments of less than 1.00 for several rate cells.
- Directed payment adjustment to remove the completed SFY 2022 HCBS (Home and Community Based Service) payments related to time limited American Rescue Plan enhanced FMAP for HCBS.
- Funding for 14 additional Community Residential Beds coming into service. Expanded services to fund an additional 14-bed community residential services at roughly \$958,000 (including administration, premium tax and margin).

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 8

- Reimbursement adjustments to reflect recent or expected changes in the Medicaid Fee-for-Service (FFS) provider fee schedule based on Medicare Fee Schedule changes including:
 - Current Ambulatory Surgical Center fee schedule effective January 1, 2022;
 - Professional and other services fee schedules effective January 1, 2022; and
 - J-code repricing effective July 1, 2022, and other routine fee schedule updates.
- Other adjustments included in the rate change driver table (Table 2) for the SFY 2023 rates:
 - Base data update (e.g., lower/higher incurred but not reported (IBNR) expenses than previously estimated);
 - Enrollment projection impact on fixed dollar items (e.g., Community Mental Health Agreement funding);
 - Changes in FFS fee schedule from SFY 2022 to SFY 2023;
 - Refreshed financial data items from the MCOs (e.g., provider incentive payments);
 - Changes in enrollment information (e.g., retroactive change in rate cell assignment);
 - Changes in stop loss attachment point for high-cost member claims; and
 - Changes in program effective dates (e.g., Behavioral Health Crisis Treatment Centers (BHCTC), genetic testing)

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. In the event the contract is not approved before June 30, 2022, the available federally permitted retroactive risk adjustment mitigation to account for the uncertainty of the PHE unwind will not be available to New Hampshire.

His Excellency, Governor Christopher T. Sununu
 and the Honorable Council
 State House
 Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$107,893,151 from \$3,237,900,627 to \$3,345,793,778, with no change to the completion date of August 31, 2024, and effective retroactive to July 1, 2021 upon Governor and Council approval. Funding sources are as follows:

	Federal	Other	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	67.40%	0%	32.60%
Standard Medicaid Population (Medicaid Care Management)	53.57%	0%	46.43%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. Additionally, the American Rescue Plan of 2021 potentially provides an additional 10% FMAP for a one year period (April 1, 2021-March 31, 2022) for certain home and community based services (HCBS) covered in this contract based on an approved Centers for Medicare and Medicaid Services (CMS) HCBS spending plan. The Department will request Fiscal Committee approval to accept and expend additional amounts for January 2022 forward. The adjusted price limitation, given the enhanced FMAP and provisions in HB 2, should be sufficient to stay within the budget for SFY 2022. Legislation under consideration by Congress could impact the CHIP and Standard Federal share amounts.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 4

(Item #6), January 22, 2021 (Item #9), and as amended on June 30, 2021 (Item # Tabled Item 8A).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY)2022, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2022.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is **Retroactive** because it covers the rating period of July 1, 2021, through June 30, 2022. There are three key purposes for this amendment:

- First, is to incorporate the impact of acuity (i.e., the measure of beneficiaries' collective medical conditions) due to an increase in new enrollment as the result of an extended federal public health emergency and extended continuous enrollment. Generally, there has been a decrease in acuity that moderates claims expense costs compared to the rates approved under Amendment #6;
- Second, is to incorporate the increased costs of legislative changes from both federal legislation and state actions in the most recent legislative session; and
- Third, is to incorporate fee schedule updates, and an adjustment for pharmacy management.

Further Explanation

Amendment #7 adjusts the SFY 2022 capitation rates. The Department's contracted actuary, Milliman, projects an overall MCO medical loss ratio (MLR) for at-risk services of 90.7% for the Standard Medicaid population and 90.0% for the GAHCP population in SFY 2022, which includes the rate development highlights below.

Milliman used the following methodology to develop the New Hampshire MCM program capitation rates:

1. Rate methodology

The methodology used to develop the Amendment #7 SFY 2022 MCM capitation rates is consistent with the Amendment #6 capitation rate methodology.

2. Changes in enrollment

CMS instructed the Department to review emerging enrollment and Public Health Emergency (PHE) conditions for Amendment #7. The updated capitation rates are based

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 4

on the Department's updated projections of MCO enrollment for SFY 2022 which include continued enrollment growth through SFY 2022.

3. Acuity adjustment

For the Amendment #7 SFY 2022 MCM capitation rates, Milliman updated the acuity adjustment factors taking into account the nature of the new enrollment compared to historical enrolled individuals.

4. Federal and State Legislative actions

a. Home and community based services (HCBS) enhanced federal funding

HCBS directed payments available under Section 9817 of the American Rescue Plan Act (ARPA) provide enhanced federal funding for state Medicaid spending on home and community based services. Beginning April 1, 2021, through March 31, 2022, states are eligible to receive a ten (10) percentage point increase in their FMAP for specified HCBS services. In order to claim the enhanced FMAP eligible under the MCO contracts, the Department is proposing to implement a new directed payment initiative estimated at \$28 million for certain eligible HCBS state plan services (pending CMS approval). Rates for directed payments do not include an additional allowance for administrative expense or risk margin for this addition. The directed payment is subject to premium tax.

b. State Legislative benefit updates

i. Home visiting services for pregnant women and infants ages 0-1 year consistent with HB 2 beginning October 1, 2021, were prorated 9-months at estimated annual costs of \$1.853 million.

ii. Genetic testing reimbursement for hospitals in accordance with HB 600.

5. Fee schedule updates, include:

a. DRG inpatient hospital unit cost trend updates using the actual 2022 DRG weights effective October 1, 2021. A review of the newly released weights suggests a 0.0% unit cost trend between 2021 and 2022 compared to the Amendment #6 assumption of a 0.56% increase based on historical data.

b. Neuro-psychiatric testing codes within the Calendar Year 2021 fee schedule included a number of incorrect entries for several neuro-psychiatric testing codes which prompted an update to reimbursement adjustment factors. The estimated impact of the correction is an increase of approximately \$135,000 for SFY 2022.

c. Other fee schedule changes, include:

i. Unit cost adjustment for latex gloves and a fee schedule update for vaccine administration account for an additional \$310,000 in SFY 2022.

ii. New durable medical equipment (DME) and supplies (breast milk storage bags, peristeen pumps) with annual costs estimated at \$280,200 and \$135,000, respectively (effective October 1, 2021).

iii. Behavioral health crisis treatment center program services transferring to the State's redesigned Mobile Crisis Response Program.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 4

- iv. Preferred drug list (PDL) updates to include different formulations of drugs already included on the PDL.
- v. Community residential services beds service projection updates.

6. Prescription drug savings adjustments

An adjustment to rates is included to account for differences in MCO pharmacy management (e.g., adherence to generally accepted quantity limits for three (3) therapeutic classes, opioid prescribing patterns, prior authorization denial rates) with annual savings of \$1.59 million incorporated into the rates.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. In the event the contract is not approved, available federal relief to HCBS providers and their direct care workers would not be available.

Respectfully submitted,

Lori A. Shibinette
Commissioner

and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total shared price limitation by \$1,188,660,571 from \$2,049,240,056 to \$3,237,900,627, with no change to the completion date of August 31, 2024 effective July 1, 2021 or upon Governor and Council approval, whichever is later. Funding sources are as follows:

	Federal	Other	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	71.88%	0.50%	27.62%
Standard Medicaid Population (Medicaid Care Management Account)	53.12%	22.56%	24.32%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of federal medical assistance percentage (FMAP) for the CHIP population could become available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. Additionally, the American Rescue Plan of 2021 potentially provides an additional 10% FMAP for a one year period (April 1, 2021-March 31, 2022) for certain home and community based services covered in this contract based on approved Centers for Medicare and Medicaid Services (CMS) spending plan, which is subject to further federal guidance at this juncture. If the additional funding is received the Department will request Fiscal Committee authority to accept, and expend additional amounts for January 2022 forward.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 5

April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), and January 22, 2021 (Item #9).

Funds are available in the accounts outlined in the attached fiscal details for State Fiscal Year (SFY) 2021, and are anticipated to be available in the SFYs 2022 through 2023 with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes and legislatively approved rate increases are included as well.

EXPLANATION

This request covers the rating period of July 1, 2021 through June 30, 2022.

Summary of Key Changes

Exhibit A. Program Change Summary:

1. A carry forward of staffing requirements from amendment #5
2. Added provision that Members shall not be required to change covered prescription drugs more than once per calendar year, with limited exceptions.
3. Further extension of additional preferential auto-assignment awards for high-performing MCO(s) consistent with Alvarez & Marsal's report recommendation incorporated initially the last MCO contract amendment.
4. New CMS Managed Care Rule provisions effective July 1, 2021 concerning beneficiary/member rights.
5. Update to the National Committee for Quality Assurance (NCQA) reporting compliance requirements.
6. New Directed Payment for Community Residential Services provided by Community Mental Health Centers (CMHCs) and Psychiatric Designated Receiving Facilities (DRFs); continuation of Directed Payments for Durable Medical Equipment (DME), CMHCs, and Critical Access Hospitals (CAHs).
7. The inclusion of CMS requested language for historical directed payments terms.
8. Elimination of risk corridor and replacement with Minimum and Maximum Medical Loss Ratios (MLRs), the effect of which reduces the state's risk compared to the SFY 2020 and 2021 Risk Corridors. The state has greater enrollment risk due to the unpredictable length of the federal public health emergency.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 5

9. The minimum MLR is set at 88.2% for the Standard Medicaid population and 87.4% for the Granite Advantage Health Care Program (GAHCP) population. The maximum MLR shall be 94.2% for the Standard Medicaid population and 93.4% for the GAHCP population.

10. Any incentive payments made to higher-performing MCOs as part of the Withhold and Incentive Program shall not impact the minimum or maximum MLR provision of the contract.

11. For the period July 1, 2021 through June 30, 2022 rating period, MCOs will receive a one-time kick payment for each Member psychiatric admission stay with DRG code 880-887 subject to limited exceptions.

12. Sets the MCO administrative allowance for SFY 2022 at the 40th percentile, or \$35.78 PMPM (Per Member Per Month) SFY 21 had a blended administrative allowance of \$37.00 PMPM.

The state's actuary Milliman used the following methodology to develop the New Hampshire MCM program capitation rates:

1. Summarize CY 2018 and CY 2019 MCO encounter experience data for the Standard Medicaid and GAHCP Medically Frail eligible population and the March 2019 to December 2019 MCO encounter data for the GAHCP Non-Medically Frail population.
2. Project estimated statewide SFY 2022 MCM program medical costs for all covered services by rate cell.
3. Blend the projected SFY 2022 costs based on CY 2018 and CY 2019 encounter data.
4. Adjust SFY 2022 projected medical costs for all rate cells for benefits not included in the base experience data, expected administrative expenses, margin, and premium tax.

Medicaid enrollment is projected to remain elevated through the end of the federal Department of Health and Human Services declared PHE. There still exists uncertainty related to the end of the PHE. As such, Milliman prepared two (2) separate enrollment scenarios: 1) the PHE ends December 2021, and 2) the PHE ends September 2021:

- Each scenario assumes enrollment returning to pre-COVID levels due to the reinstatement of eligibility redetermination activities three (3) months following the end of the PHE.
- The changes in enrollment are anticipated to impact the average acuity of beneficiaries. For rate cells modeled to have significant enrollment differences due to the PHE; newer enrollees having lower illness burden, the rate development includes an acuity adjustment for each scenario.
- The Department will initially pay capitation rates based on the December 2021 scenario, but will retroactively pay capitation rates under the September 2021 scenario if the PHE ends prior to October 1, 2021.

The capitation rates do not include provisions for expected vaccination administration fees related to COVID-19 in SFY 2022. The cost of vaccination administration fees remain carved out of the MCM program. Based on the interplay of other funding sources. The SFY 2022 capitation rates do not include any explicit adjustments for the following:

- COVID-19 Testing and Treatment Cost: The prevalence of COVID-19 infection rates in SFY 2022 is dependent on many variables that make it difficult to predict to include an

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 5

estimate for the cost of testing for and treating individuals with COVID-19 including, but not limited to:

- The take-up rate and timing of COVID-19 vaccinations;
- The emergence of COVID-19 variants and the efficacy of vaccines on these variants; and
- The implementation of social distancing measures.

Milliman advises, there is not a publicly available model that includes COVID-19 infection rate or hospital admissions through June 2022. In addition, the publicly available models have materially changed short-term and long-term projections of COVID-19 prevalence in reaction to emerging data. While Milliman reviewed historical MCM data for the cost of testing and treating COVID-19 in CY 2020, given the unpredictable patterns of COVID-19 prevalence to date in New Hampshire and the changing national models there is a range of potential impacts on the SFY 2022 rates.

The most significant fiscal impact of COVID-19 to date has been the deferral of non-essential services, either through government-enacted policies, the impact of social distancing on the administration of services, or personal choice. Milliman reviewed MCM emerging claims data incurred through February 2021 by population type (to remove the impact of membership mix changes). As of February 2021, there was still measurable reductions in claim costs for each population compared to the PMPMs prior to the pandemic in CY 2019. However, Milliman advises it is difficult to use this historical data to project the impact of deferred services for SFY 2022 for many reasons.

- Utilization by service category has varied in CY 2020 and early CY 2021 as the level of COVID-19 diagnoses and hospital admissions has changed in New Hampshire over the course of the pandemic. Therefore, the unknown future prevalence of COVID-19 will be a key variable in future service utilization changes relative to pre-pandemic levels.
- Limited data is available to understand how beneficiary behavior will change during and after the roll-out of the COVID-19 vaccination. As such, there could still be a wide range of possibilities as to when service utilization may return to pre-pandemic levels or if there will be increased utilization due to pent up demand.
- In the MCM data Milliman reviewed it is difficult to isolate the impact of deferred services from changes in utilization due to other drivers, such as member acuity changes or change in service mix.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

In response to the pandemic, the mix of services used to treat patients has changed, such as the use of telehealth services. It is unknown if these provider and patient changes will persist after the end of the pandemic.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP necessary to cover the program are not sufficient, the projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

Respectfully submitted,

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by decreasing the total shared price limitation by \$128,374,314 from \$2,177,614,370 to \$2,049,240,056, with no change to the completion date of August 31, 2024 effective retroactive to July 1, 2020 upon Governor and Council approval.

Funds for Granite Advantage Health Program (GAHCP) are 90% Federal and 10% Other (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 74.23% Federal and 25.77% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 52.5% Federal, 24.15% General and 23.35% Other funds. An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population could become available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. If the forgoing materialize, DHHS would go to the Fiscal Committee to increase, accept, and expend amounts for January 2021 forward.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), and most recently amended with Governor and Council approval on June 10, 2020 (Item #6).

Funds are available in the accounts outlined in the financial section for State Fiscal Year 2021, and are anticipated to be available in the State Fiscal Years 2022 through 2025, with authority to adjust amounts within the price limitation between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for State Fiscal Years 2020-2021.

EXPLANATION

This request is **Retroactive** because this Amendment covers the retrospective rating period July 1, 2020 through June 30, 2021. The State negotiated in the original SFY2021 rates the opportunity to refresh actuarial estimates. The State was able to use this added flexibility from CMS due to the Public Health Emergency, uncertainties related to COVID-19 treatment and costs, and utilization impact on non-COVID services. The most material initial actuarial estimate was for the costs of deferred care from the prior contract period. As the Public Health Emergency has continued this became a key assumption to revisit as has the enrollment and the composition thereof.

