EXPLANATION

Request #1 is **Retroactive** to align with the July 1, 2023, effective date of the residential treatment rate increases included in Chapter 79, Section 445, Laws of 2023 (i.e., House Bill 2). Additionally the Department needed to complete a rate setting adjustment determination resulting from a two-year review with DHHS Medicaid. The Department was therefore unable to implement the rate increases until completion of the budget process and the rate setting adjustment determination, which was necessary to better align rates with vendors' actual costs.

Request #2 is **Retroactive** to allow the Department to make payments for shelter care services provided. The Department needed Mount Prospect Academy to continue providing critical short-term residential shelter care services to adolescents in crisis during ongoing negotiations between the Department and Contractor to transition these services to this Residential Treatment Services for Children's Behavioral Health contract. The Department initially entered into negotiations with the Contractor regarding residential daily rates in 2022. Negotiations took longer than expected due to the need for a comprehensive re-examination of the rate setting process conducted by the Department over the last year.

The purpose of this request is to increase funding and extend the completion date for the continued provision of behavioral health services in residential treatment settings to children, youth and young adults who have heightened behavioral health needs that require more intensive treatment than what is offered in their home and community.

Also this request is to add scope to Mount Prospect Academy's contract to include the Short-term Treatment Education and Planning (STEP) program that provides short term treatment to youth who are in need of a brief episode of treatment and a specific focus on discharge planning for a successful return to their home and community. The Department will also compensate the Contractor for costs incurred for the provision of short-term residential shelter care services to adolescents in crisis.

The Contractors will continue to deliver evidence-based and trauma-informed clinical services, as an essential part of the Children's System of Care, to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. As a result of these contracts, the Department has seen a reduced number of placements outside of New England. The Contractors will continue supporting the Department's efforts to provide better long-term outcomes for youth by providing services that are short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act and adherence to RSA 135-F.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor determines whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2025

The Department will continue to monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraints and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;
- Reduction of length of stay; and
- Reduction of staff turnover and retention of quality staff.

As referenced in Exhibit A of the original agreements, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and Governor and Council approval. The Department is exercising its option to renew services for one (1) of the six (6) years available.

Should the Governor and Executive Council not authorize this request, the Department's ability to ensure adherence to RSA 135-F and implementation of required trauma-informed models and evidence-based models for residential treatment programs, and secure funding through the Family First Prevention Services Act and IV-E would be jeopardized. Furthermore, access to treatment for all youth may be limited, which could impact the quality of services available, increase length of stay and service costs, and limit the ability of youth to return home. Lastly, the Department would need to rely more heavily on placements beyond New England.

Source of Federal Funds: Assistance Listing Number # 93.658, FAIN #'s 2101NHFOST and 2301NHFOST; Assistance Listing Number # 93.558, FAIN #'s 2101NHTANF and 2301NHTANF; Assistance Listing Number # 93.659, FAIN #'s 2101NHADPT and 2301NHADPT; Assistance Listing Number # 93.778, FAIN #'s 2105NH5ADM and 2305NH5ADM.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Weaver
Commissioner

EXPLANATION

The purpose of this request is to provide behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs who have more intensive behavioral and mental health needs that cannot be met safely in the community without intensive supports.

The Contractors will deliver evidence-based and trauma-informed clinical services to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. The Contractors will support the Department's efforts to provide better long-term outcomes for youth by providing services that will be short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2024.

The Contractors will provide varying residential treatment levels of care ranging from levels one through four, with four being the most intensive treatment. All Contractors will provide services that are family-driven, youth-guided, community-based, trauma-informed, and culturally and linguistically competent in accordance with RSA 135-F. Depending on the level of care, Contractors will provide services that may include but are not limited to:

- Residential/milieu services through direct care professionals;
- Trauma-informed treatment models including evidence based practices;
- Mental health/clinical services provided by clinical staff;
- Educational services, as approved by the Department of Education;
- Independent living/employment support;
- Positive Youth Development/Recreational opportunities;
- Safety and supervision; and
- Care coordination of all needs including medical/dental and other needs.

The Department will monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraint and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 4

- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached.

This requested action includes five (5) contracts in addition to the nine (9) contracts presented to the Governor and Executive Council on July 14, 2021 (item #14). The Department plans to submit the remaining two (2) contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

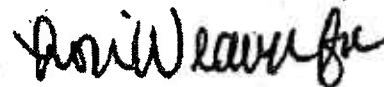

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;
- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Areas served: Statewide.

Source of Funds: CFDA #93.658, FAIN #2101NHFOST CFDA #93.558, FAIN# 2101NHTANF, CFDA #93.659, FAIN #2101NHADPT, CFDA #93.778, FAIN #2105NH5ADM

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Shibinette

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.
6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

New Hampshire Department of Health and Human Services

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

Devereux Mission, Values and Commitment to Service

Our Mission

Devereux Advanced Behavioral Health changes lives – by unlocking and nurturing human potential for people living with emotional, behavioral or cognitive differences.

Our Core Values

- **Compassion:** We have a deep and abiding understanding of, and respect for, our individuals and their families.
- **Knowledge:** We rely on data and evidence to inform our care. Our work requires a marriage of science and art.
- **Collaboration:** We require an integrated team approach, based on respect, shared goals and altruism.

- **Progress:** We are *Always en Route*, continually incorporating new innovations to advance our services, our industry and the lives of those we serve.

Our commitment to serving others

In 2018, Devereux launched a transformative, organization-wide culture movement called “Servant Leadership.” Coined by Robert K. Greenleaf in the 1960s, Servant Leadership is a philosophy, and a set of values and practices, that enrich the lives of individuals, build better organizations and create a more just and caring world.

According to the Robert K. Greenleaf Center for Servant Leadership, a servant leader:

- Focuses primarily on the growth and well-being of people and the communities to which they belong;
- Shares power by putting the needs of others first; and
- Helps people develop and perform as highly as possible.

Devereux has embraced this philosophy to create an enhanced work environment where employees feel empowered to voice ideas that will benefit the individuals and families we serve, along with staff, external partners and our overall organization. As part of this long-term initiative, Devereux will continually work together to strengthen various behaviors within its organizational framework. These behaviors include:

- Being an active communicator
- Following-up on commitments
- Collaborating with others to find the best solutions
- Anticipating others’ needs
- Showing patience and a can-do attitude
- Being respectful, caring and willing to help

Ultimately, Devereux’s goal is to better support its employees and, as a result, improve organizational excellence and outcomes for the individuals and families its serves every day. Learn how Devereux’s servant leaders are empowering all those around them to be their best selves.

Report of Independent Auditors

The Board of Trustees
Devereux Corporation and Controlled Entities
d/b/a Devereux Advanced Behavioral Health

We have audited the consolidated financial statements of Devereux Corporation and Controlled Entities d/b/a Devereux Advanced Behavioral Health (Devereux) (the reporting entity was formerly known as The Devereux Foundation and Controlled Entities), which comprise the consolidated balance sheets as of June 30, 2023 and 2022, and the related consolidated statements of operations and changes in net assets and cash flows for the years then ended, and the related notes (collectively referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Devereux at June 30, 2023 and 2022, and the results of its operations and changes in net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Devereux and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Devereux’s ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Devereux's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Devereux's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

1. Organization and Basis of Presentation

Devereux Corporation (DevCorp) and Controlled Entities d/b/a Devereux Advanced Behavioral Health is a not-for-profit corporation that administers and supports an integrated network of organizations dedicated to the treatment of, and carrying on the educational work in connection with, emotional, behavioral, neurological, intellectual disabilities, and other functional and nervous disorders.

DevCorp was created in 2023 to be the sole member of The Devereux Foundation (TDF) and Helena Devereux Foundation (HD Foundation) (collectively, the Controlled Entities) as part of an ongoing legal entity restructuring. Prior to DevCorp's creation, TDF was the sole member of HD Foundation. The prior reporting entity was formerly known as The Devereux Foundation and Controlled Entities.

TDF is dually designated by the Internal Revenue Service as an educational facility and health care organization, with a national network of behavioral health treatment centers for children, adolescents, and adults with complex emotional; psychiatric; and developmental disabilities, including individuals with autism spectrum disorders. Treatment settings range along a continuum from acute psychiatric inpatient and campus-based residential settings to community group homes, outpatient, foster care, in-home, educational, vocational, and prevention programs. TDF is the sole corporate member of the following entities:

Devereux Cleo Wallace (DCW) is a Colorado not-for-profit corporation that operates a psychiatric residential treatment facility and provides other behavioral health services in Westminster, Colorado. DCW is the sole corporate member of Devereux Cleo Wallace Foundation (DCW Foundation), a Colorado not-for-profit corporation that was established for the benefit of DCW. DCW Foundation has been inactive since 2020. DCW ceased operations in 2023 and its campus is being marketed for sale (see Note 7).

QualityHealth Staffing, LLC (QHS) is a consolidated subsidiary formed in February 2018 in Pennsylvania to provide behavioral health staffing services. QHS ceased operations during 2022.

Southeastern Pennsylvania Autism Resource Center (SPARC) is a Pennsylvania not-for-profit that provides outpatient services.

1. Organization and Basis of Presentation (continued)

QualityHealth Pharmacy, LLC (QHP) is a consolidated subsidiary formed in April 2021 in Pennsylvania to provide pharmacy services.

Turtle Creek Valley Mental Health/Mental Retardation, Inc., doing business as TCV Community Services (TCV), is a Pennsylvania not-for-profit corporation that provides mental health, intellectual and developmental disabilities (IDD), and drug and alcohol services in western Pennsylvania. On January 1, 2022, TDF became the sole member of TCV through an affiliation agreement as further described below.

Additionally, as part of the legal entity restructuring, during 2023 new operating companies were created for each state in which TDF operates: California, Arizona, Texas, Florida, Georgia, New Jersey, New York, Massachusetts, Connecticut, and Pennsylvania. Operations in Pennsylvania are further divided into two entities, one for children's services and one for adult services. All of the aforementioned newly created entities (collectively the operating companies) are Pennsylvania not-for-profit corporations. As of June 30, 2023, none of these new companies were operational.

HD Foundation is a Pennsylvania not-for-profit corporation, which holds certain assets to benefit TDF's programs.

All significant intercompany balances and transactions have been eliminated in the accompanying consolidated financial statements.

The reporting entity resulting from the consolidation of Devereux Corporation and its Controlled Entities is collectively referred to as Devereux.

2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of consolidated financial statements in accordance with generally accepted accounting principles in the United States of America (U.S. GAAP) requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents, for which the carrying value approximates fair value, include money market funds and certain investments with original maturities of three months or less, excluding cash equivalents classified as assets limited as to use as such holdings are within investment portfolios. Devereux does not hold any money market funds with significant liquidity restrictions that would be required to be excluded from cash equivalents.

The following is a reconciliation of amounts reported on the consolidated balance sheets to the statements of cash flows as of and for the years ended June 30:

	2023	2022
Cash and cash equivalents	\$ 15,221	\$ 5,767
Assets limited as to use: cash and cash equivalents	10,296	4,328
Total cash and cash equivalents and restricted cash and restricted cash equivalents	\$ 25,517	\$ 10,095

Fair Value of Financial Instruments

Financial instruments consist of cash equivalents, accounts receivable, assets limited as to use and operating fund investments, accounts payable and accrued expenses, interest-rate swaps, line of credit, and long-term debt. The carrying amounts reported on the consolidated balance sheets for cash equivalents, accounts receivable, and accounts payable and accrued expenses approximate fair value.

Accounts Receivable

Accounts receivable are recognized in the period services are provided and are stated at an amount that reflects the consideration Devereux expects to receive from programs administered by state and local government agencies, commercial insurance, and private payors at established contracted rates inclusive of provisions for variable consideration, such as discounts and implicit price concessions.

2. Summary of Significant Accounting Policies (continued)

An allowance for uncollectible accounts is recorded only from a delinquency of accounts that were considered collectible at the time services were provided.

Assets Limited as to Use, Investments, and Investment Income

Assets limited as to use include assets set aside by the Board of Trustees (the Board), assets held by trustees under bond indenture agreements, assets for insurance agreements, and assets for donor purposes. Amounts set aside by the Board are designated for the operation of certain facilities, scholarships, continuing care, and other contingencies. The Board retains control over designated assets and may, at its discretion, subsequently designate the assets for other purposes. Assets limited as to use that are required for current obligations or designated for current use are reported as current assets. Assets limited as to use and operating fund investments are classified as other-than-trading securities.

Investments in marketable debt and equity securities are measured at fair value based on quoted market prices. Alternative investments are measured at the equity method value. Investment income or loss (including realized gains and losses on investments, interest, and dividends) is included in investment income, or included in net realized and unrealized gains on investments in net assets with donor restrictions if such income is restricted by the donor or legislation. Investment income is reported net of external and direct internal investment expenses, such as trustee fees and investment fund management fees. Unrealized gains and losses on investments in equity securities and alternative investments measured at the equity method value are reported as a component of other income (loss), net. Realized gains and losses on investments sold are computed using the weighted average cost method.

Unrealized gains and losses on investments in fixed-income securities, to the extent that such losses are considered temporary, are reported as a component of other changes in net assets without donor restrictions for investments that are not held for donor-restricted purposes. Devereux periodically reviews its investments in fixed-income securities for other-than-temporary declines in the market value of investments. When an other-than-temporary decline is identified, the investment's cost is written down to the current market value, and the loss is recorded as a component of the excess (deficiency) of revenue over expenses.

2. Summary of Significant Accounting Policies (continued)

Property and Equipment

Property and equipment are recorded at cost or, if donated or acquired through a business combination, at fair market value at the date of receipt. Depreciation is provided on a straight-line basis over the expected useful lives of the assets. Gifts or grants for the purchase of long-lived assets, such as land, buildings, or equipment, are reported as other changes in net assets without donor restrictions. Interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of acquiring those assets. No interest was capitalized in 2023 or 2022.

Devereux continually evaluates whether later events and circumstances have occurred that indicate the remaining estimated useful life of long-lived assets may warrant revision or that the remaining balance may not be recoverable. When factors indicate that long-lived assets should be evaluated for possible impairment, Devereux uses an estimate of the related undiscounted operating income over the remaining life of the long-lived asset or determines the fair value of the long-lived asset in measuring whether the long-lived asset is recoverable. Devereux believes that no revision to the remaining useful lives or write-down of long-lived assets was required as of June 30, 2023 or 2022.

Deferred Financing Costs

Deferred financing costs represent expenditures incurred in the issuance of long-term debt and are amortized using the effective-interest-rate method over the term of the related debt. These costs are presented on the consolidated balance sheets as a direct reduction of the carrying value of the associated debt, consistent with the presentation of debt discounts or premiums.

Classification of Net Assets

Devereux separately accounts for and reports net assets without donor restrictions and net assets with donor restrictions. Net assets without donor restrictions are not externally restricted for identified purposes by donors or grantors. Net assets without donor restrictions include resources that the governing board may use for any designated purpose and resources whose use is limited by agreement between Devereux and an outside party other than the donor or grantor.

2. Summary of Significant Accounting Policies (continued)

Net assets with donor restrictions represent those net assets whose use has been limited by donors to a specific time period or purpose or have been restricted by donors to be maintained by Devereux in perpetuity, with income generally available to support health care and education services. When the donors' intentions are met or a time restriction expires, the net assets are reclassified to net assets without donor restrictions and reported on the consolidated statements of operations and changes in net assets as net assets released from restrictions. Net assets with donor restrictions that are required to be maintained in perpetuity are invested on a pooled basis with Devereux's Board-designated investments. In accordance with Commonwealth of Pennsylvania Act 141, organizations are annually permitted to spend between 2% and 7% of permanent endowments. For both 2023 and 2022, Devereux elected to spend at a blended rate of approximately 4.0%. Additionally, in accordance with the Pennsylvania law, Devereux classifies as net assets with donor restrictions that are required to be maintained in perpetuity (a) the value of gifts donated to the permanent endowment and (b) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument. This is regarded as the "historic dollar value" of the endowed fund. Any remaining unspent earnings of the donor-restricted endowment funds are not classified as a permanent endowment and are recorded within net assets with donor restrictions until those amounts are appropriated for expenditure by Devereux in a manner consistent with Devereux's spending policy.

Excess (Deficiency) of Revenue Over Expenses

The accompanying consolidated statements of operations and changes in net assets include the excess (deficiency) of revenue over expenses as the performance indicator. Changes in net assets without donor restrictions that are excluded from the excess (deficiency) of revenue over expenses are unrealized gains and losses on investments in fixed-income securities, to the extent that such losses are considered temporary, and net assets released from restrictions for property and equipment purchases. For purposes of presentation, transactions deemed by management to be ongoing, major, or central to the provision of services are reported as operating revenue and operating expenses; peripheral or incidental transactions and unusual, nonrecurring items are excluded from operating results and are reported as other items within the excess (deficiency) of revenues over expenses.

2. Summary of Significant Accounting Policies (continued)

Income Taxes

DevCorp, TDF, HD Foundation, DCW, DCW Foundation, SPARC, TCW, and the operating companies are exempt from federal income tax on related income under Sections 501(a) and 501(c)(3) of the Internal Revenue Code as well as state and local income taxes pursuant to the corresponding state exemption provisions. QHS and QHP are classified as disregarded entities of Devereux for federal and state income tax purposes. The effects of income taxes are not material to the accompanying consolidated financial statements.

Charity Care

In advancement of its charitable mission, Devereux accepts individuals with limited or no ability to pay for services. An individual is classified as a charity individual by reference to certain established policies. Essentially, these policies define charity services as those for which payment is not anticipated. In assessing an individual's ability to pay, Devereux uses generally recognized poverty income levels, but also includes cases where incurred charges are significant relative to income.

Under certain governmental payment programs, Devereux has been paid an amount less than actual costs due to agency budgetary constraints or other factors. The economic loss attributable to such programs is also included as charity care. Charity care amounts are not included in net service revenue or accounts receivable. The amount of costs incurred for services provided to individuals who qualify for charity care and the economic shortfall attributable to unreimbursed costs of certain programs aggregated \$26,836 and \$40,090 in 2023 and 2022, respectively.

Devereux also provides a variety of services and benefits within the communities in which it operates for which no compensation is received.

Contributions and Pledges Receivable

Unconditional promises to give cash and other assets are reported at fair value at the date the promise is received. Unconditional promises to give cash and other assets that are expected to be collected in future years are recorded at the present value of estimated future cash flows. The

discounts on those amounts are computed using a risk-free interest rate applicable to the year in which the promise is received. The gifts are reported as gifts, grants, and bequests in net assets with donor restrictions if they are received with donor stipulations that limit the timing or purpose for which donated assets can be used. When a donor restriction expires, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported on the consolidated statement of operations and changes in net assets as net assets released from restrictions. Donor-restricted contributions whose restrictions are met within the same year as received are reported as gifts and bequests in the accompanying consolidated financial statements.

Recent Accounting Pronouncements

Pending Changes

In June 2016, the Financial Accounting Standards Board issued Accounting Standards Update No. (ASU) 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. The main objective of ASU 2016-13 and related ASUs is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. The amendments affect loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments in this update are effective for Devereux for fiscal years beginning after December 15, 2022. Devereux is in the process of evaluating the impact of ASU 2016-13 on its consolidated financial statements.

TCV Community Services Affiliation

Effective January 1, 2022, Devereux and TCV entered into an affiliation agreement whereby Devereux became the sole corporate member of TCV. This affiliation was accounted for as a business combination. No consideration was exchanged for the net assets of TCV, and in accordance with applicable accounting guidance on not-for-profit mergers and acquisitions, Devereux recorded nonoperating inherent contribution income of \$9,581 for the year ended June 30, 2022, reflecting the fair value of the contributed net assets of TCV without donor restrictions. Additionally, inherent contribution income of \$681 was recorded in net assets with donor restrictions.

Reclassifications

Certain reclassifications have been made to 2022 amounts previously disclosed in order to conform to the current year presentation. These reclassifications had no impact on previously reported net assets.

Subsequent Events

In accordance with Accounting Standards Codification 855, *Subsequent Events*, management has evaluated subsequent events through the date the accompanying consolidated financial statements were issued on September 29, 2023.

Effective July 1, 2023, TDF became the sole member of PLEA (Parents League for Emotional Adjustment), a Pennsylvania provider of special education services. As of that date, PLEA had approximately \$2,500 of net assets and its annual revenue is approximately \$3,000.

3. Net Service Revenue

Accounts Receivable and Net Service Revenue

Net service revenue is reported at the amount which reflects the consideration that Devereux expects to receive in exchange for providing care. These amounts are due from individuals, third-party payors (including health insurers and government programs), and others and include variable consideration (reductions to revenue) in determining the transaction price.

Devereux uses a portfolio approach to account for categories of payor contracts as a collective group rather than recognizing revenue on an individual contract basis. The portfolios consist of major payor classes for residential revenue and outpatient and community-based revenue as well as high-balance accounts regardless of payor class. Based on historical collection trends and other analyses, Devereux believes that revenue recognized by utilizing the portfolio approach approximates the revenue that would have been recognized if an individual contract approach were used.

Devereux's initial estimate of the transaction price for services provided to individuals subject to revenue recognition is determined by reducing the total contracted rates related to the services provided by various elements of variable consideration, including discounts, price concessions, and other reductions to Devereux's contracted rates. The estimates for discounts and price concessions are based on contractual agreements, Devereux's policies, and historical experience.

Devereux Corporation and Controlled Entities
d/b/a Devereux Advanced Behavioral Health

Notes to Consolidated Financial Statements (continued)
(In Thousands)

3. Net Service Revenue (continued)

Generally, Devereux bills government agencies and third-party payors on a monthly or weekly basis after the services are performed. Net service revenue is recognized as performance obligations are satisfied. Performance obligations are determined based on the nature of the services provided by Devereux. Net service revenue for performance obligations satisfied over time is recognized based on actual charges incurred in relation to total charges. Devereux believes that this method provides a reasonable depiction of the transfer of services over the term of the performance obligation based on the services needed to satisfy the obligation. Generally, performance obligations satisfied over time relate to residential services, education services, or case management services. Substantially all of its performance obligations relate to contracts with a duration of one year or less.

Subsequent changes to the estimate of the transaction price (determined on a portfolio basis when applicable) are generally recorded as adjustments to net service revenue in the period of the change. For the years ended June 30, 2023 and 2022, changes in Devereux's estimates of price concessions, discounts, contractual adjustments, or other reductions to expected payments for performance obligations were not material. Portfolio collection estimates are updated based on collection trends. Subsequent changes that are determined to be the result of an adverse change in the individual's ability to pay (determined on a portfolio basis when applicable) are recorded as provision for bad debts. Provision for bad debts for the years ended June 30, 2023 and 2022 was not material.

Devereux has determined that the nature, amount, timing, and uncertainty of revenue and cash flows are affected by the following factors: payors and lines of business. Tables providing details of these factors are presented below.

Net service revenue recognized from major payor sources is as follows:

	Year Ended June 30	
	2023	2022
Medicaid	\$ 258,927	\$ 265,899
Social services agencies	134,287	129,851
Educational agencies	72,485	69,649

3. Net Service Revenue (continued)

Net service revenue by line of business is as follows:

	June 30	
	2023	2022
Campus-based residential	\$ 179,692	\$ 174,257
Community-based residential	162,765	161,788
Education services	57,354	52,545
Outpatient/other services	54,929	53,800
Foster care	22,914	28,275
Case management	6,782	10,813
Acute care	9,707	10,171
	\$ 494,143	\$ 491,649

Third-Party Payment Programs

Settlements with third-party payors for cost report filings and retroactive adjustments due to ongoing and future audits, reviews, or investigations are considered variable consideration and are included in the determination of the estimated transaction price for providing services. These settlements are estimated based on the terms of the payment agreement with the payor, correspondence from the payor, and Devereux's historical settlement activity (for example, cost report final settlements), including an assessment to ensure it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the retroactive adjustment is subsequently resolved. Such estimates are determined through either a probability-weighted estimate or an estimate of the most likely amount, depending on the circumstances related to a given estimated settlement item. Estimated settlements are adjusted in future periods as adjustments become known (that is, as new information becomes available), or as years are settled or are no longer subject to such audits, reviews, and investigations.

3. Net Service Revenue (continued)

During the years ended June 30, 2023 and 2022, Devereux revised estimates made in prior years to reflect the passage of time and the availability of more recent information, such as cost report settlement activity, associated with the related revenue estimates. For the years ended June 30, 2023 and 2022, the net effect of Devereux's revisions to prior year estimates resulted in net service revenue increasing by approximately \$3,593 and \$4,657, respectively.