Fiscal table budget amounts reflect more current utilization and enrollment experience, enhanced FMAP available and accepted thus far. Adjustments to administrative costs, program changes and legislatively approved rate increases are included as well.

CMS published a new Medicaid Managed Care rule in November 2020 with provisions effective either December 14, 2020 or July 1, 2021. Those provisions taking effect in December 2020 are incorporated herein and are procedural rather than economic in impact to this Agreement.

Summary of Key Changes

The reduction in price limitation reflects a slightly less steep enrollment growth based on the State of New Hampshire's employment recovery with a greater than expected length of the PHE and maintenance of effort required to earn the enhanced FMAP. DHHS had forecast average monthly enrollment for the contract year of just over 215,000 people, whereas based on experience DHHS now forecast about 208,000 people. This reduction along with a 3% reduction globally in the capitation rates to be paid to the MCOs accounts for the favorable price limitation change.

The 3% capitation rate reduction is a function of net changes; totaling \$38,077,712. The single largest favorable change is related to more favorable COVID-19 cost experience of \$30,774,811. Rather than a 1.2% increase in this SFY 21 period for care deferred care before June 30, 2020, the adjustment for the full twelve month period is a 1.3% decrease.

The second largest favorable adjustment is for MCO administrative costs of \$17,406,265 (or 2.5% of capitation excluding directed payments and premium tax) for the period of January through June, 2021. This reduction reflects an analysis of what the PHE has permitted the MCOs to implement under the contract, what is likely to be able to be advanced in this period given an extension of the PHE due to waves of COVID-19 surge as well as recalibration of those activities where the return on investment looks longer than anticipated back when the contract was developed.

These and other administrative allowance adjustments represent an adjusted administrative allowance consistent with the 50th percentile for the full period (previously, the 75th percentile) and the 32nd percentile for the last six months. Administrative cost benchmarks of other Medicaid managed care plans and within the MCM program were assessed by the state's actuaries.

Offsetting these two key favorable cost adjustments are increases related to the HB4 3.1% provider rate increase amounting to \$13,775,736 for the period January through June 2021 and an increase in the Boston Children's Hospital risk pool of \$4,847,238 for the full twelve month period

reflecting more recent reported experience, other changes can be seen in Table A. The resulting composite capitation rates can be seen in Table B; the net is a 3% reduction.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 90% Federal and 10% Other; funds for the Child Health Insurance Program are 74.23% federal as appropriated by Congress and 25.77% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 52.50% Federal as appropriated by Congress, 24.15% General and 23.35% Other funds.

In the event that the non-federal Other funds for the GAHCP necessary to cover the program are not sufficient, the projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to **retroactively** amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schrafft's City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), and by increasing the shared price limitation by \$1,361,049,281 from \$816,565,089 to an amount not to exceed \$2,177,614,370, with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval.

Funds for Granite Advantage Health Program (GAHCP) are 90% Federal and 10% Other (as defined in RSA 126-AA:3, 1); funds for the Child Health Insurance Program are 67.88% Federal and 32.12% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51.01% Federal, 22.56% General and 26.43% Other funds. An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population could become available if the public health emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. The funding percentage of the Child Health Insurance Program (CHIP) is already subject to enhancement through September 2020; the CARES Act would enhance that to 80.84% if the PHE continues into the first quarter of State Fiscal Year 2021. If the forgoing materialize, DHHS would go to the Fiscal Committee to increase, accept, and expend amounts.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A).

Funds are available in the following accounts for State Fiscal Year 2021, and are anticipated to be available in the State Fiscal Years 2022 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office; if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align

EXPLANATION

This request covers the period July 1, 2020 through June 30, 2021 (prior contract period was a ten month period). The amounts herein make an initial actuarial estimate for the costs of deferred care from the prior contract period. The budget amounts in the fiscal tables reflect enrollment experience and trend as a result of the public health emergency and the maintenance of effort requirements. Thus far through May 22, 2020, from the date of the PHE, total enrollment has increased overall by more than 7% with the Granite Advantage Health Care Program (GAHCP) over 11%. For State Fiscal Year 2021, enrollment is projected to increase additionally 5.3% for the standard population and 16.5% for the GAHCP.

There is undoubtedly, a high level of uncertainty for future COVID-19 treatment and testing costs, and the acuity of the spike in new enrollment due to the effects of the COVID-19 and the PHE and related economic conditions. Additionally, the impacts on future utilization and deferred care, unrelated to COVID-19 are not reliably known. Therefore, DHHS proposes a retroactive actuarial rate refresh based on experience from the first quarter of the contract back to July 1, 2020 to incorporate more recent actuarial experience, HB 4 rate adjustments, and any further legislative policy changes. The retroactive actuarial rate refresh will necessitate another contract amendment anticipated in February 2021.

Summary of Changes

The amendment to the three (3) MCM capitated and risk-based vendor Agreements, including capitation rate adjustments for September 2019 to June 2020, and July 2020 through June 2021, as well as Exhibit A narrative contract changes, reflect the following changes:

The State Fiscal Year 2021 capitation rates below reflect three program changes from the September 2019 to June 2020 capitation rates.

They are:

1. Revised rate cell structure that incorporates the GAHCP Behavioral Health population into the existing Behavioral Health rate cells and a separate Children's Health Insurance Program (CHIP) rate cell;
2. Targeted savings opportunities through increased care management activities consistent with the MCM contract effective September 1, 2019; and
3. Implementation of a hospital directed payment to promote access to high-quality acute care services provided by critical access and non-critical access hospitals across New Hampshire.

The State Fiscal Year 2021 capitation rates include a continued five million dollar directed payment to community mental health centers (CMHCs), and a new thirty million dollar directed payment to hospitals (both subject to CMS approval). While the amounts are included in the MCO capitation rates, the MCOs are not at-risk for the amount of these directed payments. Both directed payments are included to support quality and access initiatives of the MCM Program.

Capitation Rate Tables 1A and 1B below show the statewide rate change by population compared to the September 2019 to June 2020 capitation rates included in the April 22, 2020 rate certification. The two tables compare rates with and without the new hospital directed payment.

Table 1A capitation rates exclude the new hospital directed payment.

The GAHCP behavioral health population will receive the behavioral health population capitation rates for SFY 2021.

The amendment also includes narrative and other content changes as described below.

They include:

1. Transitional housing program services and community residential services wrap-around services and supports benefit start date from July 1, 2020 to July 1, 2021;
2. Reference to payments standards for directed payments described in actuarial certification materials for the rating period;
3. Change in delivery timeframes for DHHS notice of MCM Withhold and Incentive Program Guidance from within ninety (90) calendar days of the start of the program year to August 1st each year;
4. Explanation that any differences in performance and rating periods shall be described in the program's actuarial certification for the rating period;
5. With alternate instructions from CMS, full replacement of CMS-mandated contract language that directs administration and funds previously appropriated for the GAHCP community engagement requirements administered through the managed care contracts;
6. Provision for a retroactive rate refresh effective July 1, 2020 targeted for February 2021 to address the PHE and related economic and healthcare conditions;
7. Inclusion of a risk corridor protection for the July 2020 to June 2021 contract period to address the uncertainty of future medical costs given the COVID-19 pandemic and the PHE; and

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to **retroactively** amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schrafft's City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM). The shared price limitation remains unchanged, not to exceed \$816,565,089, in State Fiscal Year 2020, retroactive to September 1, 2019 with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval. After reconciliation of membership, however, we did a reallocation of funds within the price limitation as reflected in the accounting tables.

Funds for Granite Advantage Health Program are 93% Federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020 (as defined in RSA 126-AA:3, 1); funds for the Child Health Insurance Program are 77.6% Federal and 22.4% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal, 22.7% General and 26.3% Other funds.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9), and December 18, 2019 (Item #15).

Funds are available in the following accounts for State Fiscal Year 2020, and are anticipated to be available in the State Fiscal Years 2021 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align with the state budget process is included in the explanation below. For these reasons, expenditures for the program are identified only for State Fiscal Year 2020.

EXPLANATION

This request is retroactive to September 1, 2019 in order to reallocate 1.5% of the capitation payments to ensure access to care for Medicaid beneficiaries and help provide financial stability for safety-net providers. Network providers' provision of access to Medicaid beneficiaries could decrease without consideration of the impact of COVID-19. The directed payments described herein are intended to help, in part, providers remain available to beneficiaries and ensure network adequacy under CMS regulations.

In addition, this amendment will address the CMS requirement to strike contract language that directs administration and funds previously appropriated for the Granite Advantage Health Care Program's (GAHCP) community engagement requirements administered through the managed care contracts. This is because Community engagement requirements have been vacated by the court.

Summary of Changes

DHHS therefore proposes to make the following changes to components of the capitation rates in order to fund the proposed directed payment funding pool:

1. Reduce service costs by 1.5% for all services to recognize the expected net impact of reductions in non-emergency and elective service costs due to the COVID-19 pandemic social distancing guidelines, increased COVID-19 treatment costs, the impact of waiving certain prior authorization requirements, and reduced population acuity due to projected enrollment increases related to the recession
 - a. The MCOs have agreed to continue their capitation arrangement with the community mental health centers (CMHCs) at current payment levels and waive any related maintenance of effort (MOE) provisions for state fiscal year (SFY) 2020.
2. Reduce the per member per month (PMPM) administrative allowance for all rate cells by 1.5% to recognize that significantly fewer MCM program members are enrolled in care management programs compared to the 15% expectation in the MCM contract.
3. Further reduce the administrative allowance for the GAHCP Non-Medically Frail population by \$0.45 PMPM to remove costs related to the GAHCP work and community engagement requirement. The related funding is repurposed for the directed payment pool.
4. Reduce the gain/loss margin to reflect the shifting of revenue from at-risk services to the new non-risk directed payments. The gain/loss margin still represents 1.5% of at-risk revenue.
5. Calculate the amount available for the new directed payment funding pool, which is approximately \$11.7 million assuming the original projected enrollment level (i.e., not incorporating likely enrollment growth resulting from the recession).
6. The original CMHC directed payment remains unchanged.
7. The PMPM premium tax allowance remains unchanged because the capitation rates by rate cell are unchanged after the reallocation by component.

Safety-net Provider Directed Payments

Pending CMS approval, DHHS will require each MCO to pay a percentage distribution and initial allocation for specific qualifying services provided by the six safety-net provider classes based on January 2019 to June 2019 MCO encounter payments as described in Table 1 below.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

Safety-net Provider Class	Percentage Distribution of January to June 2019 MCO Payments for Selected Services Only	Approximate September 2019 to June 2020 Direct Payment (Total)¹	Approximate September 2019 to June 2020 Direct Payment (Monthly)¹
FQHCs and RHCs	32.0%	\$3,744,000	\$374,400
Critical Access Hospitals	29.8%	3,486,600	348,660
SUD Residential Treatment	16.8%	1,965,600	196,560
Home Health	4.9%	573,300	57,330

Personal Care	7.7%	900,900	90,090
Total Pool	100.0%	\$11,700,000	\$1,170,000

¹ Approximate values of the direct payment pool are based on the initial enrollment projections in the January 14, 2020 rate setting report. Actual monthly pool funding will be determined by actual MCM program enrollment multiplied by the PMPM directed payment funding for each rate cell in the September 2019 to June 2020 MCM program capitation rates.

An identified portion of the actuarially sound per member per month capitation payment to the MCOs multiplied by the member months the plan is paid for the month will form a pool to be used every month to make percentage add-on payments to the defined safety-net provider classes. The pool will be 1.5% of the capitation payments made to the MCOs, or approximately \$12 million for the September 2019 to June 2020 contract year (depending on actual enrollment). DHHS will establish the percentage of the pool that will be allocated to a separate sub-pool for each of the six safety-net provider classes based on historical MCO payments to these providers.

At the end of the month, the amount in each sub-pool will be divided by the payments made by the MCOs to the defined safety-net provider class for qualifying services adjudicated in the month. This calculation will determine the amount of the uniform percentage add-on for the month. The additional payments will be sent to the safety-net providers in the following month. It is anticipated that payments will be made on the following schedule:

- May 2020 payment: based on September 2019 to March 2019 encounters
- June 2020 payment: based on April 2020 encounters
- July 2020 payment: based on May 2020 encounters
- August 2020 payment: based on June 2020 encounters

Every add-on payment will be directly tied to a qualifying paid encounter, and include the ability to tie each payment to a specific service provided to a specific beneficiary through the data consistent with the managed care rule. As warranted to account for changes in the provider environment, CMS has advised that DHHS may amend its directed payment request.

**His Excellency, Governor Christopher T. Sununu
and the Honorable Council

Elements Supporting CMS Approval

The CMS requirement for a directed payment approval under the COVID-19 parameters is to require implementation of a risk corridor for the September 2019 through June 2020 contract period to address the uncertainty of future medical costs given the COVID-19 pandemic.

In addition, as recommended in CMS guidance documents, additional administrative changes include:

- 1. For the September 2019 to June 2020 contract year, DHHS shall waive the quality withhold provisions of the Agreement due to the impact of the COVID-19 pandemic.**
- 2. For the May 1, 2020 to June 30, 2020 time period, DHHS shall modify the auto-assignment algorithm to incorporate equal auto-assignment among the three MCOs due to atypical enrollment increase.**

Should the Governor and Executive Council not authorize this request beneficiary access and provider stability of safety-net providers will be at greater risk.

EXPLANATION

This request is retroactive because of the delay in adopting a biennial budget and the need to update the capitated rates to reflect the various provisions of the budget that are incorporated into the Medicaid Care Management Program.

The amendment to the three (3) Medicaid Care Management (MCM) capitated and risk-based Agreements, including adjustments for September 2019 to June 2020 capitation rates for the MCOs and Exhibit A narrative contract changes, reflect the following changes:¹

Minimum Durable Medical Equipment (DME) fee schedule: Effective January 1, 2020, DHHS shall implement a minimum fee schedule DME services. The estimated impact of this change is approximately \$3.2 million over the January 2019 through June 2020 period.

Psychiatric boarding services: To improve continuity of care for mentally ill MCM members, DHHS shall fund psychiatric consultation services for individual in a psychiatric boarding situation. These services shall be effective March 1, 2020. The estimated impact of this change is approximately \$0.1 million over the March 2020 through June 2020 period.

Fee schedule updates: In accordance with annual CMS updates, reimbursement adjustments reflect the State Fiscal Year 2020 Federally Qualified Health Center (FQHC) encounter rates and the October 2019 (Diagnosis-Related Group) DRG rates.

Boston Children's Hospital (BCH) service funding: Funding for inpatient and outpatient BCH services shall reflect recent expenditure patterns prompting implementation of a risk pool in order to better allocate funds. As a result, claims incurred at the facility shall be excluded from stop-loss protections to avoid unintended interactions between the MCM Program's risk pool and stop-loss risk protection features. The estimated impact of this change is approximately \$1.4 million over the September 2019 through June 2020 period.

Non-Emergency Medical Transportation (NEMT) and Community Mental Health Center (CMHC) service costs: Increases in the Non-Medically Frail population's service costs for NEMT and CMHC costs for the January 2019 to June 2019 period warrant an increase to the base period data. The estimated impact of this change is approximately \$3.1 million over the September 2019 through June 2020 period.