The majority of services are rendered to individuals through reimbursement programs administered by state and local governmental agencies, in some cases through a contracted managed care organization. Under these programs, payments are based upon fee-for-service rates, a combination of historical costs and prospectively determined rates, or reasonable costs, as defined. In total, these programs accounted for 94% and 95% of total net service revenue in fiscal years 2023 and 2022, respectively. The remaining services are rendered through payment arrangements with managed care organizations, commercial insurance carriers, or private accounts.

One government agency accounted for 15% of net service revenue in 2023; two government agencies accounted for 16% and 11% of net service revenue in 2022. Aside from these, no agencies accounted for more than 10% of net service revenue in either year.

Certain governmental agencies pay an interim rate or a fixed periodic amount during the period Devereux provides services and retroactively adjust the payment based upon actual costs incurred during the year or based on actual units of service delivered. Third-party settlements with governmental agencies are accrued on an estimated basis in the period the related services are rendered. Estimated settlements due to third-party payors are classified as current or noncurrent based on the anticipated timing of settlements. Differences between the estimated settlement and the finalized amounts are recorded in the year of settlement or when adjustments become known. In the opinion of management, adequate provision has been made for any additional adjustments that may result from the final settlement of outstanding cost reports.

3. Net Service Revenue (continued)

Devereux is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Government activity in the health care industry continues to increase with respect to investigations and allegations concerning possible violations of regulations by health care providers, which could result in the imposition of significant fines and penalties, as well as significant repayments of previously billed and collected revenues of services provided. Devereux has implemented a corporate compliance program and conducts documentation audits of services provided and the underlying clinical documentation to evaluate its compliance with established regulations. When potential overpayments are identified, payors are notified and refunds are issued. While Devereux is currently the subject of certain ongoing reviews and inspections by state and local government agencies, management is not currently aware of any allegations of noncompliance that could have a material adverse effect on the accompanying consolidated financial statements and believes that Devereux is in compliance with applicable laws and regulations in all material respects.

5. Fair Value Measurements

In determining fair value, Devereux uses the market approach. The market approach utilizes prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. Information used to establish fair value estimates falls into three tiers that prioritize the inputs used in measuring fair value. These tiers include Level 1 – defined as observable inputs such as quoted prices in active markets; Level 2 – defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3 – defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The following tables present the fair value hierarchy for Devereux’s financial assets and liabilities (excluding alternative investments of \$926 and \$128 at June 30, 2023 and 2022, respectively) measured at fair value on a recurring basis:

5. Fair Value Measurements (continued)

Devereux's Level 1 securities primarily consist of cash, money market funds, equity mutual funds, fixed-income mutual funds, and multi-asset funds. Devereux determines the estimated fair value for its Level 1 securities using quoted (unadjusted) prices for identical assets or liabilities in active markets. Devereux's Level 2 securities primarily consist of corporate, U.S. government and agency, and municipal bonds. Devereux determines the estimated fair value for its Level 2 securities using quoted prices for similar assets or liabilities in active markets.

The estimated value of the beneficial interests in trusts held by third parties is determined based on information provided by the trustee, including Devereux's proportional interests in the net assets of the trusts. The assets held in trust consist primarily of cash equivalents and marketable securities. The fair value of the interests of trusts held by third parties is measured using the underlying value of the investments, as well as discounted cash flow analysis of the expected cash flow of the trusts, and is reported as Level 3.

Interest rate swaps, which are classified as a Level 2 asset or liability, are valued using present value techniques, including a discounted cash flow analysis on the expected cash flow of the derivatives. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves.

7. Assets Held for Sale

As indicated in Note 1, DCW ceased active program operations during 2023 and its campus in Westminster, Colorado, is being actively marketed for sale and met the asset held for sale criteria. As of June 30, 2023, the carrying value of the land, land improvements, buildings and improvements, and equipment of \$3,745 is reported as assets held for sale on the accompanying consolidated balance sheet. No impairment was identified during the year ended June 30, 2023. The 2012 Colorado Bonds (see Note 10) would be repaid with the proceeds from a sale of this property.

8. Leases

Devereux leases certain property and equipment under operating leases. Leases are classified as either finance or operating based on the underlying terms of the agreement and certain criteria, such as the term of the lease relative to the useful life of the asset and the total lease payments to be made as compared with the fair value of the asset, among other criteria. Finance leases result in an accounting treatment similar to acquisition of the asset.

For leases with initial terms of greater than a year, Devereux records the related right-of-use assets and liabilities at the present value of the lease payments to be paid over the life of the related lease. Devereux's leases may include variable lease payments and renewal options. Variable lease payments are excluded from the amounts used to determine the right-of-use assets and liabilities unless the variable lease payments depend on an index or a rate or are in substance fixed payments. Lease payments related to periods subject to renewal options are also excluded from the amounts used to determine the right-of-use assets and liabilities unless Devereux is reasonably certain to exercise the option to extend the lease. The present value of lease payments is calculated by utilizing the discount rate stated in the lease, when readily determinable. For leases for which this rate is not readily available, Devereux uses its incremental borrowing rate, reflective of lease term and underlying asset. Devereux has made an accounting policy election to separate lease components from non-lease components in contracts when determining its lease payments, as permitted by ASU 2016-02, *Leases (Topic 842)*. As such, Devereux does not account for the applicable non-lease components together with the related lease components when determining the right-of-use assets and liabilities.

Devereux has made an accounting policy election not to record leases with an initial term of less than a year as right-of-use assets and liabilities.

Devereux periodically receives indications of an intention to give from individuals through the settlement of the individuals' estates. The anticipated value of these intended gifts has not been established, nor has it been recognized as an asset on the consolidated balance sheets, unless the gifts are irrevocable.

The beneficial interests in trusts are unconditionally designated for the benefit of Devereux upon the occurrence of some future event. The interests are recorded at fair value as represented by the third-party trustee.

In February 2020, Devereux entered into an agreement with a bank to borrow \$20,000 in variable-rate debt (the 2020 Loan) to finance certain capital expenditures. The 2020 Loan has a 25-year amortization schedule but grants the bank an option to put the loan to Devereux after 15 years (2035). Devereux can request up to two extensions of the maturity date by no more than five years per extension. Concurrent with the 2020 Loan, Devereux entered into a 15-year interest rate swap agreement with an original notional amount of \$20,000 (current notional amount of \$18,164) that effectively fixes the interest rate at 2.884%. The fair value of the interest rate swap was \$2,759 and \$2,024 at June 30, 2023 and 2022, respectively, and is included in other assets on the consolidated balance sheets.

10. Long-Term Debt (continued)

In October 2016, Devereux issued the 2016 Pennsylvania Bonds to refinance previously issued bonds. The 2016 Pennsylvania Bonds were sold at an original issue premium of \$2,233, which resulted in an effective interest rate of 2.74% over the life of the bonds. The 2016 Pennsylvania Bonds mature over a 15-year period.

In February 2015, Devereux entered into an agreement with a bank to borrow \$5,000 in fixed-rate debt (the 2015 Loan) to finance certain capital expenditures. The 2015 Loan matures over a 25-year period, and the bank has the option to put the loan to Devereux after ten years (February 12, 2025). The interest rate is currently fixed at 4.214% for ten years, after which it will reset at the then-current rate if the bank does not exercise its put option.

In July 2013, Devereux entered into an agreement with a bank to borrow \$9,000 in variable-rate debt (the 2013 Loan) that was used to currently refund previously issued bonds and finance certain capital expenditures. The 2013 Loan, as amended, matures over a 15-year period; however, on July 1, 2025, the bank has the option to put the loan to Devereux. Concurrent with the 2013 Loan, Devereux entered into a 15-year interest rate swap with an original notional amount of \$8,393 (current notional amount of \$4,100) that effectively fixes the interest rate at 5.028%. The fair value of the interest rate swap was \$143 and \$4 at June 30, 2023 and 2022, respectively, and is included in other assets on the consolidated balance sheet.

The 2012 Pennsylvania Bonds and 2012 Colorado Bonds were issued to refinance previously issued tax-exempt debt. All of the bonds were acquired by a financial institution. In 2022, agreements related to the 2012 Pennsylvania and 2012 Colorado Bonds were amended to fix the interest rate over the entire 15-year term at 1.377% and 1.398%, respectively, and to eliminate put options previously available to the financial institution.

The 2011 Pennsylvania Bonds were issued to refinance previously issued tax-exempt debt. These bonds were paid in full in December 2022.

10. Long-Term Debt (continued)

All of the tax-exempt bonds and the 2013, 2015, and 2020 Loans were issued under a Master Trust Indenture (MTI) for which TDF, HD Foundation, and DCW represent the obligated group. DevCorp (Note 1) became a member of the obligated group in August 2022. The debt under the MTI is secured by an interest in the gross revenues of the obligated group members, as defined. Agreements related to the Revolving Credit Agreement (see Note 11) and the debt issued under the MTI contain financial covenants requiring Devereux to maintain debt service coverage and liquidity ratios. All such ratio covenants were complied with as of and for the years ended June 30, 2023 and 2022.

Original issue premiums or discounts on bonds are amortized using the interest method over the term of the related debt.

Other information relating to each of the bonds, all of which have serial and term components, is as follows:

11. Line of Credit

Devereux has a bank Revolving Credit Agreement (Revolver) with a maximum borrowing limit of \$39,000, which is available for working capital and letters of credit. The Revolver expires November 30, 2023, although management intends to extend the Revolver beyond that date. Effective November 1, 2023 the maximum borrowing limit is reduced to \$29,000. The Revolver is secured by a parity lien on gross revenues as defined under the MTI (see Note 10). Interest on working capital loans accrues at the Daily Simple Secured Overnight Financing Rate plus an applicable margin of 1.00%, with a floor of 1.50%. At June 30, 2023, no working capital loans were outstanding; \$3,889 of working capital loans were outstanding at June 30, 2022. At June 30, 2023, letters of credit aggregating \$18,090 were used to secure deductibles under insurance policies (see Note 16) with this amount decreasing to \$17,076 after June 30, 2023. Fees on outstanding letters of credit accrue at 1.00% at June 30, 2023 and 2022. A commitment fee of 0.15% is paid on unused Revolver amounts.

12. Obligation to Provide Future Services and the Use of Facilities to Continuing Care Individuals

Devereux is contractually obligated to provide care for life to certain individuals. The obligation, which recognizes the future costs to be incurred under these continuing care contracts, was computed using the following assumptions: annual cost of care based on actual operating costs; life expectancy; an inflation factor of 6.00% and 5.75% of the average annual operating cost for 2023 and 2022, respectively; a discount rate of 5.50% for 2023 and 2022; and a reduction for any supplemental payments, including Social Security, which is assumed to increase 3.00% and 2.00% annually, received on behalf of the individuals for 2023 and 2022, respectively.

As of June 30, 2023, there were 12 individuals covered by continuing care contracts or similar arrangements.

Devereux also recognizes the present value of certain arrangements with several continuing care residents under which Devereux is the beneficiary of the assets of trusts established on behalf of the residents.

The present value of the components of the obligation follows:

13. Retirement Plan

Devereux has a defined contribution retirement plan covering all eligible employees under which the Teachers Insurance and Annuity Association serves as Trustee. All employees are eligible to make tax deferred contributions immediately after hire. To be eligible for an employer contribution, an employee hired before January 1, 2019, must have completed two years of service, work a minimum of 1,000 hours annually, and be actively employed at the end of the plan year (December 31). Employer contributions to the plan for this group are generally based on 5% of the employee's compensation, plus a match of employee contributions of up to 2% of compensation. Employees hired on or after January 1, 2019, upon meeting the plan's eligibility requirements, receive employer contributions equal to 3% of the employee's compensation upon completion of one year of service. Matching contributions for this group are discretionary. Employer contributions are made annually each January and are charged to expense as earned. Contribution expense was \$9,443 and \$10,384 in 2023 and 2022, respectively, and is included within employee benefits on the consolidated statements of operations and changes in net assets.

Workers' Compensation

Devereux maintained workers' compensation insurance with a per-claim deductible of \$750 for 2023 and 2022. Due to this level of retention, Devereux maintains \$830 of cash on deposit with its insurers for the payment of future claims, which is included in operating fund investments on the consolidated balance sheets. Additionally, Devereux posted letters of credit of \$18,090 and \$21,016 as collateral for its obligations under both the workers' compensation and automobile programs as of June 30, 2023 and 2022, respectively (see Note 11). Subsequent to June 30, 2023, the letter of credit requirement was reduced to \$17,076. Based upon historical loss experience and actuarially determined calculations, management recorded a \$10,612 and \$10,001 liability for the estimated retention and costs of claims not settled as of June 30, 2023 and 2022, respectively, as a component of reserves under insurance programs and other liabilities on the consolidated balance sheets.

Professional and General Liability

For 2023, Devereux was self-insured for the first \$10,000 on any professional and general liability claim, with umbrella coverage available above this level. For 2022, Devereux had primary coverage under a claims-made policy for professional liability and an occurrence policy for general liability, under which there was a \$5,000 per claim deductible and a \$10,000 aggregate deductible. In years prior to 2022, the structure was similar to 2022 but deductibles were generally lower. To secure its obligations under these programs, Devereux was required to post \$14,000 of aggregate collateral, of which \$5,000 is a component of current portion of assets limited as to use, using insurance trusts holding U.S. government and agency, corporate, and municipal bonds. Based upon historical loss experience and actuarially determined calculations, management recorded a \$70,108 and \$70,775 liability for the estimated retention and cost of claims and incidents not settled and claims incurred but not reported as of June 30, 2023 and 2022, respectively, as a component of reserves under insurance programs and other liabilities on the consolidated balance sheets. Devereux plans to continue to obtain adequate professional and general liability insurance. Devereux has recorded related insurance recoveries receivables included in other current assets of \$8,550 and other assets of \$8,455 on the consolidated balance sheets at June 30, 2023, and insurance recoveries receivables included in other assets of \$13,345 at June 30, 2022, in consideration of the expected insurance recoveries.

Litigation

Litigation pending against Devereux includes certain claims arising in the normal course of its activities. Based on the information presently available to Devereux, management believes that the probable recoveries and estimated costs and expenses of defense of ongoing litigation, after application of any available insurance coverage, will not have a material adverse effect on Devereux's consolidated operations or financial condition beyond the amounts that have already been recognized in the accompanying consolidated financial statements.

Refundable Advance – PPP Loan

On May 5, 2021, Devereux received loan proceeds in the amount of \$10,000 pursuant to the Paycheck Protection Program (PPP) established as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. Under the terms of the PPP, loan proceeds and accrued interest are forgivable if they are used for qualifying expenses such as payroll, benefits, rent, and utilities, and if the recipient maintains its payroll levels over a specified period of time as described in the CARES Act. Any unforgiven portion of the loan is payable over five years at an interest rate of 1%, with a deferral of payments for the first ten months after the end of the loan's covered period. Devereux received acknowledgment of total loan forgiveness on March 9, 2022, and the loan balance forgiveness of \$10,000 was recognized as other revenue during the year ended June 30, 2022.

EXPLANATION

The purpose of this request is to provide behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs who have more intensive behavioral and mental health needs that cannot be met safely in the community without intensive supports.

The Contractors will deliver evidence-based and trauma-informed clinical services to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. The Contractors will support the Department's efforts to provide better long-term outcomes for youth by providing services that will be short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2024.

The Contractors will provide varying residential treatment levels of care ranging from levels one through four, with four being the most intensive treatment. All Contractors will provide services that are family-driven, youth-guided, community-based, trauma-informed, and culturally and linguistically competent in accordance with RSA 135-F. Depending on the level of care, Contractors will provide services that may include but are not limited to:

- Residential/milieu services through direct care professionals;
- Trauma-informed treatment models including evidence based practices;
- Mental health/clinical services provided by clinical staff;
- Educational services, as approved by the Department of Education;
- Independent living/employment support;
- Positive Youth Development/Recreational opportunities;
- Safety and supervision; and
- Care coordination of all needs including medical/dental and other needs.

The Department will monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraint and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 4

- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached.

This requested action includes five (5) contracts in addition to the nine (9) contracts presented to the Governor and Executive Council on July 14, 2021 (item #14). The Department plans to submit the remaining two (2) contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

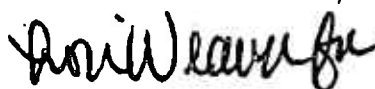

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;
- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Areas served: Statewide.

Source of Funds: CFDA #93.658, FAIN #2101NHFOST CFDA #93.558, FAIN# 2101NHTANF, CFDA #93.659, FAIN #2101NHADPT, CFDA #93.778, FAIN #2105NH5ADM

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Shibinette

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.
6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

**New Hampshire Department of Health and Human Services

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

 - 11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.
- 12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

- 13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:

INDEPENDENT AUDITORS' REPORT

To the Board of Directors of
Dover Children's Home, Inc.

Qualified Opinion

We have audited the accompanying financial statements of Dover Children's Home, Inc. (a nonprofit organization), which comprise the statements of financial position as of September 30, 2022 and 2021, and the related statements of activities and changes in net assets, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the financial statements referred to above present fairly, in all material respects, the financial position of Dover Children's Home, Inc. as of September 30, 2022 and 2021, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinion

Due to the inadequacy of accounting records for the years prior to the year ended May 31, 2008 (the first year we were engaged as auditors), we were unable to form an opinion regarding the net assets of Dover Children's Home, Inc. and the related restrictions thereon (see **Note 6**).

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Dover Children's Home, Inc. and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Dover Children's Home, Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Dover Children's Home, Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Dover Children's Home, Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

**NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021**

NOTE 1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

Dover Children's Home, Inc. (the Home) is a non-profit organization designed to provide a home for the reception, care and instruction of needy, neglected, or abused children. The majority of the Home's funding is from federal and state funds administered through the State of New Hampshire Department of Health and Human Services.

Basis of Presentation

The financial statements of the Home have been prepared in accordance with U.S. generally accepted accounting principles (US GAAP), which require the Home to report information regarding its financial position and activities according to the following net asset classifications:

Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Home. These net assets may be used at the discretion of the Home's management and board of directors.

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Home. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity.

As of September 30, 2022 and 2021, the Home had \$4,060,938 and \$5,339,169 of net assets with donor restrictions, respectively.

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

Management uses estimates in preparing financial statements. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. On an ongoing basis, management evaluates the estimates and assumptions based on new information. Management believes that the estimates and assumptions are reasonable in the circumstances, however, actual results could differ from those estimates.

DOVER CHILDREN'S HOME, INC.

**NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021**

Income Taxes

The Home is exempt from Federal income taxes under Section 501(c)(3) of the Internal Revenue Code, except on net income derived from unrelated business activities, and as a result of having no unrelated business activities for each of the years ended September 30, 2022 and 2021, has made no provision for Federal income taxes in the accompanying financial statements.

Management has reviewed the tax positions for the Home under ASC 740, *Accounting for Income Taxes*, which establishes the minimum threshold for recognizing, and a system for measuring, the benefits of tax return positions in financial statements. Management has analyzed the Home's tax positions taken on its information returns for the previous three tax years.

Cash and Cash Equivalents

The Home considers all highly liquid investments with an original maturity date of less than three months to be cash equivalents. The cash equivalents at September 30, 2022 and 2021 consist of money market accounts. Cash equivalents totaled \$105,873 and \$110,738 on September 30, 2022 and 2021, respectively.

Accounts Receivable

Accounts receivable represent amounts due from Medicaid and DCYF, as well as other small programs funded by the State of New Hampshire for the years ended September 30, 2022 and 2021. The amounts are based on the per diem rate paid for residents of the Home. The per diem rate is determined on an annual basis.

The Home considers accounts receivable to be fully collectible. Accordingly, no allowance for doubtful accounts is required. If amounts become uncollectible, they will be charged to operations and an allowance will be created when that determination is made.

Accounts Receivable, other

At September 30, 2022, accounts receivable other includes \$136,767 in reimbursement grant funds through the New Hampshire Department of Health and Human Services related to improvements made to the home throughout the year ended September 30, 2022 (see Note 9).

Additionally, accounts receivable other includes fundraising revenue earned but not yet received totaling \$30,569 and a promise to give in the amount of \$12,128. There was no accounts receivable, other for the year ended September 30, 2021.

Inventory

Food inventories purchased for use in program residential services are carried at the lower of first-in, first-out cost or net realizable value.

DOVER CHILDREN'S HOME, INC.**NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021****Investments**

Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statements of financial position. The values of the securities are subject to market fluctuations and are uninsured (see **Note 4**). Unrealized gains and losses and investment income from restricted investments are included in the change in net assets (see **Note 5**).

Property and Equipment

Property and equipment are recorded at cost, if purchased, or at fair value at the date of donation in the instance of donated property. Such donations are reported as unrestricted contributions unless the donor has restricted the donated asset to a specific purpose. Costs for maintenance and repairs are charged against operations. Renewals and betterments which materially extend the life of the assets are capitalized.

Depreciation is provided over the life of the related assets using the straight line method as follows:

	<u>Years</u>
Buildings and building improvements	10 - 40
Furniture and equipment	5 - 10
Vehicles	5

Depreciation expense for the years ended September 30, 2022 and 2021 was \$71,387 and \$66,114, respectively.

Accrued Paid Time Off

Accrued paid time off represents the Home's liability for the cost of unused employee paid time off. The Home allows employees to carryover up to 120 hours of accrued paid time off which is payable when used or in the event of employee termination. The Home also allows employees to use amounts in excess of the 120 hours for medical or other approved leave. The amount in excess of the 120 hours will not be paid out in the event of termination. The excess hours represents \$19,379 and \$18,115 of the total accrued paid time off balance at September 30, 2022 and 2021, respectively. The Home's total liability for the accrued paid time off at September 30, 2022 and 2021, including the excess hours, is \$72,831 and \$56,590, respectively.

Functional Allocation of Expenses

The costs of providing the various program services, fundraising, and general and administrative support have been summarized on a functional basis. Natural expenses are defined by their nature, such as salaries, occupancy, supplies, etc. Functional expenses are classified by the type of activity for which expenses were incurred, such as management and general, fundraising and direct program costs. Expenses are allocated by function using a reasonable and consistent approach that is primarily based on function and use. The cost of providing certain program and supporting services have been directly charged.

**NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021**

Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practical to estimate the value:

Accounts receivables – The carrying value of these accounts approximates fair value due to their short term nature.

Investments – The fair value of investments are measured using a fair value hierarchy, which prioritizes the inputs used in measuring fair values (see **Note 5**).

Accounts payable, accrued expenses, and deferred revenue – The carrying value of these accounts approximates fair value due to the short term nature of the obligations.

New Accounting Pronouncement

In September 2020, the FASB issued Accounting Standards Update (ASU) No. 2020-07, *Not-for-Profit Entities (Topic 958): Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets*, intended to improve transparency in the reporting of contributed nonfinancial assets, also known as gifts-in-kind, for not-for-profit organizations. Examples of contributed nonfinancial assets include fixed assets such as land, buildings, and equipment; the use of fixed assets or utilities; materials and supplies, such as food or clothing; intangible assets; and recognized contributed services. The ASU requires a not-for-profit organization to present contributed nonfinancial assets as a separate line item in the statement of activities, apart from contributions of cash or other financial assets. It also requires certain disclosures for each category of contributed nonfinancial assets recognized. The Home adopted the new standard effective October 1, 2021.

Revenue Recognition - Grants

The Home is awarded cost reimbursement grants by the New Hampshire Department of Health and Human Services through Medicaid and the Division for Children Youth & Families. Revenues associated with these grants are recorded in the period the associated care is provided.

Revenue Recognition – Fundraising

The Home recognizes revenue from all fundraising related activities in the period in which the event occurs.

Contributions

All contributions are considered to be available for the general programs of the Home unless specifically restricted by the donor. Amounts received that are designated for future periods or restricted by the donor for specific purposes are reported as net assets with donor restrictions. Contributions are recognized in the period promised.

DOVER CHILDREN'S HOME, INC.**NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021****Contributed Support**

Many individuals involved with the Home have donated significant time to its activities and programs; however, no amount has been recognized in these financial statements because the contributed services did not meet the requirements for recognition.

It is the Home's goal to maintain financial assets to meet 6 months of operating expenses which approximated \$1,039,000 and \$718,000, respectively, at September 30, 2022 and 2021.

NOTE 3. CONCENTRATION OF CREDIT RISK

The Home maintains its cash balances at one local financial institution. At September 30, 2022 and 2021, there were no balances in excess of the Federal Deposit Insurance Corporation (FDIC) limit of \$250,000. However, cash balances may exceed the insured limits at times throughout the year.

The Home received approximately 69% and 56% of its funding from Medicaid and the Division of Children, Youth and Families (DCYF) combined for the years ended September 30, 2022 and 2021, respectively. At September 30, 2022 and 2021, Medicaid and DCYF accounted for 82% and 100%, respectively, of the balance in accounts receivable.