MCO supplemental pharmacy rebates: Review of rebate eligible therapeutic classes revealed current spending did not support the preliminary 0.5% supplemental pharmacy rebate assumption; therefore, the rebate assumption is reduced from 0.5% to 0.1%.

Medically frail acuity adjustment: Review of emerging medical loss ratio (MLR) experience for the Medically Frail population indicated a likely difference in member health acuity between the base data period and emerging experience warrants adjustment to the base period data. The estimated impact of this change is approximately \$7.9 million over the September 2019 through June 2020 period.

Medicaid provider rate increases: House Bill 4, Section 348, of the 2019 NH Regular Legislative Session, directs increases to most Medicaid provider rates (excluding prescription drugs, designated receiving facility (DRF), and substance use disorder (SUD) residential treatment services), including State Plan Services and Waiver Programs by 3.1% effective

¹ Federal law requires managed care rates be reviewed no less frequently than a 12-month period. The Department aligns this process with the State Fiscal Year. The certified rate established for the program reflected in this contract is within the Department's budget for State Fiscal Year 2020. As in the past, the Department and Milliman will work with the legislature through the budget process to ensure the program is funded consistent with the budget.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 5

January 1, 2020, and an additional 3.1% effective January 1, 2021. The estimated impact of this change is approximately \$9.6 million over the January 2020 through June 2020 period.

Designated Receiving Facility (Involuntary) beds and rate increases: House Bill 4, Section 356, of the 2019 NH Regular Legislative Session, authorizes 8 to 10 new DRF beds, and increases the diagnosis related group (DRG) base rate reimbursement for all existing and newly established DRF beds when certain conditions are met. The new rates and additional beds are targeted for implementation on January 1, 2020. The estimated impact of the change is approximately \$2.2 million for the January 2020 through June 2020 period.

Mobile crisis team (MCT): Senate Bill 11, of the 2019 NH Regular Legislative Session, directs DHHS to create a new adult MCT to supplement those already in place. The new MCT is targeted for implementation on April 1, 2020. The estimated impact of this change is \$0.3 million over the April 2020 through June 2020 period.

The rate adjustments for all of the above program changes are for the ten month capitation rate period for Standard Medicaid and NH Granite Advantage Health Care Program for the September 2019 through June 2020 period with comparison to the previously approved rates are described in Table 1 below. The adjustment period is only 10 months because the prior contract was extended by two months to help effectuate the transition period for the new MCO and the new contract, which was approved by the Executive Council for a September 1, 2019 start date. The Department's actuary, Milliman, has certified a rate that is actuarially sound for this program.

In addition, Exhibit A narrative contract changes include:

1. Amendment #1 edits carried forward, with adjustments as needed.
2. Transitional housing program services and community residential services: Coverage for these supportive services has been adjusted to reflect a July 1, 2020 start date to correspond with related Request for Proposals activities.
3. Provider payment: Clarifications to provider payments are dependent upon New Hampshire Medicaid fee schedules.
4. Drug Utilization Review (DUR) program: Inclusion of contract provisions to address new federal compliance requirements for the MCM Program's DUR program.
5. Technical corrections: Technical corrections include edits to pharmacy encounter date submission timeframes.
6. Zolgensma: Addition of gene therapy medication, Zolgensma, as a drug covered by New Hampshire Medicaid effective September 1, 2019 due to its extremely high cost and low incidence rate, which makes cost for the treatment difficult to predict for inclusion in MCM capitation rates, including related risk protection processes.
7. Hepatitis C medications: With stabilization of treatment demand, Hepatitis C prescription drugs are carved into the program starting September 2019.
8. Downside risk mitigation: Inclusion of a downside risk mitigation process for the Granite Advantage Health Care Program (GAHCP) Medically Frail and Non-Medically Frail populations for the September 2019 through June 2020 period.
9. Local Care Management: The contract reflects a terminology change, "Local Care Management Network(s)", to better reflect the nature of the program's local care management model.

Source of Funds: Funds for Granite Advantage Health Program are 93% federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020; funds for the Child Health Insurance Program are 77.6 federal as appropriated by Congress and 22.4% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal as appropriated by Congress, 22.7% General and 26.3% Other funds.

REQUESTED ACTION

Authorize the Department of Health and Human Services Office, to amend three (3) Agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schraffts City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, by changing the program start date from July 1, 2019 to September 1, 2019 to accommodate sufficient time for readiness activities needed to effectuate a well-executed implementation of health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, and by decreasing the price limitation by \$126,335,836 from \$924,150,000 to an amount not to exceed \$797,814,164 in State Fiscal Year 2020, for period September 1, 2019 through June 30, 2020, effective upon Governor and Executive Council approval, with a change to the completion date of August 31 2024, from June 30, 2024. The original Agreements were approved by Governor and Executive Council approval on March 27, 2019, Tabled Late Item A (Tabled by Governor and Executive Council on February 20, 2019).

Funds for Granite Advantage Health Program are 93% Federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020 (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 78.8% Federal and 21.2% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal, 24.3% General and 24.7% Other funds.

Funds are anticipated to be available in the following account(s) for State Fiscal Years (SFY) 2020 through 2025 upon the availability and continued appropriation of funds in the future operating budgets. The Centers for Medicare and Medicaid Services (CMS) requires that managed care rate certifications must be done on no more than a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each state fiscal year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how this contract aligns with the state budget process is included in the explanation below. For these reasons, expenditures for the program are identified only for SFY 2020.

EXPLANATION

The purpose of this request is to amend the three (3) Medicaid Care Management (MCM) capitated, and risk-based Agreements by changing the program start date from July 1, 2019 to September 1, 2019. The amendment is necessary to provide a sufficient readiness ramp up period for the Department and the Contractors known as the Managed Care Organizations (MCOs) so the health care services to 180,000 eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, are implemented smoothly, and by decreasing the price limitation by (\$126,335,836) from \$924,150,000 to an amount not to exceed \$797,814,164 in State Fiscal Year 2020, September 2019-June 2020.

The proposed change in program start date, to a later date, was necessary to provide Governor and Executive Council sufficient time to review the new contracts, hold two informational hearings, and to allow the Department and the MCOs the needed time for readiness to occur for the new Agreements. These three (3) MCOs will serve approximately 180,000 members including pregnant women, children, parents/caretakers, non-elderly, non-disabled adults under the age of 65, and individuals who are aged, blind or disabled, among others, as described in the Medicaid Care Management (MCM) contracts. The MCOs will cover the acute care, behavioral health, and pharmacy services for all Members and work with the Department to address the crucial social determinants of health in accordance with the attached MCM contracts.

The MCOs will provide a person-centered, integrated, and comprehensive delivery system that offers a very substantial array of accessible Medicaid services, taking into account each Member's physical well-being, behavioral health (mental health and substance use disorders), and social circumstances. The Department will challenge its MCO partners to work responsively with the provider community and MCM Members to improve access to care and promote healthy behaviors. New Hampshire's MCM program will incentivize value over volume, enhance program efficiency, and hold MCOs accountable for demonstrable improvements in health outcomes.

Table One represents a ten-month year capitation rate for the Standard Medicaid and the NH Granite Advantage Health Care Program for the period September 2019 through June 2020 with a comparison to the SFY 2020 rates in the February 15, 2019 signed contracts approved by the Governor and Executive Council of March 27, 2019 (Tabled, 2/20/2019 Late item #A). This allows alignment with State of New Hampshire fiscal year through SFY 2024. The change to the completion date of August 31 2024 is requested to allow for the full 60-month contract that was specified in the request for proposals.

EXPLANATION

The purpose of this request is to enter into capitated, risk-based Agreements to provide acute care and other medical services to eligible and enrolled Medicaid participants New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management. ~~These three (3) Vendors will serve approximately 180,000 members including pregnant women, children, parents/caretakers, non-elderly, non-disabled adults under the age of 65, and individuals who are aged, blind or disabled, among others, as described in the Medicaid Care Management (MCM) contracts. The Managed Care Organizations (MCOs) will cover the acute care, behavioral health, and pharmacy services for all Members and work with the Department of Health and Human Services (DHHS) to address the crucial social determinants of health in accordance with the attached MCM contracts.~~

The MCO Vendors will provide a person-centered, integrated, and comprehensive delivery system that offers a very substantial array of accessible Medicaid services, taking into account each Member's physical well-being, behavioral health (mental health and substance use disorders), and social circumstances. DHHS will challenge its MCO partners to work responsively with the provider community and MCM Members to improve access to care and promote healthy behaviors. New Hampshire's MCM program will incentivize value over volume, enhance program efficiency, and hold MCOs accountable for demonstrable improvements in health outcomes.

Two of the Vendors, Boston Medical Center Health Plan Inc., and Granite State Health Plan Inc., are respectively otherwise known as Well Sense Health Plan, and New Hampshire Healthy Families. The Department presently contracts with both of these Vendors to provide New Hampshire's Medicaid Care Management program.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 6

I. Procurement Process

These contracts represent the culmination of the Department's first re-procurement of the MCM program since its commencement in December 2013. The Department's process for the development of the program reflected in the contracts and the contracts themselves represent a significant improvement over the prior procurement process and the program itself. The Department -- for the first time ever -- put out the Request for Proposals for public comment and held public information sessions in each of the Executive Council Districts last July in Concord, Keene, Manchester, Nashua, Littleton and Portsmouth before it was issued to potential respondents.

These three (3) Vendors were selected through a competitive bid process. A Request for Proposals RFP-2019-OMS-MANAG-02 was posted on the Department of Health and Human Services' web site from August 30, 2018 through October 31, 2018. A mandatory bidder's conference was held on September 7, 2018. In-person attendance at the Mandatory Bidder's Conference was a requirement to submit a proposal. The Department received four (4) proposals. The proposals were reviewed and scored by a team of individuals with program specific knowledge. The Bid Summary is attached.

II. Central Features of the New MCM Program

This procurement was also focused on improving the program for beneficiaries and providers and introducing many new features. The goals of the new MCM program are to

- Improve care of Members
- Improve health outcomes
- Reduce inpatient hospitalization and re-admissions
- Improve continuity of care across the full continuum of care
- Improve transition planning when care is completed
- Improve medication management
- Reduce unnecessary emergency services
- Decrease the total cost of care
- Increase member satisfaction
- Improve provider participation in the program

In order to help achieve these goals, the new contracts make many changes in the current program. These include the following:

- **Additional Care Coordination and Care Management** resources to provide significantly more beneficiary support to those in greater need, including providing it at a local level. MCOs must provide Care Management for at least 15% of high-risk/high-need members, and MCOs must conduct local care management or contract with a designated care management entity for at least 50% of high-risk/high-need members.
- **Behavioral Health (Mental Health and Substance Use Disorder)** provisions support integration of care with physical health, implementation of the Department's new 10-year Mental Health Plan, and advance SUD treatment. MCOs are required to take into account each person's physical health, behavioral health (mental health and substance use disorders), and social and economic needs. MCOs are required to work with Members, Providers, integrated delivery networks (IDNs), and community mental health

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

programs (CMHPs) to integrate physical health and behavioral health and address social determinants of health that affect health outcomes and the cost-effectiveness of care.

- **Emergency Room Waiting Measures** include the provision of additional clinical staff to support the provision of services in hospital emergency departments to reduce the need for Members to wait for inpatient services.
 - **Support the Community Mental Health Centers and Substance Use Disorder Providers** by entering into capitated payment arrangements with Community Mental Health Programs and Providers, and reimburse substance use disorder providers at rates no less than the DHHS fee-for-service rates. MCOs must also contract with any willing peer recovery provider.
 - **Alternative Payment Models (APMs)** provisions require MCOs to incentivize value over volume and significantly reduce current fee for service billing arrangements.
 - **Community Engagement** specifies a role for the MCOs to support beneficiaries in fulfilling the Community Engagement requirement, including assisting their members with understanding qualifying activities and exemptions.
 - **New Provider Supports** require MCOs to implement prompt and accessible credentialing and re-credentialing processes that will be used to conduct provider outreach and support; standardize work processes to ensure efficient implementation of the program and minimal provider burden relative to claims billing processes, reporting, and prior authorizations; meet prompt payment requirements and pay claims based on the effective date of the Current Procedural Terminology code, and establish a provider grievance and appeals process.
-
- **Pharmacy Counselling and Management** are strengthened to help improve the safety and therapeutic benefits to beneficiaries and the economy of the program.
 - **Beneficiary Choice and Competition** is increased by providing Medicaid beneficiaries with three high-quality MCOs from which to choose.
-
- **Incentives and opportunities for beneficiaries to participate in healthy behaviors** must be provided by MCOs to improve individual health.
 - **Cost transparency** through reference based pricing and incentives to beneficiaries.
 - **Accountability for results** is increasing because a share of payment to MCOs will be directly linked to their performance, ensuring accountability for results, particularly in high priority areas such as addressing substance use disorders, integrating physical and behavioral health, providing robust care management, and reducing unnecessary use of high-cost services.
 - **Public Reporting** is an added contract element. Each selected MCO will be responsible for submitting an annual report to the Governor and the legislature reporting on how the MCO has addressed State priorities for the MCM Program, including those specified in RSA 126-AA and in other State statute, policies, and guidelines; what innovative programs it has established; how it is addressing social determinants of health of its members, and how it is improving the population health of the state and other key metrics of the program.
 - **Heighten program compliance and integrity provisions** have been added that allow for liquidated damages to be applied to the MCOs around contractual performance; provisions that incent MCO performance around collections for third party liability and coordination of benefits; and general fraud waste and abuse.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 6

- **Medical Loss Ratio** is specified in the contract at a minimum amount of 85% that must be spent on service delivery to beneficiaries, any amount less is to be rebated back to the Program.

III. Rate-making and Budget

The Department's actuary, Milliman, has certified a rate that is actuarially sound for this program. These rates are reflected in Table 1 below:

Table 1 New Hampshire Department of Health and Human Services SFY 2020 Capitation Rate Change Based on Projected SFY 2020 MCO Enrollment by Rate Cell			
Population	January 2019 to June 2019 Capitation Rate	SFY 2020 Capitation Rate	Percentage Change
Standard Medicaid			
Base Population	\$303.54	\$315.15	3.8%
CHIP*	188.36	196.71	4.4%
Behavioral Health Population	1,294.03	1,386.51	7.1%
Total Standard Medicaid	\$371.26	\$389.03	4.8%
Granite Advantage Health Care Program			
Medically Frail	\$993.36	\$1,025.07	3.2%
Non-Medically Frail	423.21	482.80	14.1%
Total GAHCP	\$532.03	\$586.30	10.2%
Total	\$416.29	\$444.28	6.7%

*The CHIP capitation rate is an average of the specific rate cells in which CHIP members are enrolled. We do not develop a CHIP specific capitation rate.

Federal law requires that managed care rates be reviewed no less frequently than a 12-month period. The Department aligns this process with the state fiscal year. Over the last several years, the rates have been reviewed and an amendment made to the MCM contracts in May or June for the fiscal year beginning on July 1st. In order to maintain actuarial soundness, the rates are also required to be reviewed in the event of significant program changes. For example, while the Department established rates for FY 2019 last spring, the Department was required to refresh and update the rates when the Medicaid expansion program was brought back into managed care on January 1, 2019 – in the middle of the state fiscal year.