NOTE 5. FAIR VALUE MEASUREMENTS

FASB ASC TOPIC No. 820-10 provides a definition of fair value which focuses on an exit price rather than an entry price, establishes a framework in generally accepted accounting principles for measuring fair value which emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and requires expanded disclosures about fair value measurements. In accordance with *FASB ASC 820-10*, the Home may use valuation techniques consistent with market, income and cost approaches to measure fair value. As a basis for considering market participant assumptions in fair value measurements, *ASC Topic 820* establishes a fair value hierarchy, which prioritizes the inputs used in measuring fair values.

The hierarchy gives the highest priority to Level 1 measurements and the lowest priority to Level 3 measurements. The three levels of the fair value hierarchy under *ASC Topic 820* are described as follows:

Level 1 - Inputs to valuation methodology are quoted prices available in active markets for identical investments as of the reporting date.

Level 2 - Inputs to the valuation methodology are other than quoted market prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value can be determined through the use of models or other valuation methodologies.

Level 3 - Inputs to the valuation methodology are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

The following is a description of the valuation methodologies used for assets at fair value. There have been no changes in the methodologies used at September 30, 2022.

Government obligations: Valued using pricing models maximizing the use of observable inputs for similar securities.

Non-government obligations: Consist of corporate bonds that are valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings.

DOVER CHILDREN'S HOME, INC.**NOTES TO FINANCIAL STATEMENTS**
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021

Real assets: Consist of real estate investment trust (REIT) stocks which are actively traded and are valued at the daily closing price as reported by the trust. These trusts are required to publish their daily net asset value (NAV) and to transact at that price. All REIT's held by the Home are open-end REIT's that are registered with the Securities and Exchange Commission.

Common stocks: Valued at the closing market price on the stock exchange where they are traded (primarily the New York Stock Exchange).

Mutual funds: All actively traded mutual funds are valued at the daily closing price as reported by the fund. These funds are required to publish their daily net asset value (NAV) and to transact at that price. All mutual funds held by the Home are open-end mutual funds that are registered with the Securities and Exchange Commission.

NOTE 6. QUALIFIED OPINION

Due to the inadequacy of accounting records for the years prior to the year ended May 31, 2008, extensive research was performed in an attempt to reach a conclusion related to the restrictions of the Home's net assets and authorization related to the release of net assets from restrictions, if any. The research proved to be inconclusive, which has resulted in qualified opinions for the periods ended during 2008 through 2022 as it relates to the Home's net assets, the restrictions thereon, and authorization related to the release of net assets from restrictions, if any. Due to the uncertainty regarding the balance of net assets with donor restrictions, the Board has elected to treat all earnings on net assets with donor restrictions as net assets with donor restrictions, unless a transfer is made for operational purposes at the discretion of the Board of Directors, at which time the amount is transferred to net assets without donor restriction.

NOTE 7. RECLASSIFICATION

Certain amounts and accounts from the prior year financial statements have been reclassified to enhance the comparability with the presentation of the current year.

NOTE 8. LONG TERM CARE STABILIZATION PROGRAM

In response to COVID-19, in April 2020, the State of New Hampshire established the Long Term Care Stabilization (LTCS) Program to provide stipends to certain front line Medicaid providers. The program was developed to incentivize these direct care workers to remain in or rejoin this critical workforce and continue to provide high quality care to vulnerable persons during the pandemic. Under the program, the New Hampshire Department of Employment Security (NHES) would distribute \$300 per week in stipends to full time qualifying front line workers and \$150 per week in stipends to part time qualifying front line workers. The funding for the LTCS Program was provided through the Coronavirus Relief Fund and continued through December 31, 2020. During the year ended September 30, 2021, the Home received grant revenue of \$32,550 and expended \$32,550 under the grant through payroll.

NOTE 9. OTHER FUNDING

During the year ended September 30, 2022, the Home was awarded \$331,655 under the terms of a reimbursement grant from the State of New Hampshire through the New Hampshire Department of Health and Human Services. The funds were for State approved updates to the Home's property. All funds had been expended during the year ended September 30, 2022. The Home had received \$194,888 in reimbursements as of September 30, 2022. The remaining \$136,767 of reimbursements requested are included in accounts receivable, other at September 30, 2022 and were received subsequent to year end on November 17, 2022.

The Home records the value of in-kind contributions according to accounting policies described in **Note 1**.

The fair value of gifts in kind included as contributions in the financial statements and the corresponding expenses for the year ended September 30, 2022 and 2021 are as follows:

	<u>2022</u>	<u>2021</u>
Donated food	\$ 25,972	\$ 18,252
Donated gift cards	21,812	7,778
Donated electronics	880	4,200
Donated heating fuel	<u>4,396</u>	<u>2,713</u>
Total	<u>\$ 53,060</u>	<u>\$ 32,943</u>

NOTE 11. OTHER MATTERS

The impact of the novel coronavirus (COVID-19) and measures to prevent its spread are affecting the Home's business. The significance of the impact on the Home's financial operational results will be dictated by the length of time that such disruptions continue.

During the years September 30, 2022 and 2021, and through the date of this report, the Home has not experienced a significant decline in revenues, nor a significant change in its operations.

NOTE 12. SUBSEQUENT EVENTS

Subsequent events are events or transactions that occur after the statement of financial position date, but before financial statements are available to be issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the statement of financial position date, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the statement of financial position date, but arose after that date. Management has evaluated subsequent events through March 22, 2023, the date the financial statements were available to be issued.

Subsequent to year end the Home made the decision to remove their existing 403(b) retirement offering and replace it with a Simple IRA with up to a 3% employer match. The Simple IRA went into effect on January 1, 2023.

**NOTES TO FINANCIAL STATEMENTS
FOR THE YEARS ENDED SEPTEMBER 30, 2022 AND 2021**

Subsequent to year end the Home was notified by the State of New Hampshire Governor's Office for Emergency Relief and Recovery that they would be the recipients of grant funding to be used towards the Home's ongoing renovation project. However, as of the date of this audit report the funding has not yet been officially awarded to the Home and the amount of funding to be received has not yet been determined.

EXPLANATION

The purpose of this request is to provide behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs who have more intensive behavioral and mental health needs that cannot be met safely in the community without intensive supports.

The Contractors will deliver evidence-based and trauma-informed clinical services to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. The Contractors will support the Department's efforts to provide better long-term outcomes for youth by providing services that will be short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These

Individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2024.

The Contractors will provide varying residential treatment levels of care ranging from levels one through four, with four being the most intensive treatment. All Contractors will provide services that are family-driven, youth-guided, community-based, trauma-informed, and culturally and linguistically competent in accordance with RSA 135-F. Depending on the level of care, Contractors will provide services that may include but are not limited to:

- Residential/milieu services through direct care professionals;
- Trauma-informed treatment models including evidence based practices;
- Mental health/clinical services provided by clinical staff;
- Educational services, as approved by the Department of Education;
- Independent living/employment support;
- Positive Youth Development/Recreational opportunities;
- Safety and supervision; and
- Care coordination of all needs including medical/dental and other needs.

The Department will monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraint and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;
- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This requested action includes nine (9) contracts and the Department plans to submit seven (7) additional contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Areas served: Statewide.

Source of Funds: CFDA #93.658, FAIN #2101NHFOST, CFDA #93.558, FAIN# 2101NHTANF, CFDA #93.659, FAIN #2101NHADPT, CFDA #93.778, FAIN #2105NH5ADM

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549; 45 CFR Part 76. See the attached definitions.
6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

- 11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

- 12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

INDEPENDENT AUDITORS' REPORT

Board of Directors
Easter Seals New Hampshire, Inc. and Subsidiaries

Opinion

We have audited the consolidated financial statements of Easter Seals New Hampshire, Inc. and Subsidiaries (Easter Seals NH), which comprise the consolidated statements of financial position as of August 31, 2022 and 2021, and the related consolidated statements of activities and changes in net assets, functional expenses and cash flows for the years then ended, and the related notes to the consolidated financial statements (collectively, the financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Easter Seals NH as of August 31, 2022 and 2021, and the changes in their net assets, functional expenses and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States (*Government Auditing Standards*). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Easter Seals NH and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Easter Seals NH's ability to continue as a going concern for a period of within one year after the date that the financial statements are issued or available to be issued.

Board of Directors
Easter Seals New Hampshire, Inc. and Subsidiaries

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Easter Seals NH's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Easter Seals NH's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Financial Information

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying other financial information is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Board of Directors
Easter Seals New Hampshire, Inc. and Subsidiaries

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 20, 2022 on our consideration of Easter Seals NH's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Easter Seals NH's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Easter Seals NH's internal control over financial reporting and compliance.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of Easter Seals New Hampshire, Inc. and the subsidiaries of which it is the sole member as described in note 1. Significant intercompany accounts and transactions have been eliminated in consolidation.

Cash, Cash Equivalents and Restricted Cash

Easter Seals NH considers all highly liquid securities purchased with an original maturity of 90 days or less to be cash equivalents. Cash equivalents consist of cash, and money market funds, excluding assets limited as to use.

Easter Seals NH maintains its cash and cash equivalents in bank deposit accounts which, at times, may exceed amounts guaranteed by the Federal Deposit Insurance Corporation. Financial instruments which subject Easter Seals NH to credit risk consist primarily of cash equivalents and investments. Easter Seals NH's investment portfolio consists of diversified investments, which are subject to market risk. Investments that exceeded 10% of investments include the Lord Abbett Short Duration Income A Fund with a balance of \$10,055,500 and \$9,677,021 as of August 31, 2022 and 2021, respectively.

Restricted cash represents reserve accounts held by New Hampshire Housing Finance Authority (NHHFA) for insurance, taxes, replacement costs and operations as well as security deposit accounts held for tenants.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

August 31, 2022 and 2021

2. Summary of Significant Accounting Policies (Continued)

The following table provides a reconciliation of cash and cash equivalents and restricted cash reported within the consolidated statements of financial position that sum to the total of the same such amounts shown in the consolidated statements of cash flows at August 31:

	<u>2022</u>	<u>2021</u>
Cash and cash equivalents	\$14,837,761	\$14,389,013
Restricted cash	<u>79,819</u>	<u>82,461</u>
	<u>\$14,917,580</u>	<u>\$14,471,474</u>

Assets Limited as to Use and Investments

Assets limited as to use consists of cash and cash equivalents, short-term certificates of deposit with original maturities greater than 90 days, but less than one year, and investments. Investments are stated at fair value. Realized gains and losses on investments are computed on a specific identification basis. The changes in net unrealized and realized gains and losses on investments are recorded in other non-operating expenses, gains and losses in the accompanying consolidated statements of activities and changes in net assets. Donated securities are stated at fair value determined at the date of donation.

Beneficial Interest in Trust

Easter Seals NH is the beneficiary of a trust held by others recorded in other assets in the accompanying consolidated statements of financial position. Easter Seals NH has recorded as an asset the fair value of its interest in the trust and such amount is included in net assets with donor restrictions, based on the underlying donor stipulations. The change in the interest due to fair value change is recorded within other non-operating expenses, gains and losses as activity with donor restrictions.

Fixed Assets

Fixed assets are recorded at cost less accumulated depreciation and amortization. Expenditures for maintenance and repairs are charged to expense as incurred, and expenditures for major renovations are capitalized. Depreciation is computed on the straight-line method over the estimated useful lives of the underlying assets. Leasehold improvements are amortized using the straight-line method over the shorter of the lease term or the estimated useful life of the asset.

Fixed assets obtained by Easter Seals NH as a result of acquisitions on or after September 1, 2011 are recorded at estimated fair value as of the date of the acquisition in accordance with generally accepted accounting principles guidance for acquisitions by a not-for-profit entity.

Donated property and equipment not subject to donor stipulated conditions is recorded at fair value at the date of donation. If donors stipulate how long the assets must be used, the contributions are recorded as restricted support or, if significant uncertainties exist, as deferred revenue pending resolution of the uncertainties. In the absence of such stipulations, contributions of property and equipment are recorded as support without donor restrictions. See also note 8.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

August 31, 2022 and 2021

2. Summary of Significant Accounting Policies (Continued)

Long-Lived Assets

When there is an indication of impairment, management considers whether long-lived assets are impaired by comparing gross future undiscounted cash flows expected to be generated from utilizing the assets to their carrying amounts. If cash flows are not sufficient to recover the carrying amount of the assets, impairment has occurred, and the assets are written down to their fair value. Significant estimates and assumptions are required to be made by management in order to evaluate possible impairment.

Certain long-lived assets were deemed impaired in 2022. See note 8. No long-lived assets were deemed impaired at August 31, 2021.

Bond Issuance Costs

Bond issuance costs are being amortized to interest expense using the straight-line method over the repayment period of the related bonds, or the expected time until the next refinancing, whichever is shorter. Interest expense recognized on the amortization of bond issuance costs during 2022 and 2021 was \$6,110. The bond issuance costs are presented as a component of long-term debt on the accompanying consolidated statements of financial position.

Revenue Recognition and Program and Other Accounts Receivable

Easter Seals NH accounts for revenues (mainly relating to fees and tuition in the accompanying consolidated statements of activities and changes in net assets) under Accounting Standards Codification (ASC) 606, *Revenue from Contracts with Customers*, and determines the amount of revenue to be recognized through application of the following steps:

- Identification of the contract with a customer;
- Identification of the performance obligations in the contract;
- Determination of the transaction price;
- Allocation of the transaction price to the performance obligations in the contract; and
- Recognition of revenue when or as Easter Seals NH satisfies the performance obligations.

Easter Seals NH determines the transaction price based on standard charges for goods and services provided, reduced by any applicable discounts, contractual adjustments provided to third-party payors, or explicit and implicit price concessions provided to groups or individuals. A performance obligation is a promise in a contract with a customer to transfer products or services that are distinct. Determining whether products and services are distinct performance obligations that should be accounted for separately or combined as one unit of accounting may require significant judgement.

A significant portion of Easter Seals NH's revenues are derived through arrangements with third-party payors that provide for payment at amounts different from its established rates. Payment arrangements include discounted charges and prospectively determined payments. As such, Easter Seals NH is dependent on these payors in order to carry out its operating activities. There is at least a reasonable possibility that recorded estimates could change by a material amount in the near term. Differences between amounts previously estimated and amounts subsequently determined to be recoverable or payable are included in fees and tuition in the year that such amounts become known.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

August 31, 2022 and 2021

2. Summary of Significant Accounting Policies (Continued)

Revenues are recognized when performance obligations are satisfied, or attributable to the period in which specific terms of the funding agreement are satisfied, and to the extent that expenses have been incurred for the purposes specified by the funding source. Revenue balances in excess of the foregoing amounts are deferred until any restrictions are met or allowable expenditures are incurred.

The collection of outstanding receivables from third-party payors, patients and other clients is Easter Seals NH's primary source of cash and is critical to its operating performance. The primary collection risks relate to uninsured accounts, including accounts for which the primary insurance carrier has paid the amounts covered by the applicable agreement, but individual responsibility amounts (deductibles and copayments) remain outstanding. Implicit price concessions relate primarily to amounts due directly from patients and other clients. Estimated implicit price concessions are recorded for all uninsured accounts, regardless of the aging of those accounts. Accounts are written off when all reasonable internal and external collection efforts have been performed. The estimates for implicit price concessions are based upon management's assessment of historical write-offs and expected net collections, business and economic conditions, trends in federal, state and private employer health care coverage and other collection indicators. Management relies on the results of detailed reviews of historical write-offs and collections at facilities and programs that represent a majority of revenues and accounts receivable (the "hindsight analysis") as a primary source of information in estimating the collectability of accounts receivable. Management performs the hindsight analysis regularly, utilizing rolling accounts receivable collection and write-off data. Management believes its regular updates to the estimated implicit price concession amounts provide reasonable estimates of revenues and valuations of accounts receivable. These routine, regular changes in estimates have not resulted in material adjustments to the valuations of accounts receivable or period-to-period comparisons of operations. At August 31, 2022 and 2021, estimated implicit price concessions of \$855,900 and \$1,079,600, respectively, had been recorded as reductions to program and other accounts receivable balances to enable Easter Seals NH to record revenues and accounts receivable at the estimated amounts expected to be collected.

Unconditional contributions are recognized when the promise to give is made and are recorded at the net present value of estimated future cash flows.

Advertising

Easter Seals NH's policy is to expense advertising costs as incurred.

Functional Allocation of Expenses

The costs of providing the various programs and other activities have been summarized on a functional basis in the accompanying consolidated statements of activities and changes in net assets. Accordingly, certain costs have been allocated among the programs and supporting services based mainly on time records and estimates made by Easter Seals NH's management.

Charity Care (Unaudited)

Easter Seals NH has a formal charity care policy under which program fees are subsidized as determined by the Board of Directors. Free and subsidized services are rendered in accordance with decisions made by the Board of Directors and, at established charges, amounted to approximately \$8,099,000 and \$6,850,000 for the years ended August 31, 2022, and 2021, respectively.

Income Taxes

Easter Seals New Hampshire, Inc., Easter Seals Maine, Inc. (prior to dissolution on August 31, 2022), Easter Seals VT and Farnum Center are exempt from both federal and state income taxes under Section 501(c)(3) of the Internal Revenue Code, with the exception of certain federal taxes applicable to not-for-profit entities.

Tax-exempt organizations could be required to record an obligation for income taxes as the result of a tax position historically taken on various tax exposure items including unrelated business income or tax status. In accordance with U.S. GAAP, assets and liabilities are established for uncertain tax positions taken or positions expected to be taken in income tax returns when such positions are judged to not meet the “more-likely-than-not” threshold, based upon the technical merits of the position.

Champlin Place, Inc. is a for-profit organization subject to Federal and state taxes. Deferred income taxes of Champlin Place, Inc. are computed using the asset and liability method under which deferred income tax assets and liabilities are computed based on temporary differences between the financial statement and tax bases of assets and/or liabilities which will result in taxable or deductible amounts on future tax returns. Champlin Place, Inc. records a valuation allowance against any deferred tax assets when it determines it is unlikely that the tax asset will be realized. No significant deferred income taxes have been realized for Champlin Place, Inc. since the entity’s inception.

Management has evaluated tax positions taken by Easter Seals New Hampshire, Inc., Easter Seals Maine, Inc., Easter Seals VT and Farnum Center on their respective filed tax returns and concluded that the organizations have maintained their tax-exempt status, do not have any significant unrelated business income, and have taken no uncertain tax positions that require adjustment to or disclosure in the accompanying consolidated financial statements. Champlin Place, Inc.’s management has determined that Champlin Place, Inc. has not taken, nor expects to take, any uncertain tax positions in any income tax return.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Estimates are used in accounting for explicit and implicit price concessions in revenue, workers’ compensation liabilities and contingencies.

Derivatives and Hedging Activities

Accounting guidance requires that Easter Seals NH record as an asset or liability the fair value of the interest rate swap agreement described in note 11. Easter Seals NH is exposed to repayment loss equal to the net amounts receivable under the swap agreement (not the notional amount) in the event of nonperformance of the other party to the swap agreement. However, Easter Seals NH does not anticipate nonperformance and does not obtain collateral from the other party.

EASTER SEALS NEW HAMPSHIRE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

August 31, 2022 and 2021

2. Summary of Significant Accounting Policies (Continued)

As of August 31, 2022, and 2021, Easter Seals NH had recognized a liability of \$995,184 and \$2,238,251, respectively, as a result of the interest rate swap agreements discussed in note 11. As a result of changes in the fair value of these derivative financial instruments, Easter Seals NH recognized an increase in net assets of \$1,243,067 and \$658,823 for the years ended August 31, 2022 and 2021, respectively, in the accompanying consolidated statements of activities and changes in net assets.

Increase (Decrease) in Net Assets from Operations

For purposes of display, transactions deemed by management to be ongoing, major or central to the provision of services are reported as revenue and expenses that comprise the increase (decrease) in net assets from operations. The primary transactions reported as other non-operating expenses, gains and losses include the adjustment to fair value of interest rate swaps, the change in the fair value of beneficial interest in trust held by others, gains and losses on sales, disposals and impairment of fixed assets, the contribution of assets from affiliation (see note 15) and net realized and unrealized gains and losses on investments.

Recent Accounting Pronouncements

In February 2016, the FASB issued Accounting Standards Update (ASU) No. 2016-02, *Leases (Topic 842)*. Under ASU 2016-02, at the commencement of a long-term lease, lessees will recognize a liability equivalent to the discounted payments due under the lease agreement, as well as an offsetting right-of-use asset. Lessees (for capital and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the consolidated financial statements, with certain practical expedients available. In July 2018, the FASB issued ASU 2018-10, *Codification Improvements to Topic 842, Leases*, which seeks to clarify ASU 2016-02 with respect to certain aspects of the update and ASU 2018-11, *Leases (Topic 842) – Targeted Improvements*, which provides transition relief on comparative reporting upon adoption of the ASU. The guidance is effective for Easter Seals NH on September 1, 2022. Easter Seals NH has evaluated the impact of the pending adoption of this standard on its consolidated financial statements and estimates that the right-of-use asset and operating lease liability to be recorded at September 1, 2022 will approximate \$2,807,000.

In September 2020, the FASB issued ASU No. 2020-07, *Not-for-Profit Entities (Topic 958): Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets*. ASU 2020-07 enhances the presentation of disclosure requirements for contributed nonfinancial assets. ASU 2020-07 requires entities to present contributed nonfinancial assets as a separate line item in the statements of activities and disclose the amount of contributed nonfinancial assets recognized within the statements of activities by category that depicts the type of contributed nonfinancial assets, as well as a description of any donor-imposed restrictions associated with the contributed nonfinancial assets and the valuation techniques used to arrive at a fair value measure at initial recognition. ASU 2020-07 is effective for Easter Seals NH and was adopted on September 1, 2021. The adoption of this ASU did not have a significant impact on Easter Seals NH's consolidated financial statements.

Subsequent Events

Events occurring after the statement of financial position date are evaluated by management to determine whether such events should be recognized or disclosed in the consolidated financial statements. Management has evaluated events occurring between the end of Easter Seals NH's fiscal year end and December 20, 2022, the date these consolidated financial statements were available to be issued.

3. Classification of Net Assets

The following provides a description of the net asset classifications represented in the Easter Seals NH consolidated statements of financial position:

In accordance with *Uniform Prudent Management of Institutional Funds Act* (UPMIFA), net assets are classified and reported based on the existence or absence of donor-imposed restrictions. Net assets with donor restrictions include contributions and endowment investment earnings subject to donor-imposed restrictions, as well as irrevocable trusts and contributions receivable. Some donor-imposed restrictions are temporary in nature with restrictions that are expected to be met either by actions of Easter Seals NH and/or the passage of time. Other donor-imposed restrictions are perpetual in nature, where the donor stipulates that resources are to be maintained in perpetuity, the income from which is expendable to support all activities of the organization, or as stipulated by the donor.

Donor-restricted contributions whose restrictions are met within the same year as received are reported as support without donor restrictions in the accompanying consolidated financial statements.

In accordance with UPMIFA, Easter Seals NH considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds: (a) the duration and preservation of the fund; (b) the purpose of the organization and the donor-restricted endowment fund; (c) general economic conditions; (d) the possible effect of inflation and deflation; (e) the expected total return from income and the appreciation of investments; (f) other resources of the organization; and (g) the investment policies of the organization.

Revenues are reported as increases in net assets without donor restrictions unless use of the related assets is limited by donor-imposed restrictions. Expenses are reported as decreases in net assets without donor restrictions. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in net assets without donor restrictions unless their use is restricted by explicit donor stipulation or by law. Expirations of donor-imposed restrictions on net assets (i.e. the donor-stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as reclassifications between the applicable classes of net assets.

Investment and Spending Policies

Easter Seals NH has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets. Endowment assets include those assets of donor-restricted funds that Easter Seals NH must hold in perpetuity or for a donor-specified period. Under this policy, as approved by the Board of Directors, the endowment assets are invested in a manner that is intended to produce results that exceed the price and yield results of an appropriate market index while assuming a moderate level of investment risk. Easter Seals NH expects its endowment funds to provide an average rate of return over a five-year period equal to the rate of 2% over the inflation rate. Actual returns in any given year may vary from this amount.

To satisfy its long-term rate-of-return objectives, Easter Seals NH relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). Easter Seals NH targets a diversified asset allocation that places a greater emphasis on equity-based investments to achieve its long-term return objectives within prudent risk constraints.

Easter Seals NH may appropriate for distribution some or all of the earnings and appreciation on its endowment for funding of operations. In establishing this policy, Easter Seals NH considered the objective to maintain the purchasing power of the endowment assets held in perpetuity or for a specified term as well as to, so long as it would not detract from Easter Seals NH's critical goals and initiatives, provide additional real growth through new gifts and investment return.

On August 23, 2018, an amendment changed that the annual principal payments will be deferred from October 1, 2017 and resume October 1, 2022. The note is secured by the property.