This year, there are items in both the Governor's budget and in other legislation now pending that, if and when enacted, would require Milliman to revise the rates. Specifically, there are proposals to (i) raise the rates paid to community based designated receiving facilities, (ii) add transitional housing for persons who can be discharged from New Hampshire Hospital; (iii) add mobile crisis teams or other behavioral health crisis services. All of these

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 6 of 6

additional services will have to be incorporated into the capitated rates for the managed care program consistent with their effective dates.

As a result, the Department anticipates that following the end of the legislative session, Milliman will review all program changes and any other relevant information, and adjust the rates as necessary. The Department would expect to bring an amendment to the contract in the September or October time frame for this purpose.

The certified rate established for the program that is reflected in this contract is within the Department's budget for state fiscal year 2020. Even though that the rates have been increased, a decline in the number of persons enrolled in Medicaid and a decline in the acuity of the population that has reduced expenditures in certain of the highest rate cells accounts for a reduction of total expenditure in the program within the current budget. As we have in the past, the Department and Milliman will work with the legislature in the budget process to ensure that the program is funded consistent with the budget.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 93% Federal as appropriated by Congress and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020; funds for the Child Health Insurance Program are 79.4% Federal as appropriated by Congress and 20.6% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal as appropriated by Congress, 24.3% General and 24.7% Other funds.

In the event that Federal funds become no longer available or are decreased below the 93% level for calendar year 2019 or 90% level for calendar year 2020, for the Granite Advantage Health Program, consistent with RSA 126-AA:3, no state general funds shall be deposited into the fund and medical services for this population would end consistent with RSA 126-AA:3, VI and the terms and conditions of the federal waiver issued by the Centers for Medicare and Medicaid Services

4.4.7.4.4.2.1 In an emergency involving an imminent threat to the safety or welfare of the Member or the public where there is no Qualified Interpreter for the Member with LEP immediately available, or

4.4.7.4.4.2.2 Where the Member with LEP specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances;

4.4.7.4.4.3. Rely on a minor to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of a Member or the public where there is no Qualified Interpreter for the Member with LEP immediately available; or

4.4.7.4.5 The MCO shall ensure interpreter services are available to any Member who requests them, regardless of the prevalence of the Member's language within the overall program for all health plan and MCO services, exclusive of inpatient services.

4.4.7.4.6 The MCO shall recognize that no one interpreter service (such as over-the-phone interpretation) will be appropriate (i.e. will provide meaningful access) for all Members in all situations. The

most appropriate service to use (in-person versus remote interpretation) will vary from situation to situation and shall be based upon the unique needs and circumstances of each Member.

4.4.7.4.7 Accordingly, the MCO shall provide the most appropriate interpretation service possible under the circumstances. In all cases, the MCO shall provide in-person interpreter services when deemed clinically necessary by the Provider of the encounter service.

4.4.7.4.8 The MCO shall not use low-quality video remote interpreting services. In instances where the Qualified Interpreters are being provided through video remote interpreting services, the MCO's health programs and activities shall provide:

4.4.7.4.8.1. Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection, that delivers high-quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication;

4.4.7.4.8.2. A sharply delineated image that is large enough to display the interpreter's face and the participating Member's face regardless of the Member's body position;

4.4.7.4.8.3. A clear, audible transmission of voices; and

4.4.7.4.8.4. Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the video remote interpreting. [45 CFR 92.201(f)]

4.4.7.4.9 The MCO shall bear the cost of interpretive services and communication access, including ASL interpreters and translation into Braille materials as needed for Members with hearing loss and who are low-vision or visually impaired.

4.4.7.4.10 The MCO shall communicate in ways that can be understood by Members who are not literate in English or their native language. Accommodations may include the use of audio-visual presentations or other formats that can effectively convey information and its importance to the Member's health and health care.

4.4.7.4.12 Interpreter services shall be offered by the MCO at every new contact. Every declination requires new documentation by the MCO of the offer and decline.

4.4.7.4.13 The MCO shall comply with applicable provisions of federal laws and policies prohibiting discrimination, including but not limited to Title VI of the Civil Rights Act of 1964, as amended, which prohibits the MCO from discriminating on the basis of race, color, or national origin.

4.4.7.4.14 As clarified by Executive Order 13166, Improving Access to Services for Persons with LEP, and resulting agency guidance, national origin discrimination includes discrimination on the basis of LEP. To ensure compliance with Title VI of the Civil Rights Act of 1964, the MCO shall take reasonable steps to ensure that LEP Members have meaningful access to the MCO's programs.

4.4.7.4.15 Meaningful access may entail providing language assistance services, including oral and written translation, where necessary. The MCO is encouraged to consider the need for language services for LEP persons served or encountered both in developing their budgets and in conducting their programs and activities. Additionally, the MCO is encouraged to develop and implement a written language access plan to ensure it is prepared to take reasonable steps to provide meaningful access to each Member with LEP who may require assistance.

4.14 Alternative Payment Models

4.14.1 As required by the special terms and conditions of The NH Building Capacity for Transformation waiver, NH is implementing a strategy to expand use of APMs that promote the goals of the Medicaid program to provide the right care at the right time, and in the right place through the delivery of high-quality, cost-effective care for the whole person, and in a manner that is transparent to DHHS, Providers, and the stakeholder community.

4.14.2 In developing and refining its APM strategy, DHHS relies on the framework established by the Health Care Payment Learning and Action Network APM framework (or the "HCP-LAN APM framework") in order to:

4.14.2.1 Clearly and effectively communicate DHHS requirements through use of the defined categories established by HCP-LAN;

4.14.2.2 Encourage the MCO to align MCM APM offerings to other payers' APM initiatives to minimize Provider burden; and

4.14.2.3 Provide an established framework for monitoring MCO performance on APMs.

4.14.3 Prior to and/or over the course of the Term of this Agreement, DHHS shall develop the DHHS Medicaid APM Strategy, which may result in additional guidance, templates, worksheets and other materials that elucidate the requirements to which the MCO is subject under this Agreement.

4.14.4 Within the guidance parameters established and issued by DHHS and subject to DHHS approval, the MCO shall have flexibility to design Qualifying APMs (as defined in Section 4.14 of this Agreement) consistent with the DHHS Medicaid APM strategy and in conformance with CMS guidance.

4.14.6 For any APMs that direct the MCO's expenditures under 42 CFR 438.6(c)(1)(i) or (ii), the MCO and DHHS shall ensure that it:

4.14.6.1 Makes participation in the APM available, using the same terms of performance, to a class of Providers providing services under the contract related to the reform or improvement initiative;

4.14.6.2 Uses a common set of performance measures across all the Providers;

4.14.6.3 Does not set the amount or frequency of the expenditures; and

4.14.7.1 Consistent with the requirements set forth in the special terms and conditions of NH's Building Capacity for Transformation waiver, the MCO shall ensure through its APM Implementation Plan (as described in Section 4.14) that fifty percent (50%) of all MCO medical expenditures are in Qualifying APMs, as defined by DHHS, within the first twelve (12) months of this Agreement, subject to the following exceptions:

4.14.7.1.1 If the MCO is newly participating in the MCM program as of the Program Start Date, the MCO shall have eighteen (18) months to meet this requirement; and

4.14.7.1.2 If the MCO determines that circumstances materially inhibit its ability to meet the APM implementation requirement, the MCO shall detail to DHHS in its proposed APM Implementation Plan an extension request: the reasons for its inability to meet the requirements of this section and any additional information required by DHHS.

4.14.7.1.2.1. If approved by DHHS, the MCO may use its alternative approach, but only for the period of time requested and approved by DHHS, which is not to exceed an additional six (6) months after the initial 18 month period.

4.14.7.1.2.2. For failure to meet this requirement, DHHS reserves to right to issue remedies as described in Section 5.5.2 (Liquidated Damages) and Exhibit N, Section 3.2 (Liquidated Damages Matrix).

4.14.7.2 MCO Incentives and Penalties for APM Implementation

4.14.7.2.1 Consistent with RSA 126-AA, the MCO shall include, through APMs and other means, Provider alignment incentives to leverage the combined DHHS, MCO, and providers to achieve the purpose of the incentives.

4.14.7.2.2 MCOs shall be subject to incentives, at DHHS' sole discretion, and/or penalties to achieve improved performance, including preferential auto-assignment of new members, use of the MCM Withhold and Incentive Program (including the shared incentive pool), and other incentives.

4.14.8.3 [Amendment #5:] As indicated in the HCP-LAN APM framework white paper, Category 2B 2G is met if the payment arrangement between the MCO and Participating Provider(s) rewards Participating Providers at a minimum for reporting quality metrics, ~~that perform well on quality metrics and/or penalizes Participating Providers that do not perform well on these metrics.~~

4.14.8.4 [Amendment #5:] HCP-LAN Categories 2B, 3A, 3B, 4A, 4B, and 4C shall all also be considered Qualifying APMs, and the MCO shall increasingly adopt such APMs over time in accordance with its APM Implementation Plan and the DHHS Medicaid APM Strategy.

4.14.8.5 DHHS shall determine, on the basis of the Standardized Assessment of APM Usage described in Section 4.14.10.2 (Standardized Assessment of Alternative Payment Model Usage) below and the additional information available to DHHS, the HCP-LAN Category to which the MCO's APM(s) is/are aligned.

4.14.8.6 Under no circumstances shall DHHS consider a payment methodology that takes cost of care into account without also considering quality a Qualifying APM.

4.14.8.7 Standards for Large Providers and Provider Systems

4.14.8.7.1 The MCO shall predominantly adopt a total cost of care model with shared savings for large Provider systems to the maximum extent feasible, and as further defined by the DHHS Medicaid APM Strategy.

4.14.8.10 Alignment with Existing Alternative Payment Models and Promotion of Integration with Behavioral Health

4.14.8.10.1 The MCO shall align APM offerings to current and emerging APMs in NH, both within Medicaid and across other payers (e.g., Medicare and commercial shared savings arrangements) to reduce Provider burden and promote the integration of Behavioral Health.

4.14.8.10.2 [Amendment #5:] The MCO ~~shall~~ may incorporate APM design elements into its Qualifying APMs that permit Participating Providers to attest to participation in an "Other Payer Advanced APM" (including but not limited to a Medicaid Medical Home Model) under the requirements of the Quality Payment Program as set forth by the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA).

6.12.1.1 [Amendment #3:] The MCO capitation rates reflect a target medical loss ratio (MLR) which measures the projected medical service costs as a percentage of the total MCO capitation rates. The risk corridor would limit MCO gains and losses if the actual MLR is different than the target MLR.

6.12.1.2 [Amendment #3:] The MCM program target MLR for at-risk services is 89.6% for Standard Medicaid and 88.7% for GAHCP based on the September 2019 to June 2020 projected enrollment distribution. Target MLRs will be calculated separately for each MCO based on their actual enrollment mix by rate cell.

6.12.1.4 [Amendment #3:] The settlement will be done separately for the Standard Medicaid and GAHCP populations.

6.12.1.5 [Amendment #3:] Other MCM program risk mitigation provisions will apply prior to the risk corridor (i.e., Boston Children's Hospital risk pool, high cost patient stop loss arrangement, and prospective risk adjustment).

6.12.1.6 [Amendment #3:] The numerator of each MCO's actual MLR will include all payments made to providers, such as fee-for-service payments, subcapitation payments, incentive payments, and settlement payments.

The 85% minimum MLR provision is adjudicated using federal MLR reporting rules, which produce a different MLR than the MLR calculated for risk corridor settlement purposes.

6.12.1.9 [Amendment #3:] The timing of the risk corridor settlement will occur after the contract year is closed and substantial paid claims runout is available.

6.12.2 [Amendment #4:] Subject to CMS approval, DHHS shall implement a risk corridor as described in Table 1, for the July 2020 to June 2021 (SFY 2021) contract period to address the uncertainty of future medical costs given the COVID-19 pandemic.

6.12.2.2 [Amendment #4:] The MCM program target MLR for at-risk services is 89.5% for Standard Medicaid and 88.6% for GAHCP based on the July 2020 to June 2021 projected enrollment distribution. 7.2.2 This Agreement may be terminated for convenience by either the MCO or DHHS as of the last day of any month upon no less than one-hundred twenty (120) business days prior written notice to the other party.

7.4.2 If all financial obligations of the MCO have been satisfied, amounts due to the MCO for unpaid premiums, risk settlement, High Dollar Stop Loss, shall be paid to the MCO within one (1) year of date of termination of the Agreement.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$1,209,229,580 from \$4,718,828,874 to \$5,928,058,454 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and effective July 1, 2023, subject to Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 67.47% of the price limitation increase, the other non-federal fund share is 15.69%, and the general fund is 16.84% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	65.4%	1.4%	33.2%
Standard Medicaid Population (Medicaid Care Management)	50.9%	22.6%	26.5%
NOTE New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points through September 2023; and 1.5 percentage points through December 2023).			

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 7

amended on December 08, 2021 (Item #6-1), as amended on June 15, 2022 (Item # Tabled Item 20A), and as amended on December 21, 2022 (Item #13A).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2024 and 2025, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments; however, the Department has received authorization from CMS for the 14-month rating period and related costs in these Amendment #10 contracts given the end of the MCOs' contract terms scheduled to expire August 31, 2024. During typical rating cycles, rates are updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2024 and two months of SFY2025.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request covers the rating period of July 1, 2023 through August 31, 2024. The methodology used to develop the previous Amendment #9 SFY 2023 capitation rates is largely consistent with the capitation rate methodology in this Amendment #10.

With the end of Continuous Coverage as of March 31, 2023 and the federal Public Health Emergency (PHE) on May 11, 2023, the full 6.2% enhanced Federal Medical Assistance Percentage (FMAP) received under the Families First Coronavirus Response Act available to states like New Hampshire has ended as of March 31, 2023. New Hampshire is eligible for phase-down of the enhanced Federal Medical Assistance Percentage (FMAP) 2.5 percentage points April through September 2023; and 1.5 percentage points October through December 2023.

Coinciding with the end of continuous coverage, enrollment is expected to be lower in the 14-month rating period compared to SFY 2023. As of March 31, 2023 just over 103,000 enrollees were protected from redeterminations of eligibility due to continuous enrollment coverage. Full regular eligibility operations commenced effective April 1, 2023. As of May 29, 2021 Medicaid enrollment stood at 210,074, down from the peak of 251,357 at the end of March 2023.