Payroll Protection Program Loan

On April 16, 2021, Easter Seals NH entered into a promissory note for an unsecured loan in the amount of \$10,000,000 through the Paycheck Protection Program (PPP) established by the CARES Act and administered by the U.S. Small Business Administration (SBA). The PPP provides loans to qualifying businesses for amounts up to 2.5 times the average monthly payroll expenses of the qualifying business. The loan and accrued interest had original terms that were forgivable after the covered period as long as the borrower used the loan proceeds for eligible purposes, including payroll, benefits, rent, and utilities, and maintains its payroll levels. The amount of loan forgiveness would be reduced if the borrower terminated employees or reduced salaries during the period. The PPP loan was made for the purpose of securing funding for salaries and wages of employees that may have otherwise been displaced by the outbreak of COVID-19 and the resulting detrimental impact on Easter Seals NH's business. Any unforgiven portion of the PPP loan bears interest at 1%, with a deferral of payments for the first ten months. Beginning February 16, 2022, principal and interest payments for any unforgiven portion of the PPP loan will be due monthly through April 16, 2026. The PPP loan may be prepaid at any time without penalty. Easter Seals NH accounted for the PPP loan in accordance with the FASB ASC Topic 470 and included the full \$10,000,000 within debt in the August 31, 2021 consolidated statement of financial position. In February 2022, Easter Seals NH received approval for full forgiveness from the SBA. Upon receiving forgiveness during the year ended August 31, 2022, Easter Seals NH recognized a gain on extinguishment of long-term debt in the accompanying 2022 consolidated statement of activities and changes in net assets.

The swap agreement had an outstanding notional amount of \$10,061,668 and \$10,643,336 at August 31, 2022 and 2021, respectively, which reduces in conjunction with principal reductions until the agreement is terminated in November 2034.

At August 31, 2022, Easter Seals NH was in compliance with restrictive covenants specified under the NHHEFA bonds and other debt obligations.

12. Donated Services

A number of volunteers have donated their time in connection with Easter Seals NH's program services and fundraising campaigns. However, no amounts have been reflected in the accompanying consolidated financial statements for such donated services, as no objective basis is available to measure the value.

Membership fees to Easter Seals, Inc. were \$130,276 and \$105,185 for the years ended August 31, 2022 and 2021, respectively, and are reflected as support of National programs on the accompanying consolidated statements of activities and changes in net assets.

14. Fair Value of Financial Instruments

Fair value of a financial instrument is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at their measurement date. In determining fair value, Easter Seals NH uses various methods including market, income and cost approaches, and utilizes certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in factors used in the valuation. These factors may be readily observable, market corroborated, or generally unobservable. Easter Seals NH utilizes valuation techniques that maximize the use of observable factors and minimizes the use of unobservable factors.

14. Fair Value of Financial Instruments (Continued)

Certain of Easter Seals NH's financial instruments are reported at fair value, which include beneficial interest held in trust, investments and the interest rate swap, and are classified by levels that rank the quality and reliability of the information used to determine fair value:

Level 1 – Valuations for financial instruments traded in active exchange markets, such as the New York Stock Exchange. Valuations are obtained from readily available pricing sources for market transactions involving identical instruments.

Level 2 – Valuations for financial instruments traded in less active dealer or broker markets. Valuations are obtained from third-party pricing services for identical or similar instruments.

Level 3 – Valuations for financial instruments derived from other methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining fair value.

The following describes the valuation methodologies used to measure financial assets and liabilities at fair value. The levels relate to valuation only and do not necessarily indicate a measure of investment risk. There have been no changes in the methodologies used by Easter Seals NH at August 31, 2022 and 2021.

Investments and Assets Limited as to Use

Cash and cash equivalents are deemed to be Level 1. The fair values of marketable equity securities and mutual funds that are based upon quoted prices in active markets for identical assets are reflected as Level 1. Investments in certain government and agency securities and corporate and foreign bonds where securities are transparent and generally are based upon quoted prices in active markets are valued by the investment managers and reflected as Level 2.

Beneficial Interest in Trust Held by Others

The beneficial interest in trust held by others has been assigned fair value levels based on the fair value levels of the underlying investments within the trust. The fair values of marketable equity securities, money market and mutual funds are based upon quoted prices in active markets for identical assets and are reflected as Level 1. Investments in marketable equity securities and mutual funds where securities are transparent and generally are based upon quoted prices in active markets are valued by the investment managers and reflected as Level 2.

Interest Rate Swap Agreement

The fair value for the interest rate swap liability is included in Level 3 and is estimated by the counterparty using industry standard valuation models. These models project future cash flows and discount the future amounts to present value using market-based observable inputs, including interest rates.

16. Champlin Place Limited Partnership

Champlin Place Limited Partnership (the Partnership) was formed in June 2022 as a limited partnership under the laws of the State of New Hampshire. The Partnership’s purpose is to acquire, own, develop, construct and/or rehabilitate, lease, manage, and operate an apartment complex to be constructed and located at 215 Rochester Hill Road, Rochester, New Hampshire, comprised of 65 residential apartments benefiting low to moderate-income households (the Project). The Partnership’s equity was contributed by its General Partner, Champlin Place, Inc., of which Easter Seals NH is the sole owner, and Housing New England Fund IV, a limited partner and unrelated party. The Partnership agreement provides for the allocation of profits and losses to the partners, proportionate to the equity contributed, as follows:

General Partner, Champlin Place, Inc. (wholly-owned by Easter Seals NH)	0.01%
Limited Partner, Housing New England Fund IV (an unrelated party)	99.99%

Capital Contributions

Easter Seals NH, as the sole owner of the General Partner, Champlin Place, Inc., has made its required capital contribution of \$1,742 as of August 31, 2022, which is recorded as investment in related entity in the accompanying 2022 consolidated statement of financial position. Champlin Place, Inc. is obligated to make additional capital contributions in the amount of \$155,078, which amounts are expected to be funded in October 2023.

Deferred Developer Fee

On June 30, 2022, Easter Seals NH entered into a Development Services Agreement for the Project, in which Easter Seals NH will earn up to \$2,272,940 as a development fee for its services in connection with the construction and development of the Project. Under the Development Services Agreement, \$250,000 was earned and recognized as other revenue by Easter Seals NH in the 2022 consolidated statement of activities and changes in net assets. The balance of the development fee will be earned on the date that the construction and development of the Project is substantially complete, and all dwelling units have been completed and are placed in service, with all balances to be paid prior to December 31, 2036.

Ground Lease

On June 30, 2022, Easter Seals NH entered into a ground lease with the Partnership for the land located at 215 Rochester Hill Road, Rochester, New Hampshire, with terms of 98 years from the date of execution. The Partnership will be required to pay Easter Seals NH base rent of \$37,004 per annum, commencing on January 1, 2023, and continuing on each one-year anniversary date of the lease, payable from available cash flow, as defined in the agreement. If available cash flow is insufficient to pay the full amount of the base rent for any year, the unpaid portion will accrue interest at 3.43% per annum and be payable on a cumulative basis in the first year in which there is sufficient available cash flow or capital proceeds.

16. Champlin Place Limited Partnership (Continued)*Community Development Block Grant Loan and Agreements*

In 2022, the City of Rochester, New Hampshire was awarded a Community Development Block Grant by the Community Development Finance Authority. In turn, the City of Rochester, New Hampshire has granted a conditional grant of \$975,000 to Easter Seals NH, which in turn will loan the funds to the Partnership to pay for site work improvements and certain construction costs of the Project through a leasehold mortgage that was executed on June 30, 2022 between Easter Seals NH and the Partnership. The loan accrues no interest, and is payable to Easter Seals NH in one lump sum 30 years from the date of the note (July 2052). In the event of default of this condition, Easter Seals NH has the right to recover all of the CDBG funds expended on the Project on behalf of the New Hampshire Community Development Loan Fund. The amount of CDBG funds subject to recovery may decrease over the twenty-year period at a rate negotiated between the City of Rochester and Easter Seals NH and approved by the Community Development Finance Authority. Also as defined in the leasehold mortgage, if the Partnership performs its obligations as defined in the agreement, then repayment of the leasehold mortgage will become void, therefore requiring no repayment by the Partnership to Easter Seals NH. Because of that provision, in 2023 Easter Seals NH will recognize offsetting assets and liabilities related to the \$975,000 in funding received from the City of Rochester, New Hampshire and subsequent loan to the Partnership when cash flow associated with the grant and leasehold mortgage is expected.

Sponsor Loan and Terms

On June 30, 2022, in order to provide additional funding to the Partnership for upcoming site work and construction costs, Easter Seals NH entered into a \$563,607 loan agreement with the Partnership. This loan bears interest at the rate of 0% and, at August 31, 2022, no amounts had been drawn on the loan by the Partnership. If not paid earlier, all outstanding principal and interest accrued must be repaid to Easter Seals NH on June 30, 2052. Payments of principal and interest are to be made to the extent of available cash flow, as defined in the agreement. If repayment is not made within thirty days of the maturity date, or if any payment due is not paid within thirty days of the due date, then interest will be payable on any unpaid sum at the rate of 12% per annum, compounded annually, until such amount is paid, or another means of payment is arranged.

Reimbursement Agreements

On June 30, 2022, Easter Seals NH entered into a Reimbursement Agreement with the Partnership to reimburse Easter Seals NH for all predevelopment expenses incurred by the Project that were paid by Easter Seals NH. The Partnership acknowledged and agreed that the Partnership is solely responsible to pay all project expenses not later than the date of the closing of the Partnership's construction loan for the Project, which was July 13, 2022. As of August 31, 2022, Easter Seals NH was owed \$394,316 by the Partnership, which amount is recorded within accounts receivable from related entity in the accompanying 2022 consolidated statement of financial position.

16. Champlin Place Limited Partnership (Continued)

Further, Easter Seals NH will be paid certain amounts under a Partnership Administration Agreement, dated as of June 30, 2022 between Easter Seals NH and the Partnership, whereby Easter Seals NH will provide various administrative services in exchange for fees of \$4,875 per year beginning in 2023, increasing 3% annually beginning January 1, 2024.

Right of Refusal and Option Agreement

Through a Right of Refusal and Option Agreement dated June 30, 2022, the Partnership granted to Easter Seals NH certain rights of first refusal and options to purchase the Project, which, if elected, would include the 99.99% interest in the Project held by Housing New England Fund IV. As a result, Easter Seals NH has been granted an irrevocable, successive, and exclusive right of refusal to purchase the Project. Such right is exercisable for a period of 24-months beginning upon expiration of an initial 15-year compliance period, and continuing until the Partnership otherwise sells the Project.

Through a Right of Refusal and Opinion Agreement dated June 30, 2022, Housing New England Fund IV has the option to give written notice to Champlin Place, Inc. at any time following the end of the Credit Period, as defined, to require Champlin Place, Inc. to purchase the interest of Housing New England Fund IV for a price equal to the sum of: (i) \$100, (ii) the amount of any federal, state or local tax liability required to be paid (including, without limitation, any real estate transfer or franchise taxes), (iii) any costs incurred by Housing New England Fund IV in connection with the transfer of its interest, and (iv) all amounts then due and owing to Housing New England Fund IV or its affiliates under the agreement. Upon receipt of such written notice of the put option, Champlin Place, Inc. shall purchase such interest and make all payments required within 30 days. At the date of these consolidated financial statements, the put option was not eligible to be exercised by Housing New England Fund IV, and it is expected that the Credit Period will extend through December 31, 2034.

Guaranty Agreement

On June 30, 2022, Easter Seals NH unconditionally guaranteed due payment, performance, and fulfillment of certain obligations of the Partnership and Housing New England Fund IV. Easter Seals NH's liability is generally limited and shall not exceed \$402,000 in the aggregate, and the guaranty terminates upon the later of the 60th month anniversary of the stabilization date, as defined, and the date that the Partnership has achieved stabilized occupancy for five consecutive calendar years. However, should an operating deficit arise before the latest of permanent mortgage commencement or cost certification, as defined in the agreement, or the date the Project achieves 100% occupancy, then Easter Seals NH's obligation to advance funds to pay operating deficits shall be unlimited. At the date of these consolidated financial statements, no events or conditions have occurred that would trigger Easter Seals NH's performance under the guaranty agreement.