For Amendment #10 relative to the rates, key changes include:

1. The Rate Year (RY) 2024 MCM capitation rates cover the July 1, 2023 through August 31, 2024 period to accommodate the start of a new MCO contract that will be effective September 1, 2024.
2. Capitation rates include a preliminary acuity adjustment increase due to the enrollment mix changes based on the Department's unwind process, and will be updated in Amendment #11 capitation rates based on experience. Specifically, a greater number of lower acuity individuals are expected to become ineligible as compared to higher acuity people. The Department anticipates about 80% of Medicaid protected enrollees will have gone through the redetermination unwind process by October 1, 2023.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 7

3. The increase cited above in the capitation rate is, however, offset entirely by the updated base encounter data in Standard Medicaid and GAHCP. Specifically, the transition from CY 2019 to SFY 2022 MCO encounter base experience data, and inclusion of non-CMHC encounter data for the GAHCP population enrolled in a behavioral health rate cell, so as not to reduce funding supporting CMHC workforce availability and beneficiary access.
4. The RY 2024 capitation rates include directed payments to community mental health centers (CMHCs), critical access hospitals (CAHs), state-owned hospitals for professional psychiatric services, and children's hospitals (subject to CMS approval); these amounts are included in the MCO capitation rates. MCOs are not at-risk for the amount of these directed payments. Per member cost increases outlined in Table 2 for the directed payment to CAHs is largely a function of the pool of dollars spread over the lower enrollment expected in RY 2024.
5. An overall 7.7% administrative cost allowance for the Standard Medicaid population, an increase by 0.1% from Amendment #9, and 8.6% for the GAHCP population; an increase of 0.2%; however, the total spending for administrative costs is projected to decline from \$8.7 million a month in SFY 2023 to \$6.8 million a month in RY 2024 under this amendment.
6. In RY 2024, the MCOs' targeted medical loss ratio (MLR) for at-risk services of 90.8% for the Standard Medicaid population and 89.9% for the GAHCP population are based on projected enrollment distribution for the rating period; a 1.5% risk margin is applied as a percentage of revenue prior to the directed payments and the 2% premium tax allowance; and includes a continuation of the risk corridor.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. The current GAHCP is subject to a reauthorization as of December 31, 2023. Both the House and Senate have legislation to reauthorize, though for different lengths of time.

State House

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into Retroactive amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$245,113,188 from \$4,473,715,686 to \$4,718,828,874 (for the period since contract inception September 2019), with no change to the completion date of August 31, 2024, and effective retroactive to July 1, 2022, upon Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect. The federal fund share comprises 81% of the price limitation increase, the other non-federal fund share is 12%, and the general fund is 7% from the previous Amendment.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 128-AA:3, I)	0%
Child Health Insurance Program (CHIP)	69.34%	1.07%	29.59%
Standard Medicaid Population (Medicaid Care Management)	53.6%	22.4%	24.00%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020 (Item #8), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), as

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 6

amended on December 08, 2021 (Item #6-1), and as amended on June 15, 2022 (Item # Tabled Item 20A).

Funds are available in the accounts outlined in the attached fiscal details and are available in the State Fiscal Year (SFY) 2023, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

The Centers for Medicare & Medicaid Services (CMS) requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is Retroactive because it covers the rating period of July 1, 2022 through June 30, 2023. The methodology used to develop the previous Amendment #8 SFY 2023 capitation rates is largely consistent with the capitation rate methodology in this Amendment #9.

The federal Public Health Emergency (PHE) continues to have an impact on program costs. In order for states to receive the 6.2% enhanced Federal Medical Assistance Percentage (FMAP) the Families First Coronavirus Response Act requires continuous enrollment by states for individuals who were or became Medicaid eligible since March 13, 2020 through at least April 2023. The PHE end date was not noticed on November 12, 2022, so an end of the PHE in January is off the table unless there is Congressional intervention. The PHE, therefore, is likely to run through April 2023.

As of the beginning of December, the NH Medicaid program has 100,481 individuals protected from disenrollment due to continuous enrollment, out of an enrollment of over 246,616 as of December 5, 2022. Absent the continuous enrollment requirement, as of November 30, 2022, more than 29,000 people are known to be ineligible based on completed redeterminations of eligibility (or nearly 12% of current enrollees). Another nearly 35,000 individuals are potentially ineligible since they have not yet completed an annual redetermination of eligibility, which is not required during the PHE. Over 36,000 are both overdue in completing a redetermination and potentially ineligible based on yet to be verified information available to DHHS. Any material disenrollment is unlikely in this rate year, and is likely to begin no earlier than May 1, 2023.

While the State continues to receive 6.2% enhanced FMAP on certain Medicaid expenditures, the enhanced federal payment excludes the NH Granite Advantage Health Care Program at 90% FMAP already, and where enrollment growth for NH has been the greatest both on a percentage (81.6%), and an absolute enrollment growth basis (41,924) since mid-March 2020. For Amendment #9 relative to the rates:

1. An end of year retroactive non-budget neutral rate adjustment based on actual enrollment was not actuarially made by the State's actuary, as the acuity impact is very likely de minimis.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 6

2. Rates are calibrated to reflect a PHE end date in April 2023. Once ended, beneficiaries whose eligibility determination shows they no longer meet eligibility criteria will be disenrolled from Medicaid as Federal guidance permits. In order to minimize gaps in healthcare coverage, DHHS, the MCOs, providers and other stakeholders are working to engage beneficiaries. The disenrollment activity is expected to reduce program membership and related costs over the course of the unwind enrollment period.
3. The rates per person aggregate modestly decrease, while the price limitation has increased to reflect the much higher than anticipated enrollment related to the PHE continuing. Generally, states anticipate that when the PHE disenrollment commences, the premiums will rise per person, but the number of people enrolled will decline. Over time, this will lead to lower contract price limitations due to declining enrollment. The enrollment decline and related cost-savings will be realized from exiting individuals who generally have lower illness burden and lower healthcare costs.
4. Tables 1A and 1B in the Appendix depict monthly capitation rates, by major population eligibility groups, and the percent change from the prior Amendment. The rates in Table 1A exclude directed payments which are fixed costs, while Table 1B includes the fixed costs. The price limitation change is calculated off of the Table 1B capitation rates. The rates in the aggregate decline favorably by 0.7% for standard and 2.4% for the GAHCP. Taken together, standard and GAHCP capitation rates decline favorably by 1.5%.
5. Table 2 lays out the capitation rate change components. The top half of the chart shows program changes that increased costs unfavorably by \$7.15 million. The two largest changes are related to legislation enacted into law in the recent legislative session to improve birthing services and ambulance rates. The third largest captures professional billing for Medicaid at state-owned psychiatric facilities. The bottom half of the chart reflects the actuarial rating adjustments that lowered costs by \$27.56 million. The three largest changes are an acuity adjustment, fixed costs that do not increase with the increase in enrollment, and staffed bed constraints in psychiatric capacity.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

His Excellency, Governor Christopher T. Sununu

State House

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$1,127,921,908 from \$3,345,793,778 to \$4,473,715,686, with no change to the completion date of August 31, 2024, and effective July 1, 2022, upon Governor and Council approval. All terms and conditions of the contract and prior amendment not inconsistent with this Amendment remain in full force and effect.

Funding sources are as follows:

	Federal	Other / Agency Income	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	66.1%	1.6%	32.3%
Standard Medicaid Population (Medicaid Care Management)	52.7%	22.2%	25.1%
NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements.			

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

(Item #6), January 22, 2021 (Item #9), as amended on June 30, 2021 (Item # Tabled Item 8A), and as amended on December 08, 2021 (Item #6-1).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY) 2023, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2023.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request covers the rating period of July 1, 2022, through June 30, 2023. There are three key purposes for this amendment. They are:

1. Amendment #8 Target Medical Loss Ratio, Administrative Allowance, and Rates

- The Department's actuary projects an overall MCO medical loss ratio (MLR) for at-risk services of 90.8% for the Standard Medicaid population and 90.1% for the GAHCP population in SFY 2023, which includes the rate development highlights below.
 - An overall 7.7% administrative cost allowance for the Standard Medicaid population, and 8.4% for the GAHCP population; representing a reduction in percentages from SFY 2022 as funding remains consistent with the current contract period.
 - A 1.5% risk margin applied as a percentage of revenue prior to the directed payments and the 2.0% premium tax allowance.
 - The composite capitation rates shown are based on DHHS projections of MCO enrollment for SFY 2023, which include considerations for the unwind process following the end of the Public Health Emergency (PHE) with enrollment returning to near pre-PHE levels by March 2023. It is likely in the future Amendment #9 that enrollment will need to be recalibrated if the federal government continues to extend the federal PHE.
- Included in the Appendix to this letter:
 - Table 1A shows the rate impact excluding directed payments, as well as with and without the SMI/SED (Severely Mentally Ill/Severely Emotionally Disturbed) 1115 waiver amendment to the Substance Use Disorder Treatment and Recovery Access (SUD-TRA) Demonstration at 3.8% to the total composite rate.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 8

- o Table 1B takes into account directed payments and reflects a change of 1.8%.
- o Table 2 shows the component changes leading to the 1.8% increase in composite rate.
- o The price limitation is \$168,631,814 less than SFY 2022 (prior to any legislation enacted after the contract date).

2. Risk Mitigation Structure

- Retrospective acuity adjustment due to the uncertainty surrounding the continuous membership unwind process following the end of the PHE as authorized by the Center for Medicare and Medicaid Services (CMS) Division of Managed Care Policy on May 11, 2022. The purpose is to appropriately account for this uncertainty; DHHS will implement a non-budget neutral retroactive acuity adjustment to include a preliminary acuity assumption that will be updated following the contract year to reflect the actual population covered throughout SFY 2023; the preliminary risk adjustment for the expected enrollment composition changes the amount to an \$11.9 million increase.

- Minimum and maximum medical loss ratio (MLR) remains in effect for SFY 2023, to protect against a windfall or underfunding of services within the Program.

The minimum MLR is set on a program-wide basis for each major population, such that maximum profit achievable is 4%, which is equal to the 1.5% target margin plus the amount between the target MLR and the minimum MLR (2.5%). Based on the target MLRs, the minimum MLR will be 88.3% for the Standard Medicaid population and 87.6% for the GAHCP population.

The maximum MLR is also set on a program-wide basis for each major population 3.5% above the target MLR, such that MCOs will have a maximum loss of 2.0%. Based on the target MLRs the maximum MLR will be 94.3% for the Standard Medicaid population and 93.6% for the GAHCP population.

The final minimum and maximum MLRs for Standard Medicaid and GAHCP will be updated for the final retroactive acuity factor and any other changes implemented covering the amendment period starting January 2023.

- Other existing adjustment factors risk-neutral to the State continue in the Program. The risk mitigation structure is consistent with the structure included in the SFY 2022 capitation rates with the one modification to include a retrospective acuity adjustment that addresses uncertainty caused by the end of the PHE.
- On page 9 of the 2022-2023 Medicaid Managed Care Rate Development Guide, "CMS recommends all states implement a 2-sided risk mitigation strategy for rating periods impacted by the Public Health Emergency." Due to population and cost uncertainty related to the ongoing PHE and the anticipated enrollment redetermination process.

3. Other Program Rate Adjustments

- SFY 2023 component changes in Table 2 (see Appendix) are expressed relative to the same components in the SFY 2022 rates.
- Incorporation of the Institution for Mental Disease (IMD) SMI/SED Waiver effective July 1, 2022 (pending CMS approval), DHHS will implement its SMI/SED (Severely

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 8

Mentally Ill/Severely Emotionally Disturbed) 1115 waiver amendment to the Substance Use Disorder Treatment and Recovery Access (SUD-TRA) Demonstration.

The waiver amendment allows DHHS to claim additional federal matching funds for Medicaid enrollees aged 21 through 64 years treated in an Institution for Mental Disease (IMD), including at New Hampshire Hospital and Hampstead Hospital for lengths-of-stay greater than 15 days and no more than 60 days for an individual (the average length-of-stay for all beneficiaries cannot exceed 30 days).

- Medical trend adjustment since the start of the COVID-19 pandemic and PHE, service utilization levels in the Medicaid program have lagged behind CY 2019 utilization by rate cell and on an aggregate basis; therefore, capitation rates assume SFY 2023 utilization levels will be consistent with CY 2019. As such, utilization trends from CY 2019 to SFY 2023 remain constant with the exception of Applied Behavioral Analysis (ABA) services with an annual trend rate from CY 2019 to SFY 2023 at 21.7%. ABA services are an evidence-based consultation, assessment and treatment option for children with autism spectrum disorder or other developmental conditions that can improve social, communication, and learning skills.
- Preliminary acuity adjustment is an increase because it reduces costs by a lower amount in SFY 2023 than SFY 2022 largely due to the current estimate of enrollment timing and trajectory during the PHE unwind.
- Pharmacy trend and savings. The pharmacy trend assumptions in Table 2 are based on a combination of historical New Hampshire Medicaid data analysis, Milliman's research on utilization and cost trends, and publicly available trend reports and forecasts.

Pharmacy savings were shown in the preferred drug list (PDL) analysis. The pharmacy savings analysis undertaken for this amendment included savings related to adjustments for prescribing efficiency opportunities for several drug classes related to asthma, HIV, and autoimmune disorders. The savings amounted to \$907,740 for the rating period, though the savings were less than SFY 2022 resulting in a cost increase for this line item. Lastly, the J-code class of injectable drugs reflects market trends.

- Opioid addiction treatment trend adjustment to the base experience data underlying the MCM capitation rates to account for the estimated change in both prevalence and cost of treatment for the opioid addiction treatment population. Based on the Actuary's review of SFY 2015 through October 2021 MCO encounter data, they determined the proportion of opioid addiction population started to decrease for several rate cells. This decrease in the proportion of opioid addiction population results in adjustments of less than 1.00 for several rate cells.
- Directed payment adjustment to remove the completed SFY 2022 HCBS (Home and Community Based Service) payments related to time limited American Rescue Plan enhanced FMAP for HCBS.
- Funding for 14 additional Community Residential Beds coming into service. Expanded services to fund an additional 14-bed community residential services at roughly \$958,000 (including administration, premium tax and margin).

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 8

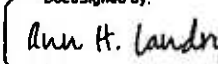

- Reimbursement adjustments to reflect recent or expected changes in the Medicaid Fee-for-Service (FFS) provider fee schedule based on Medicare Fee Schedule changes including:
 - Current Ambulatory Surgical Center fee schedule effective January 1, 2022;
 - Professional and other services fee schedules effective January 1, 2022; and
 - J-code repricing effective July 1, 2022, and other routine fee schedule updates.
- Other adjustments included in the rate change driver table (Table 2) for the SFY 2023 rates:
 - Base data update (e.g., lower/higher incurred but not reported (IBNR) expenses than previously estimated);
 - Enrollment projection impact on fixed dollar items (e.g., Community Mental Health Agreement funding);
 - Changes in FFS fee schedule from SFY 2022 to SFY 2023;
 - Refreshed financial data items from the MCOs (e.g., provider incentive payments);
 - Changes in enrollment information (e.g., retroactive change in rate cell assignment);
 - Changes in stop loss attachment point for high-cost member claims; and
 - Changes in program effective dates (e.g., Behavioral Health Crisis Treatment Centers (BHCTC), genetic testing)

.....

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. In the event the contract is not approved before June 30, 2022, the available federally permitted retroactive risk adjustment mitigation to account for the uncertainty of the PHE unwind will not be available to New Hampshire.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by increasing the total price limitation by \$107,893,151 from \$3,237,900,627 to \$3,345,793,778, with no change to the completion date of August 31, 2024, and effective retroactive to July 1, 2021 upon Governor and Council approval. Funding sources are as follows:

	Federal	Other	General
Granite Advantage Health Program (GAHCP)	90%	10% (as defined in RSA 126-AA:3, I)	0%
Child Health Insurance Program (CHIP)	67.40%	0%	32.60%
Standard Medicaid Population (Medicaid Care Management)	53.57%	0%	46.43%

NOTE: An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population and 4.34% of FMAP for the Children's Health Insurance Program (CHIP) population remains available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. Additionally, the American Rescue Plan of 2021 potentially provides an additional 10% FMAP for a one year period (April 1, 2021-March 31, 2022) for certain home and community based services (HCBS) covered in this contract based on an approved Centers for Medicare and Medicaid Services (CMS) HCBS spending plan. The Department will request Fiscal Committee approval to accept and expend additional amounts for January 2022 forward. The adjusted price limitation, given the enhanced FMAP and provisions in HB 2, should be sufficient to stay within the budget for SFY 2022. Legislation under consideration by Congress could impact the CHIP and Standard Federal share amounts.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), June 10, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 4

(Item #6), January 22, 2021 (Item #9), and as amended on June 30, 2021 (Item # Tabled Item 8A).

Funds are available in the accounts outlined in the attached fiscal details and are anticipated to be available in the State Fiscal Year (SFY)2022, with authority to adjust amounts within the price limitation between SFYs through the Budget Office, if needed and justified.

CMS requires managed care rate certifications be completed on a 12-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each SFY and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the Legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for SFYs 2020-2022.

See attached fiscal details.

Fiscal table budget amounts reflect more current utilization and enrollment experience, as well as enhanced FMAP available and accepted to date. Adjustments to administrative costs, program changes, and legislatively approved rate increases are also included.

EXPLANATION

This request is **Retroactive** because it covers the rating period of July 1, 2021, through June 30, 2022. There are three key purposes for this amendment:

- First, is to incorporate the impact of acuity (i.e., the measure of beneficiaries' collective medical conditions) due to an increase in new enrollment as the result of an extended federal public health emergency and extended continuous enrollment. Generally, there has been a decrease in acuity that moderates claims expense costs compared to the rates approved under Amendment #6;
- Second, is to incorporate the increased costs of legislative changes from both federal legislation and state actions in the most recent legislative session; and
- Third, is to incorporate fee schedule updates, and an adjustment for pharmacy management.

Further Explanation

Amendment #7 adjusts the SFY 2022 capitation rates. The Department's contracted actuary, Milliman, projects an overall MCO medical loss ratio (MLR) for at-risk services of 90.7% for the Standard Medicaid population and 90.0% for the GAHCP population in SFY 2022, which includes the rate development highlights below.

Milliman used the following methodology to develop the New Hampshire MCM program capitation rates:

1. Rate methodology

The methodology used to develop the Amendment #7 SFY 2022 MCM capitation rates is consistent with the Amendment #6 capitation rate methodology.

2. Changes in enrollment

CMS instructed the Department to review emerging enrollment and Public Health Emergency (PHE) conditions for Amendment #7. The updated capitation rates are based

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 4

on the Department's updated projections of MCO enrollment for SFY 2022 which include continued enrollment growth through SFY 2022.

3. Acuity adjustment

For the Amendment #7 SFY 2022 MCM capitation rates, Milliman updated the acuity adjustment factors taking into account the nature of the new enrollment compared to historical enrolled individuals.

4. Federal and State Legislative actions

a. Home and community based services (HCBS) enhanced federal funding

HCBS directed payments available under Section 9817 of the American Rescue Plan Act (ARPA) provide enhanced federal funding for state Medicaid spending on home and community based services. Beginning April 1, 2021, through March 31, 2022, states are eligible to receive a ten (10) percentage point increase in their FMAP for specified HCBS services. In order to claim the enhanced FMAP eligible under the MCO contracts, the Department is proposing to implement a new directed payment initiative estimated at \$28 million for certain eligible HCBS state plan services (pending CMS approval). Rates for directed payments do not include an additional allowance for administrative expense or risk margin for this addition. The directed payment is subject to premium tax.

b. State Legislative benefit updates

i. Home visiting services for pregnant women and infants ages 0-1 year consistent with HB 2 beginning October 1, 2021, were prorated 9-months at estimated annual costs of \$1.853 million.

ii. Genetic testing reimbursement for hospitals in accordance with HB 600.

5. Fee schedule updates, include:

a. DRG inpatient hospital unit cost trend updates using the actual 2022 DRG weights effective October 1, 2021. A review of the newly released weights suggests a 0.0% unit cost trend between 2021 and 2022 compared to the Amendment #6 assumption of a 0.56% increase based on historical data.

b. Neuro-psychiatric testing codes within the Calendar Year 2021 fee schedule included a number of incorrect entries for several neuro-psychiatric testing codes which prompted an update to reimbursement adjustment factors. The estimated impact of the correction is an increase of approximately \$135,000 for SFY 2022.

c. Other fee schedule changes, include:

i. Unit cost adjustment for latex gloves and a fee schedule update for vaccine administration account for an additional \$310,000 in SFY 2022.

ii. New durable medical equipment (DME) and supplies (breast milk storage bags, peristeen pumps) with annual costs estimated at \$280,200 and \$135,000, respectively (effective October 1, 2021).

iii. Behavioral health crisis treatment center program services transferring to the State's redesigned Mobile Crisis Response Program.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 4

- iv. Preferred drug list (PDL) updates to include different formulations of drugs already included on the PDL.
- v. Community residential services beds service projection updates.

6. Prescription drug savings adjustments

An adjustment to rates is included to account for differences in MCO pharmacy management (e.g., adherence to generally accepted quantity limits for three (3) therapeutic classes, opioid prescribing patterns, prior authorization denial rates) with annual savings of \$1.59 million incorporated into the rates.

Area served: Statewide.

In the event that the non-federal Other funds for the GAHCP are insufficient to cover the program, the projected shortfall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session. In the event the contract is not approved, available federal relief to HCBS providers and their direct care workers would not be available.

Respectfully submitted,

If the additional funding is received the Department will request Fiscal Committee authority to accept, and expend additional amounts for January 2022 forward.

EXPLANATION

Summary of Key Changes

Exhibit A. Program Change Summary:

1. A carry forward of staffing requirements from amendment #5
2. Added provision that Members shall not be required to change covered prescription drugs more than once per calendar year, with limited exceptions.
3. Further extension of additional preferential auto-assignment awards for high-performing MCO(s) consistent with Alvarez & Marsal's report recommendation incorporated initially the last MCO contract amendment.
4. New CMS Managed Care Rule provisions effective July 1, 2021 concerning beneficiary/member rights.
5. Update to the National Committee for Quality Assurance (NCQA) reporting compliance requirements.
6. New Directed Payment for Community Residential Services provided by Community Mental Health Centers (CMHCs) and Psychiatric Designated Receiving Facilities (DRFs); continuation of Directed Payments for Durable Medical Equipment (DME), CMHCs, and Critical Access Hospitals (CAHs).
7. The inclusion of CMS requested language for historical directed payments terms.
8. Elimination of risk corridor and replacement with Minimum and Maximum Medical Loss Ratios (MLRs), the effect of which reduces the state's risk compared to the SFY 2020 and 2021 Risk Corridors. The state has greater enrollment risk due to the unpredictable length of the federal public health emergency.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 3 of 5

9. The minimum MLR is set at 88.2% for the Standard Medicaid population and 87.4% for the Granite Advantage Health Care Program (GAHCP) population. The maximum MLR shall be 94.2% for the Standard Medicaid population and 93.4% for the GAHCP population.

10. Any incentive payments made to higher-performing MCOs as part of the Withhold and Incentive Program shall not impact the minimum or maximum MLR provision of the contract.

11. For the period July 1, 2021 through June 30, 2022 rating period, MCOs will receive a one-time kick payment for each Member psychiatric admission stay with DRG code 880-887 subject to limited exceptions.

12. Sets the MCO administrative allowance for SFY 2022 at the 40th percentile, or \$35.78 PMPM (Per Member Per Month) SFY 21 had a blended administrative allowance of \$37.00 PMPM.

The state's actuary Milliman used the following methodology to develop the New Hampshire MCM program capitation rates:

1. Summarize CY 2018 and CY 2019 MCO encounter experience data for the Standard Medicaid and GAHCP Medically Frail eligible population and the March 2019 to December 2019 MCO encounter data for the GAHCP Non-Medically Frail population.
2. Project estimated statewide SFY 2022 MCM program medical costs for all covered services by rate cell.
3. Blend the projected SFY 2022 costs based on CY 2018 and CY 2019 encounter data.
4. Adjust SFY 2022 projected medical costs for all rate cells for benefits not included in the base experience data, expected administrative expenses, margin, and premium tax.

Medicaid enrollment is projected to remain elevated through the end of the federal Department of Health and Human Services declared PHE. There still exists uncertainty related to the end of the PHE. As such, Milliman prepared two (2) separate enrollment scenarios: 1) the PHE ends December 2021, and 2) the PHE ends September 2021:

- Each scenario assumes enrollment returning to pre-COVID levels due to the reinstatement of eligibility redetermination activities three (3) months following the end of the PHE.
- The changes in enrollment are anticipated to impact the average acuity of beneficiaries. For rate cells modeled to have significant enrollment differences due to the PHE; newer enrollees having lower illness burden, the rate development includes an acuity adjustment for each scenario.
- The Department will initially pay capitation rates based on the December 2021 scenario, but will retroactively pay capitation rates under the September 2021 scenario if the PHE ends prior to October 1, 2021.

The capitation rates do not include provisions for expected vaccination administration fees related to COVID-19 in SFY 2022. The cost of vaccination administration fees remain carved out of the MCM program. Based on the interplay of other funding sources. The SFY 2022 capitation rates do not include any explicit adjustments for the following:

- COVID-19 Testing and Treatment Cost: The prevalence of COVID-19 infection rates in SFY 2022 is dependent on many variables that make it difficult to predict to include an

estimate for the cost of testing for and treating individuals with COVID-19 including, but not limited to:

- The take-up rate and timing of COVID-19 vaccinations;
- The emergence of COVID-19 variants and the efficacy of vaccines on these variants; and
- The implementation of social distancing measures.

Milliman advises, there is not a publicly available model that includes COVID-19 infection rate or hospital admissions through June 2022. In addition, the publicly available models have materially changed short-term and long-term projections of COVID-19 prevalence in reaction to emerging data. While Milliman reviewed historical MCM data for the cost of testing and treating COVID-19 in CY 2020, given the unpredictable patterns of COVID-19 prevalence to date in New Hampshire and the changing national models there is a range of potential impacts on the SFY 2022 rates.

The most significant fiscal impact of COVID-19 to date has been the deferral of non-essential services, either through government-enacted policies, the impact of social distancing on the administration of services, or personal choice. Milliman reviewed MCM emerging claims data incurred through February 2021 by population type (to remove the impact of membership mix changes). As of February 2021, there was still measurable reductions in claim costs for each population compared to the PMPMs prior to the pandemic in CY 2019. However, Milliman advises it is difficult to use this historical data to project the impact of deferred services for SFY 2022 for many reasons.

- Utilization by service category has varied in CY 2020 and early CY 2021 as the level of COVID-19 diagnoses and hospital admissions has changed in New Hampshire over the course of the pandemic. Therefore, the unknown future prevalence of COVID-19 will be a key variable in future service utilization changes relative to pre-pandemic levels.
- Limited data is available to understand how beneficiary behavior will change during and after the roll-out of the COVID-19 vaccination. As such, there could still be a wide range of possibilities as to when service utilization may return to pre-pandemic levels or if there will be increased utilization due to pent up demand.
- In the MCM data Milliman reviewed it is difficult to isolate the impact of deferred services from changes in utilization due to other drivers, such as member acuity changes or change in service mix.

In response to the pandemic, the mix of services used to treat patients has changed, such as the use of telehealth services. It is unknown if these provider and patient changes will persist after the end of the pandemic.

December 30, 2020

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services, to enter into **Retroactive** amendments to existing contracts with AmeriHealth Caritas New Hampshire Inc., Philadelphia, PA; Boston Medical Center Health Plan Inc., Charlestown, MA; and Granite State Health Plan Inc., Bedford NH, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), by decreasing the total shared price limitation by \$128,374,314 from \$2,177,614,370 to \$2,049,240,056, with no change to the completion date of August 31, 2024 effective retroactive to July 1, 2020 upon Governor and Council approval.

Funds for Granite Advantage Health Program (GAHCP) are 90% Federal and 10% Other (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 74.23% Federal and 25.77% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 52.5% Federal, 24.15% General and 23.35% Other funds. An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population could become available if the Public Health Emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. If the forgoing materialize, DHHS would go to the Fiscal Committee to increase, accept, and expend amounts for January 2021 forward.

The original contracts were approved by Governor and Council on March 27, 2019, (Tabled Late Item A). They were subsequently amended with Governor and Council approval on April 17, 2019, (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A), and most recently amended with Governor and Council approval on June 10, 2020 (Item #6).

Funds are available in the accounts outlined in the financial section for State Fiscal Year 2021, and are anticipated to be available in the State Fiscal Years 2022 through 2025, with authority to adjust amounts within the price limitation between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align with the state budget process is included in the chart of accounts exhibit that follows. For these reasons, expenditures for the program are identified only for State Fiscal Years 2020-2021.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 3

See attached fiscal details.

EXPLANATION

This request is **Retroactive** because this Amendment covers the retrospective rating period July 1, 2020 through June 30, 2021. The State negotiated in the original SFY2021 rates the opportunity to refresh actuarial estimates. The State was able to use this added flexibility from CMS due to the Public Health Emergency, uncertainties related to COVID-19 treatment and costs, and utilization impact on non-COVID services. The most material initial actuarial estimate was for the costs of deferred care from the prior contract period. As the Public Health Emergency has continued this became a key assumption to revisit as has the enrollment and the composition thereof.

Fiscal table budget amounts reflect more current utilization and enrollment experience, enhanced FMAP available and accepted thus far. Adjustments to administrative costs, program changes and legislatively approved rate increases are included as well.

CMS published a new Medicaid Managed Care rule in November 2020 with provisions effective either December 14, 2020 or July 1, 2021. Those provisions taking effect in December 2020 are incorporated herein and are procedural rather than economic in impact to this Agreement.

Summary of Key Changes

The reduction in price limitation reflects a slightly less steep enrollment growth based on the State of New Hampshire's employment recovery with a greater than expected length of the PHE and maintenance of effort required to earn the enhanced FMAP. DHHS had forecast average monthly enrollment for the contract year of just over 215,000 people, whereas based on experience DHHS now forecast about 208,000 people. This reduction along with a 3% reduction globally in the capitation rates to be paid to the MCOs accounts for the favorable price limitation change.

The 3% capitation rate reduction is a function of net changes; totaling \$38,077,712. The single largest favorable change is related to more favorable COVID-19 cost experience of \$30,774,811. Rather than a 1.2% increase in this SFY 21 period for care deferred care before June 30, 2020, the adjustment for the full twelve month period is a 1.3% decrease.

The second largest favorable adjustment is for MCO administrative costs of \$17,406,265 (or 2.5% of capitation excluding directed payments and premium tax) for the period of January through June, 2021. This reduction reflects an analysis of what the PHE has permitted the MCOs to implement under the contract, what is likely to be able to be advanced in this period given an extension of the PHE due to waves of COVID-19 surge as well as recalibration of those activities where the return on investment looks longer than anticipated back when the contract was developed.

These and other administrative allowance adjustments represent an adjusted administrative allowance consistent with the 50th percentile for the full period (previously, the 75th percentile) and the 32nd percentile for the last six months. Administrative cost benchmarks of other Medicaid managed care plans and within the MCM program were assessed by the state's actuaries.

Offsetting these two key favorable cost adjustments are increases related to the HB4 3.1% provider rate increase amounting to \$13,775,736 for the period January through June 2021 and an increase in the Boston Children's Hospital risk pool of \$4,847,238 for the full twelve month period

reflecting more recent reported experience, other changes can be seen in Table A. The resulting composite capitation rates can be seen in Table B; the net is a 3% reduction.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 90% Federal and 10% Other; funds for the Child Health Insurance Program are 74.23% federal as appropriated by Congress and 25.77% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 52.50% Federal as appropriated by Congress, 24.15% General and 23.35% Other funds.

In the event that the non-federal Other funds for the GAHCP necessary to cover the program are not sufficient, the projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to retroactively amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schrafft's City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM), and by increasing the shared price limitation by \$1,361,049,281 from \$816,565,089 to an amount not to exceed \$2,177,614,370, with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval.

Funds for Granite Advantage Health Program (GAHCP) are 90% Federal and 10% Other (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 67.88% Federal and 32.12% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51.01% Federal, 22.56% General and 26.43% Other funds. An additional 6.2% of federal medical assistance percentage (FMAP) for the standard Medicaid population could become available if the public health emergency (PHE) continues. The Cares Act provides increased FMAP through the quarter the PHE ends so long as the State meets the maintenance of effort requirements. The funding percentage of the Child Health Insurance Program (CHIP) is already subject to enhancement through September 2020; the CARES Act would enhance that to 80.84% if the PHE continues into the first quarter of State Fiscal Year 2021. If the forgoing materialize, DHHS would go to the Fiscal Committee to increase, accept, and expend amounts.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9), December 18, 2019 (Item #15), May 20, 2020 (Item #7A).

Funds are available in the following accounts for State Fiscal Year 2021, and are anticipated to be available in the State Fiscal Years 2022 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align

EXPLANATION

This request covers the period July 1, 2020 through June 30, 2021 (prior contract period was a ten month period). The amounts herein make an initial actuarial estimate for the costs of deferred care from the prior contract period. The budget amounts in the fiscal tables reflect enrollment experience and trend as a result of the public health emergency and the maintenance of effort requirements. Thus far through May 22, 2020, from the date of the PHE, total enrollment has increased overall by more than 7% with the Granite Advantage Health Care Program (GAHCP) over 11%. For State Fiscal Year 2021, enrollment is projected to increase additionally 5.3% for the standard population and 16.5% for the GAHCP.

There is undoubtedly, a high level of uncertainty for future COVID-19 treatment and testing costs, and the acuity of the spike in new enrollment due to the effects of the COVID-19 and the PHE and related economic conditions. Additionally, the impacts on future utilization and deferred care, unrelated to COVID-19 are not reliably known. Therefore, DHHS proposes a retroactive actuarial rate refresh based on experience from the first quarter of the contract back to July 1, 2020 to incorporate more recent actuarial experience, HB 4 rate adjustments, and any further legislative policy changes. The retroactive actuarial rate refresh will necessitate another contract amendment anticipated in February 2021.

Summary of Changes

The amendment to the three (3) MCM capitated and risk-based vendor Agreements, including capitation rate adjustments for September 2019 to June 2020, and July 2020 through June 2021, as well as Exhibit A narrative contract changes, reflect the following changes:

The State Fiscal Year 2021 capitation rates below reflect three program changes from the September 2019 to June 2020 capitation rates.

They are:

1. Revised rate cell structure that incorporates the GAHCP Behavioral Health population into the existing Behavioral Health rate cells and a separate Children's Health Insurance Program (CHIP) rate cell;
2. Targeted savings opportunities through increased care management activities consistent with the MCM contract effective September 1, 2019; and
3. Implementation of a hospital directed payment to promote access to high-quality acute care services provided by critical access and non-critical access hospitals across New Hampshire.

The State Fiscal Year 2021 capitation rates include a continued five million dollar directed payment to community mental health centers (CMHCs), and a new thirty million dollar directed payment to hospitals (both subject to CMS approval). While the amounts are included in the MCO capitation rates, the MCOs are not at-risk for the amount of these directed payments. Both directed payments are included to support quality and access initiatives of the MCM Program.

Capitation Rate Tables 1A and 1B below show the statewide rate change by population compared to the September 2019 to June 2020 capitation rates included in the April 22, 2020 rate certification. The two tables compare rates with and without the new hospital directed payment.

Table 1A capitation rates exclude the new hospital directed payment.

The amendment also includes narrative and other content changes as described below.

They include:

1. Transitional housing program services and community residential services wrap-around services and supports benefit start date from July 1, 2020 to July 1, 2021;

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to retroactively amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schrafft's City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management (MCM). The shared price limitation remains unchanged, not to exceed \$816,565,089, in State Fiscal Year 2020, retroactive to September 1, 2019 with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval. After reconciliation of membership, however, we did a reallocation of funds within the price limitation as reflected in the accounting tables.

Funds for Granite Advantage Health Program are 93% Federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020 (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 77.6% Federal and 22.4% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal, 22.7% General and 26.3% Other funds.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9), and December 18, 2019 (Item #15).

Funds are available in the following accounts for State Fiscal Year 2020, and are anticipated to be available in the State Fiscal Years 2021 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

EXPLANATION

This request is retroactive to September 1, 2019 in order to reallocate 1.5% of the capitation payments to ensure access to care for Medicaid beneficiaries and help provide financial stability for safety-net providers. Network providers' provision of access to Medicaid beneficiaries could decrease without consideration of the impact of COVID-19. The directed payments described herein are intended to help, in part, providers remain available to beneficiaries and ensure network adequacy under CMS regulations.

In addition, this amendment will address the CMS requirement to strike contract language that directs administration and funds previously appropriated for the Granite Advantage Health Care Program's (GAHCP) community engagement requirements administered through the managed care contracts. This is because Community engagement requirements have been vacated by the court.

Summary of Changes

DHHS therefore proposes to make the following changes to components of the capitation rates in order to fund the proposed directed payment funding pool:

1. Reduce service costs by 1.5% for all services to recognize the expected net impact of reductions in non-emergency and elective service costs due to the COVID-19 pandemic social distancing guidelines, increased COVID-19 treatment costs, the impact of waiving certain prior authorization requirements, and reduced population acuity due to projected enrollment increases related to the recession
 - a. The MCOs have agreed to continue their capitation arrangement with the community mental health centers (CMHCs) at current payment levels and waive any related maintenance of effort (MOE) provisions for state fiscal year (SFY) 2020.
2. Reduce the per member per month (PMPM) administrative allowance for all rate cells by 1.5% to recognize that significantly fewer MCM program members are enrolled in care management programs compared to the 15% expectation in the MCM contract.
3. Further reduce the administrative allowance for the GAHCP Non-Medically Frail population by \$0.45 PMPM to remove costs related to the GAHCP work and community engagement requirement. The related funding is repurposed for the directed payment pool.
4. Reduce the gain/loss margin to reflect the shifting of revenue from at-risk services to the new non-risk directed payments. The gain/loss margin still represents 1.5% of at-risk revenue.
5. Calculate the amount available for the new directed payment funding pool, which is approximately \$11.7 million assuming the original projected enrollment level (i.e., not incorporating likely enrollment growth resulting from the recession).
6. The original CMHC directed payment remains unchanged.
7. The PMPM premium tax allowance remains unchanged because the capitation rates by rate cell are unchanged after the reallocation by component.

Safety-net Provider Directed Payments

Pending CMS approval, DHHS will require each MCO to pay a percentage distribution and initial allocation for specific qualifying services provided by the six safety-net provider classes based on January 2019 to June 2019 MCO encounter payments as described in Table 1 below.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

Table 1 New Hampshire Department of Health and Human Services Medicaid Care Management Program Initial Allocation of Directed Payment Sub-Pools			
Safety-net Provider Class	Percentage Distribution of January to June 2019 MCO Payments for Selected Services Only	Approximate September 2019 to June 2020 Direct Payment (Total) ¹	Approximate September 2019 to June 2020 Direct Payment (Monthly) ¹
FQHCs and RHCs	32.0%	\$3,744,000	\$374,400
Critical Access Hospitals	29.8%	3,486,600	348,660

Home Health	4.9%	573,300	57,330
Private Duty Nursing	8.8%	1,029,600	102,960
Personal Care	7.7%	900,900	90,090
Total Pool	100.0%	\$11,700,000	\$1,170,000

¹ Approximate values of the direct payment pool are based on the initial enrollment projections in the January 14, 2020 rate setting report. Actual monthly pool funding will be determined by actual MCM program enrollment multiplied by the PMPM directed payment funding for each rate cell in the September 2019 to June 2020 MCM program capitation rates.

An identified portion of the actuarially sound per member per month capitation payment to the MCOs multiplied by the member months the plan is paid for the month will form a pool to be used every month to make percentage add-on payments to the defined safety-net provider classes. The pool will be 1.5% of the capitation payments made to the MCOs, or approximately \$12 million for the September 2019 to June 2020 contract year (depending on actual enrollment). DHHS will establish the percentage of the pool that will be allocated to a separate sub-pool for each of the six safety-net provider classes based on historical MCO payments to these providers.

At the end of the month, the amount in each sub-pool will be divided by the payments made by the MCOs to the defined safety-net provider class for qualifying services adjudicated in the month. This calculation will determine the amount of the uniform percentage add-on for the month. The additional payments will be sent to the safety-net providers in the following month. It is anticipated that payments will be made on the following schedule:

- May 2020 payment: based on September 2019 to March 2019 encounters
- June 2020 payment: based on April 2020 encounters
- July 2020 payment: based on May 2020 encounters
- August 2020 payment: based on June 2020 encounters

Every add-on payment will be directly tied to a qualifying paid encounter, and include the ability to tie each payment to a specific service provided to a specific beneficiary through the data consistent with the managed care rule. As warranted to account for changes in the provider environment, CMS has advised that DHHS may amend its directed payment request.

and the Honorable Council

Elements Supporting CMS Approval

The CMS requirement for a directed payment approval under the COVID-19 parameters is to require implementation of a risk corridor for the September 2019 through June 2020 contract period to address the uncertainty of future medical costs given the COVID-19 pandemic.

In addition, as recommended in CMS guidance documents, additional administrative changes include:

1. For the September 2019 to June 2020 contract year, DHHS shall waive the quality withhold provisions of the Agreement due to the impact of the COVID-19 pandemic.
2. For the May 1, 2020 to June 30, 2020 time period, DHHS shall modify the auto-assignment algorithm to incorporate equal auto-assignment among the three MCOs due to atypical enrollment increase.

Should the Governor and Executive Council not authorize this request beneficiary access and provider stability of safety-net providers will be at greater risk.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Medicaid Services to retroactively amend existing agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schraffts City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, to provide health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, and by increasing the shared price limitation by \$18,750,925 from \$797,814,164 to an amount not to exceed \$816,565,089, in State Fiscal Year 2020, retroactive to September 1, 2019 with no change to the completion date of August 31, 2024, effective upon Governor and Executive Council approval.

Funds for Granite Advantage Health Program are 93% Federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020 (as defined in RSA 126-AA:3, I); funds for the Child Health Insurance Program are 77.6% Federal and 22.4% General; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal, 22.7% General and 26.3% Other funds.

This agreement was originally approved by the Governor and Executive Council on March 27, 2019 (Tabled Late Item A), and subsequently amended on April 17, 2019 (Item #9).

Funds are available in the following accounts for State Fiscal Year 2020 and are anticipated to be available in the State Fiscal Years 2021 through 2025, with authority to adjust amounts within the price limitation and adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

The Centers for Medicare and Medicaid Services (CMS) requires managed care rate certifications be completed on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each State Fiscal Year and corresponding contract amendments. Rates will be updated annually and as necessary for changes in the program enacted by the legislature. A description of how these contracts align with the state budget process is included in the explanation below. For these reasons, expenditures for the program are identified only for State Fiscal Year 2020.

EXPLANATION

This request is retroactive because of the delay in adopting a biennial budget and the need to update the capitated rates to reflect the various provisions of the budget that are incorporated into the Medicaid Care Management Program.

The amendment to the three (3) Medicaid Care Management (MCM) capitated and risk-based Agreements, including adjustments for September 2019 to June 2020 capitation rates for the MCOs and Exhibit A narrative contract changes, reflect the following changes:¹

Minimum Durable Medical Equipment (DME) fee schedule: Effective January 1, 2020, DHHS shall implement a minimum fee schedule DME services. The estimated impact of this change is approximately \$3.2 million over the January 2019 through June 2020 period.

Psychiatric boarding services: To improve continuity of care for mentally ill MCM members, DHHS shall fund psychiatric consultation services for individual in a psychiatric boarding situation. These services shall be effective March 1, 2020. The estimated impact of this change is approximately \$0.1 million over the March 2020 through June 2020 period.

Fee schedule updates: In accordance with annual CMS updates, reimbursement adjustments reflect the State Fiscal Year 2020 Federally Qualified Health Center (FQHC) encounter rates and the October 2019 (Diagnosis-Related Group) DRG rates.

Boston Children's Hospital (BCH) service funding: Funding for inpatient and outpatient BCH services shall reflect recent expenditure patterns prompting implementation of a risk pool in order to better allocate funds. As a result, claims incurred at the facility shall be excluded from stop-loss protections to avoid unintended interactions between the MCM Program's risk pool and stop-loss risk protection features. The estimated impact of this change is approximately \$1.4 million over the September 2019 through June 2020 period.

Non-Emergency Medical Transportation (NEMT) and Community Mental Health Center (CMHC) service costs: Increases in the Non-Medically Frail population's service costs for NEMT and CMHC costs for the January 2019 to June 2019 period warrant an increase to the base period data. The estimated impact of this change is approximately \$3.1 million over the September 2019 through June 2020 period.

MCO supplemental pharmacy rebates: Review of rebate eligible therapeutic classes revealed current spending did not support the preliminary 0.5% supplemental pharmacy rebate assumption; therefore, the rebate assumption is reduced from 0.5% to 0.1%.

Medically frail acuity adjustment: Review of emerging medical loss ratio (MLR) experience for the Medically Frail population indicated a likely difference in member health acuity between the base data period and emerging experience warrants adjustment to the base period data. The estimated impact of this change is approximately \$7.9 million over the September 2019 through June 2020 period.

Medicaid provider rate increases: House Bill 4, Section 348, of the 2019 NH Regular Legislative Session, directs increases to most Medicaid provider rates (excluding prescription drugs, designated receiving facility (DRF), and substance use disorder (SUD) residential treatment services), including State Plan Services and Waiver Programs by 3.1% effective

¹ Federal law requires managed care rates be reviewed no less frequently than a 12-month period. The Department aligns this process with the State Fiscal Year. The certified rate established for the program reflected in this contract is within the Department's budget for State Fiscal Year 2020. As in the past, the Department and Milliman will work with the legislature through the budget process to ensure the program is funded consistent with the budget.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 5

January 1, 2020, and an additional 3.1% effective January 1, 2021. The estimated impact of this change is approximately \$9.6 million over the January 2020 through June 2020 period.

Designated Receiving Facility (Involuntary) beds and rate increases: House Bill 4, Section 356, of the 2019 NH Regular Legislative Session, authorizes 8 to 10 new DRF beds, and increases the diagnosis related group (DRG) base rate reimbursement for all existing and newly established DRF beds when certain conditions are met. The new rates and additional beds are targeted for implementation on January 1, 2020. The estimated impact of the change is approximately \$2.2 million for the January 2020 through June 2020 period.

Mobile crisis team (MCT): Senate Bill 11, of the 2019 NH Regular Legislative Session, directs DHHS to create a new adult MCT to supplement those already in place. The new MCT is targeted for implementation on April 1, 2020. The estimated impact of this change is \$0.3 million over the April 2020 through June 2020 period.

The rate adjustments for all of the above program changes are for the ten month capitation rate period for Standard Medicaid and NH Granite Advantage Health Care Program for the September 2019 through June 2020 period with comparison to the previously approved rates are described in Table 1 below. The adjustment period is only 10 months because the prior contract was extended by two months to help effectuate the transition period for the new MCO and the new contract, which was approved by the Executive Council for a September 1, 2019 start date. The Department's actuary, Milliman, has certified a rate that is actuarially sound for this program.

In addition, Exhibit A narrative contract changes include:

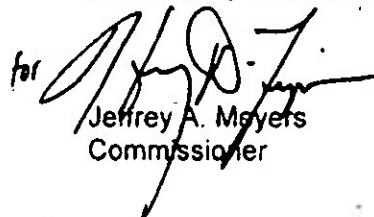

1. Amendment #1 edits carried forward, with adjustments as needed.
2. Transitional housing program services and community residential services: Coverage for these supportive services has been adjusted to reflect a July 1, 2020 start date to correspond with related Request for Proposals activities.
3. Provider payment: Clarifications to provider payments are dependent upon New Hampshire Medicaid fee schedules.
4. Drug Utilization Review (DUR) program: Inclusion of contract provisions to address new federal compliance requirements for the MCM Program's DUR program.
5. Technical corrections: Technical corrections include edits to pharmacy encounter date submission timeframes.
6. Zolgensma: Addition of gene therapy medication, Zolgensma, as a drug covered by New Hampshire Medicaid effective September 1, 2019 due to its extremely high cost and low incidence rate, which makes cost for the treatment difficult to predict for inclusion in MCM capitation rates, including related risk protection processes.
7. Hepatitis C medications: With stabilization of treatment demand, Hepatitis C prescription drugs are carved into the program starting September 2019.
8. Downside risk mitigation: Inclusion of a downside risk mitigation process for the Granite Advantage Health Care Program (GAHCP) Medically Frail and Non-Medically Frail populations for the September 2019 through June 2020 period.
9. Local Care Management: The contract reflects a terminology change, "Local Care Management Network(s)", to better reflect the nature of the program's local care management model.

Area served: Statewide.

Source of Funds: Funds for Granite Advantage Health Program are 93% federal and 7% Other for calendar year 2019 and 90% Federal and 10% Other for calendar year 2020; funds for the Child Health Insurance Program are 77.6% federal as appropriated by Congress and 22.4% General funds; and funds for the standard Medicaid population funding under the Medicaid Care Management account are 51% Federal as appropriated by Congress, 22.7% General and 26.3% Other funds.

In the event that Federal funds become no longer available or are decreased below the 93% level for calendar year 2019 or 90% level for calendar year 2020, for the Granite Advantage Health Program, sums necessary to cover a projected short-fall will be transferred from the liquor commission fund, established in RSA 176:16, as provided for by HB 4 Section 351, of the 2019 NH Regular Legislative Session.

Authorize the Department of Health and Human Services Office, to amend three (3) Agreements with AmeriHealth Caritas New Hampshire Inc., 200 Steven Drive, Philadelphia, PA 19113, Boston Medical Center Health Plan Inc., Schraffts City Center, 529 Main Street, Suite 500, Charlestown, MA 02129, and Granite State Health Plan Inc., 2 Executive Park Drive, Bedford NH, 03110, by changing the program start date from July 1, 2019 to September 1, 2019 to accommodate sufficient time for readiness activities needed to effectuate a well-executed implementation of health care services to eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, and by decreasing the price limitation by \$126,335,836 from \$924,150,000 to an amount not to exceed \$797,814,164 in State Fiscal Year 2020, for period September 1, 2019 through June 30, 2020, effective upon Governor and Executive Council approval, with a change to the completion date of August 31 2024, from June 30, 2024. EXPLANATION

The purpose of this request is to amend the three (3) Medicaid Care Management (MCM) capitated, and risk-based Agreements by changing the program start date from July 1, 2019 to September 1, 2019. The amendment is necessary to provide a sufficient readiness ramp up period for the Department and the Contractors known as the Managed Care Organizations (MCOs) so the health care services to 180,000 eligible and enrolled Medicaid participants through New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management, are implemented smoothly, and by decreasing the price limitation by (\$126,335,836) from \$924,150,000 to an amount not to exceed \$797,814,164 in State Fiscal Year 2020, September 2019-June 2020.

The proposed change in program start date, to a later date, was necessary to provide Governor and Executive Council sufficient time to review the new contracts, hold two informational hearings, and to allow the Department and the MCOs the needed time for readiness to occur for the new Agreements. These three (3) MCOs will serve approximately 180,000 members including pregnant women, children, parents/caretakers, non-elderly, non-disabled adults under the age of 65, and individuals who are aged, blind or disabled, among others, as described in the Medicaid Care Management (MCM) contracts. The MCOs will cover the acute care, behavioral health, and pharmacy services for all Members and work with the Department to address the crucial social determinants of health in accordance with the attached MCM contracts.

The MCOs will provide a person-centered, integrated, and comprehensive delivery system that offers a very substantial array of accessible Medicaid services, taking into account each Member's physical well-being, behavioral health (mental health and substance use disorders), and social circumstances. The Department will challenge its MCO partners to work responsively with the provider community and MCM Members to improve access to care and promote healthy behaviors. New Hampshire's MCM program will incentivize value over volume, enhance program efficiency, and hold MCOs accountable for demonstrable improvements in health outcomes.

Table One represents a ten-month year capitation rate for the Standard Medicaid and the NH Granite Advantage Health Care Program for the period September 2019 through June 2020 with a comparison to the SFY 2020 rates in the February 15, 2019 signed contracts approved by the Governor and Executive Council of March 27, 2019 (Tabled, 2/20/2019 Late item #A). This allows alignment with State of New Hampshire fiscal year through SFY 2024. The change to the completion date of August 31 2024 is requested to allow for the full 60-month contract that was specified in the request for proposals.

The Centers for Medicare and Medicaid Services (CMS) requires that managed care rate certifications must be done on a twelve-month rating period demonstrating actuarial soundness thereby necessitating annual rate reviews in order to determine amounts each state fiscal year and corresponding contract amendments. EXPLANATION

The purpose of this request is to enter into capitated, risk-based Agreements to provide acute care and other medical services to eligible and enrolled Medicaid participants New Hampshire's Medicaid managed care program known as New Hampshire Medicaid Care Management. ~~These three (3) Vendors will serve approximately 180,000 members including pregnant women, children, parents/caretakers, non-elderly, non-disabled adults under the age of 65, and individuals who are aged, blind or disabled, among others, as described in the Medicaid Care Management (MCM) contracts. The Managed Care Organizations (MCOs) will cover the acute care, behavioral health, and pharmacy services for all Members and work with the Department of Health and Human Services (DHHS) to address the crucial social determinants of health in accordance with the attached MCM contracts.~~

The MCO Vendors will provide a person-centered, integrated, and comprehensive delivery system that offers a very substantial array of accessible Medicaid services, taking into account each Member's physical well-being, behavioral health (mental health and substance use disorders), and social circumstances. DHHS will challenge its MCO partners to work responsively with the provider community and MCM Members to improve access to care and promote healthy behaviors. New Hampshire's MCM program will incentivize value over volume, enhance program efficiency, and hold MCOs accountable for demonstrable improvements in health outcomes.

Two of the Vendors, Boston Medical Center Health Plan Inc., and Granite State Health Plan Inc., are respectively otherwise known as Well Sense Health Plan, and New Hampshire Healthy Families. The Department presently contracts with both of these Vendors to provide New Hampshire's Medicaid Care Management program.

and the Honorable Council

I. Procurement Process

These contracts represent the culmination of the Department's first re-procurement of the MCM program since its commencement in December 2013. The Department's process for the development of the program reflected in the contracts and the contracts themselves represent a significant improvement over the prior procurement process and the program itself. The Department -- for the first time ever -- put out the Request for Proposals for public comment and held public information sessions in each of the Executive Council Districts last July in Concord, Keene, Manchester, Nashua, Littleton and Portsmouth before it was issued to potential respondents.

These three (3) Vendors were selected through a competitive bid process. A Request for Proposals RFP-2019-OMS-MANAG-02 was posted on the Department of Health and Human Services' web site from August 30, 2018 through October 31, 2018. A mandatory bidder's conference was held on September 7, 2018. In-person attendance at the Mandatory Bidder's Conference was a requirement to submit a proposal. The Department received four (4) proposals. The proposals were reviewed and scored by a team of individuals with program specific knowledge. The Bid Summary is attached.

II. Central Features of the New MCM Program

This procurement was also focused on improving the program for beneficiaries and providers and introducing many new features. The goals of the new MCM program are to

- Improve care of Members
- Improve health outcomes
- Reduce inpatient hospitalization and re-admissions
- Improve continuity of care across the full continuum of care
- Improve transition planning when care is completed
- Improve medication management
- Reduce unnecessary emergency services
- Decrease the total cost of care
- Increase member satisfaction
- Improve provider participation in the program

In order to help achieve these goals, the new contracts make many changes in the current program. These include the following:

- **Additional Care Coordination and Care Management** resources to provide significantly more beneficiary support to those in greater need, including providing it at a local level. MCOs must provide Care Management for at least 15% of high-risk/high-need members, and MCOs must conduct local care management or contract with a designated care management entity for at least 50% of high-risk/high-need members.
- **Behavioral Health (Mental Health and Substance Use Disorder)** provisions support integration of care with physical health, implementation of the Department's new 10-year Mental Health Plan, and advance SUD treatment. MCOs are required to take into account each person's physical health, behavioral health (mental health and substance use disorders), and social and economic needs. MCOs are required to work with Members, Providers, integrated delivery networks (IDNs), and community mental health

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

- programs (CMHPs) to integrate physical health and behavioral health and address social determinants of health that affect health outcomes and the cost-effectiveness of care.
- **Emergency Room Waiting Measures** include the provision of additional clinical staff to support the provision of services in hospital emergency departments to reduce the need for Members to wait for inpatient services.
 - **Support the Community Mental Health Centers and Substance Use Disorder Providers** by entering into capitated payment arrangements with Community Mental Health Programs and Providers, and reimburse substance use disorder providers at rates no less than the DHHS fee-for-service rates. MCOs must also contract with any willing peer recovery provider.
 - **Alternative Payment Models (APMs)** provisions require MCOs to incentivize value over volume and significantly reduce current fee for service billing arrangements.
 - **Community Engagement** specifies a role for the MCOs to support beneficiaries in fulfilling the Community Engagement requirement, including assisting their members with understanding qualifying activities and exemptions.
 - **New Provider Supports** require MCOs to implement prompt and accessible credentialing and re-credentialing processes that will be used to conduct provider outreach and support; standardize work processes to ensure efficient implementation of the program and minimal provider burden relative to claims billing processes, reporting, and prior authorizations; meet prompt payment requirements and pay claims based on the effective date of the Current Procedural Terminology code, and establish a provider grievance and appeals process.
-
- **Pharmacy Counselling and Management** are strengthened to help improve the safety and therapeutic benefits to beneficiaries and the economy of the program.
 - **Beneficiary Choice and Competition** is increased by providing Medicaid beneficiaries with three high-quality MCOs from which to choose.
-
- **Incentives and opportunities for beneficiaries to participate in healthy behaviors** must be provided by MCOs to improve individual health.
 - **Cost transparency** through reference based pricing and incentives to beneficiaries.
 - **Accountability for results** is increasing because a share of payment to MCOs will be directly linked to their performance, ensuring accountability for results, particularly in high priority areas such as addressing substance use disorders, integrating physical and behavioral health, providing robust care management, and reducing unnecessary use of high-cost services.
 - **Public Reporting** is an added contract element. Each selected MCO will be responsible for submitting an annual report to the Governor and the legislature reporting on how the MCO has addressed State priorities for the MCM Program, including those specified in RSA 126-AA and in other State statute, policies, and guidelines; what innovative programs it has established; how it is addressing social determinants of health of its members, and how it is improving the population health of the state and other key metrics of the program.
 - **Heighten program compliance and integrity provisions** have been added that allow for liquidated damages to be applied to the MCOs around contractual performance; provisions that incent MCO performance around collections for third party liability and coordination of benefits; and general fraud waste and abuse.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 6

- **Medical Loss Ratio** is specified in the contract at a minimum amount of 85% that must be spent on service delivery to beneficiaries, any amount less is to be rebated back to the Program.

III. Rate-making and Budget

The Department's actuary, Milliman, has certified a rate that is actuarially sound for this program. These rates are reflected in Table I below:

Table 1 New Hampshire Department of Health and Human Services SFY 2020 Capitation Rate Change Based on Projected SFY 2020 MCO Enrollment by Rate Cell			
Population	January 2019 to June 2019 Capitation Rate	SFY 2020 Capitation Rate	Percentage Change
Standard Medicaid			
Base Population	\$303.54	\$315.15	3.8%
CHIP*	188.36	196.71	4.4%
Behavioral Health Population	1,294.03	1,386.51	7.1%
Total Standard Medicaid	\$371.26	\$389.03	4.8%
Granite Advantage Health Care Program			
Medically Frail	\$993.36	\$1,025.07	3.2%
Non-Medically Frail	423.21	482.80	14.1%
Total GAHCP	\$532.03	\$586.30	10.2%
Total	\$416.29	\$444.28	6.7%

*The CHIP capitation rate is an average of the specific rate cells in which CHIP members are enrolled. We do not develop a CHIP specific capitation rate.

Federal law requires that managed care rates be reviewed no less frequently than a 12-month period. The Department aligns this process with the state fiscal year. Over the last several years, the rates have been reviewed and an amendment made to the MCM contracts in May or June for the fiscal year beginning on July 1st. In order to maintain actuarial soundness, the rates are also required to be reviewed in the event of significant program changes. For example, while the Department established rates for FY 2019 last spring, the Department was required to refresh and update the rates when the Medicaid expansion program was brought back into managed care on January 1, 2019 – in the middle of the state fiscal year.

This year, there are items in both the Governor's budget and in other legislation now pending that, if and when enacted, would require Milliman to revise the rates. Specifically, there are proposals to (i) raise the rates paid to community based designated receiving facilities, (ii) add transitional housing for persons who can be discharged from New Hampshire Hospital; (iii) add mobile crisis teams or other behavioral health crisis services. All of these

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 6 of 6

additional services will have to be incorporated into the capitated rates for the managed care program consistent with their effective dates.

As a result, the Department anticipates that following the end of the legislative session, Milliman will review all program changes and any other relevant information, and adjust the rates as necessary. The Department would expect to bring an amendment to the contract in the September or October time frame for this purpose.

The certified rate established for the program that is reflected in this contract is within the Department's budget for state fiscal year 2020. Even though that the rates have been increased, a decline in the number of persons enrolled in Medicaid and a decline in the acuity of the population that has reduced expenditures in certain of the highest rate cells accounts for a reduction of total expenditure in the program within the current budget. As we have in the past, the Department and Milliman will work with the legislature in the budget process to ensure that the program is funded consistent with the budget.