DIRECTOR OF DONOR RELATIONS

PERSONAL EXPERIENCE

- Board of Directors, Girls Inc.
- LGM Steering Committee
- Leadership Greater Manchester, Class of 2021

PROFILE

For the last sixteen years I have been working with nonprofits in fundraising and development programs. For thirteen of those years I was with Families in Transition (FIT) working with their mission to break the cycle of homelessness in New Hampshire. Hired as the Volunteer & In Kind Coordinator, in just 3 years I was promoted to the Donor Relations Manager. By the end of my time with the organization, I was promoted to Chief Development Officer, a member of the Executive Leadership Team. At the close of 2021, I had taken a new position with the New Hampshire Community Loan Fund as their Director of Donor Relations. The main goal of this position was to create a Major Donor Program for their organization.

In any of the positions that I have been in over the years, my role began and still to this day focuses on relationships, from onboarding volunteers and building their relationships to major donors. From connecting with community members on potential mission impacts to creating a lifelong supporter, at the end of the day, my main goal has been to show people their value and how they can make a difference in the lives of others.

Below you will find the many roles I have had in my nonprofit career thus far. From day one, I have been a key employee that has played in many leadership roles around change management, culture, moral and mergers. I have overseen 30 people in a statewide program, partnering with 20+ nonprofits at a time. I have also led a team of 8 employees, my department being one with the most longevity, which is something I am extremely proud of.

In my role as the CDO/VP of Resource Development, I oversaw our fundraising efforts, annual events, volunteer management, and marketing/communications team for the agency. I have strong experience in board development, strategic planning, volunteer management, leadership, program development, change management, and public speaking. I started my leadership experience with an annual goal of \$800,000 a year, and in 2020, raised over \$3 million in private funds with the support of my instrumental team and our solid development plan, even after pivoting due to the impact of the pandemic.

Pivoting, adapting, out of the box thinking, strategizing, forward thinking, are all things I have been doing long before the pandemic.

SKILLS

EXPERIENCE AT NH COMMUNITY LOAN FUND

Director of Donor Relations

2021- Present

In November of 2021 I took the position of Director of Donor Relations. It was a position that the organization created for me. The NH Community Loan Fund did not have major gifts, corporate giving or volunteer focused programs. They knew how essential these three programs were to the growth of their development and fundraising goals.

Over the last seven months, I have established the outline and foundation to these programs. I also have hired a Philanthropy Officer to help elevate the relationship building with the existing donors, as well as identifying ways to gain new donors. We have created a portfolio concept for the fundraising team, as well as established a forecasting structure in the CRM, Salesforce, to have a better plan of action to execute how to exceed our annual goals.

EXPERIENCE AT FAMILIES IN TRANSITION

Chief Development Officer/VP of Resource Dev.

2019- 2021

In January of 2019 I took the position of Vice President, Resource Development. This opportunity came when Families in Transition and New Horizons merged. The goal given to me was to create one unified development team of eight full time staff members, along with a one fundraising development plan that would have the newly defined team to meet our goal of raising \$1.75 million in private funding. This goal was an increase from the previous year's goal of \$800,000. We hit our goal in year one, then set our 2020 fundraising goal to raise \$1.85 million which we surpassed, hitting the \$3 million. This was a huge accomplishment in the midst of a huge leadership change, our Founder and President leaving, and pivoting our fundraising efforts that were very much impacted by the pandemic. It took a team to pull off what we did and I am so proud of how hard they all worked, while navigating their own transitions in their personal lives.

In addition, the agency had also invested in a new CRM software, Salesforce, which I took the project management lead on. With consultants, we created a CRM that aligned with the agency needs, as well as the needs of the newly merged fundraising department. Project managing was something I had never really done before, but found it to be a great project! A lot of work, but well worth it to see the investment and return on the investments in year two of having the software. Prior to leaving the organization in 2021, I had been promoted to Chief Development Officer.

When promoted to the Director level I was tasked with creating new donor initiatives and worked closely with a Task Force that included members of our board of directors and other key stakeholders to see it through. During this time, my focus was really on systems, stewardship and cultivation efforts. Growing our volunteers into donors, and our donors into major investors. My goal was to show them the impact they had on those in their own community and know that they could be part of the solution. It was a lot of work over those three years, but well worth it as we have created relationships with our donors who have become lifelong supporters of the work we do.

Donor Relations Manager

2011-2016

When promoted to this new Management position, I had oversight of the FIT VISTA Program which had a reach across a variety of nonprofits across New Hampshire. When FIT first took over the program, we worked with 16 VISTA members and ten nonprofits. During this time, FIT was asked to take over a VISTA Program that was going to close. We saw too much value in the VISTA Program and quickly said yes to the merger. We doubled the number of members to 32, and also doubled the number of nonprofits we worked with across the state, no longer just in Manchester. My main focus was to build the moral backup of those that were displaced, but also bring the two groups together to be a unified group. It took a lot of work, we the group came together and became one of the most well respected VISTA Programs in New England.

Volunteer & In Kind Coordinator

2008-2011

Hired as the Coordinator of Volunteers & In Kind Donations, I created a structured system and process for both programs. The agency was just starting out with a volunteer program. Over the course of these three years, I worked on getting buyin from other departments to take on volunteers as resources. I also worked really hard on bringing new volunteers in and watching their relationship grow with nurture to become advocates, supporters and some staff. I also created a robust internship program for our clinical department, which is still running strong today. .

During this time we also acquired the Manchester VISTA Program from the City of Manchester. This gave me the oversight of 16 AmeriCorps VISTA Members supporting Manchester based nonprofits.

EXPLANATION

The purpose of this request is to provide behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs who have more intensive behavioral and mental health needs that cannot be met safely in the community without intensive supports.

The Contractors will deliver evidence-based and trauma-informed clinical services to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. The Contractors will support the Department's efforts to provide better long-term outcomes for youth by providing services that will be short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These

Individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2024.

The Contractors will provide varying residential treatment levels of care ranging from levels one through four, with four being the most intensive treatment. All Contractors will provide services that are family-driven, youth-guided, community-based, trauma-informed, and culturally and linguistically competent in accordance with RSA 135-F. Depending on the level of care, Contractors will provide services that may include but are not limited to:

- Residential/milieu services through direct care professionals;
- Trauma-informed treatment models including evidence based practices;
- Mental health/clinical services provided by clinical staff;
- Educational services, as approved by the Department of Education;
- Independent living/employment support;
- Positive Youth Development/Recreational opportunities;
- Safety and supervision; and
- Care coordination of all needs including medical/dental and other needs.

The Department will monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraint and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;
- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This requested action includes nine (9) contracts and the Department plans to submit seven (7) additional contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Areas served: Statewide.

Source of Funds: CFDA #93.658, FAIN #2101NHFOST, CFDA #93.558, FAIN# 2101NHTANF, CFDA #93.659, FAIN #2101NHADPT, CFDA #93.778, FAIN #2105NH5ADM

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. 5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

5.4 Notwithstanding any provision in this Agreement to the contrary, and notwithstanding unexpected circumstances, in no event shall the total of all payments authorized, or actually made hereunder, exceed the Price Limitation set forth in block 1.8.

6. COMPLIANCE BY CONTRACTOR WITH LAWS AND REGULATIONS/ EQUAL EMPLOYMENT OPPORTUNITY.

6.1 In connection with the performance of the Services, the Contractor shall comply with all applicable statutes, laws, regulations, and orders of federal, state, county or municipal authorities which impose any obligation or duty upon the Contractor, including, but not limited to, civil rights and equal employment opportunity laws. This provision shall survive termination of this Agreement.

7.3 The Contracting Officer specified in block 1.9, or his or her successor, shall be the State's representative. In the event of any dispute concerning the interpretation of this Agreement, the Contracting Officer's decision shall be final for the State.

8. EVENT OF DEFAULT/REMEDIES.

8.1 Any one or more of the following acts or omissions of the Contractor shall constitute an event of default hereunder ("Event of Default"):

8.1.1 failure to perform the Services satisfactorily or on schedule;

8.1.2 failure to submit any report required hereunder; and/or

8.1.3 failure to perform any other covenant, term or condition of this Agreement.

8.2 Upon the occurrence of any Event of Default, the State may take any one, or more, or all, of the following actions:

8.2.2 give the Contractor a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the contract price which would otherwise accrue to the Contractor during the period from the date of such notice until such time as the State determines that the Contractor has cured the Event of Default shall never be paid to the Contractor;

8.2.3 give the Contractor a written notice specifying the Event of Default and set off against any other obligations the State may owe to the Contractor any damages the State suffers by reason of any Event of Default; and/or

8.2.4 give the Contractor a written notice specifying the Event of Default, treat the Agreement as breached, terminate the Agreement and pursue any of its remedies at law or in equity, or both.

8.3. No failure by the State to enforce any provisions hereof after any Event of Default shall be deemed a waiver of its rights with regard to that Event of Default, or any subsequent Event of Default. No express failure to enforce any Event of Default shall be deemed a waiver of the right of the State to enforce each and all of the provisions hereof upon any further or other Event of Default on the part of the Contractor.

9. TERMINATION.

9.1 Notwithstanding paragraph 8, the State may, at its sole discretion, terminate the Agreement for any reason, in whole or in part, by thirty (30) days written notice to the Contractor that the State is exercising its option to terminate the Agreement.

9.2 In the event of an early termination of this Agreement for any reason other than the completion of the Services, the Contractor shall, at the State's discretion, deliver to the Contracting Officer, not later than fifteen (15) days after the date of termination, a report ("Termination Report") describing in detail all Services performed, and the contract price earned, to and including the date of termination. The form, subject matter, content, and number of copies of the Termination Report shall be identical to those of any Final Report described in the attached EXHIBIT B. In addition, at the State's discretion, the Contractor shall, within 15 days of notice of early termination, develop and

submit to the State a Transition Plan for services under the Agreement.

10. DATA/ACCESS/CONFIDENTIALITY/PRESERVATION.

AND OTHER RESPONSIBILITY MATTERS**

The Contractor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Executive Office of the President, Executive Order 12549 and 45 CFR Part 76 regarding Debarment, Suspension, and Other Responsibility Matters, and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.
6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

PRIMARY COVERED TRANSACTIONS

- 11. The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:
 - 11.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;
 - 11.2. have not within a three-year period preceding this proposal (contract) been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or a contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
 - 11.3. are not presently indicted for otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (11)(b) of this certification; and
 - 11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.
- 12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

- 13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:

Independent Auditors' Report

The Board of Directors
The Home for Little Wanderers
Boston, Massachusetts

Opinion

We have audited the financial statements of The Home for Little Wanderers (the "Home"), which comprise the statements of financial position as of June 30, 2022 and 2021, and the related statements of activities, functional expenses and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Home as of June 30, 2022 and 2021, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter About the Entity's Ability to Continue as a Going Concern

The accompanying financial statements have been prepared assuming that the Home will continue as a going concern. As discussed in Note 1 to the financial statements, the Home has suffered recurring losses from operations and was in violation of their debt covenants as of June 30, 2022. Management believes these losses were the result of the COVID-19 pandemic and challenges with workforce staffing. The Home's lenders subsequently waived any violations of their debt covenants through June 30, 2023, but the Home will likely require further adjustments to its banking arrangements within one year of the date of this report. This creates an uncertainty for the Home which, if not alleviated, would impact their ability to continue as a going concern. Management's evaluation of the events and conditions and Management's plans regarding these matters are also described in Note 1. The financial statements have not been adjusted as a result of this uncertainty. Our opinion is not modified with respect to this matter.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America ("GAAS"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Home and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Home's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Home's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Home's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

THE HOME FOR LITTLE WANDERERS

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies

Nature of Activities

The Home for Little Wanderers (the "Home") is a Massachusetts based not-for-profit organization whose mission is to ensure the healthy behavioral, emotional, social, and educational development and physical well-being of children and families living in at-risk circumstances.

Impact of the Uncertainty Associated with the Entity's Ability to Continue as a Going Concern

The Home has suffered recurring losses from operations in recent years and is in violation of certain debt covenants as of and for the year ended June 30, 2022. Although the Home's lenders subsequently waived the violations of those debt covenants through June 30, 2023, cash flow losses have continued after year end. Management has also determined it is probable that further adjustments to its banking agreements will be required within one year of the date of this report. Management is currently using the time afforded by the lenders' waivers to work on forward arrangements that will be satisfactory to the Home and its lenders. Management is also seeking to reduce its operating cash flow needs on a forward basis through various revenue enhancement and cost control efforts. Management may consider other options, such as leveraging or borrowing against its existing asset base. The Home cannot provide assurance regarding the outcome of these matters. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

A summary of significant accounting policies follows:

Classification and Reporting of Net Assets

The financial statements of the Home have been prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America which requires that information regarding its financial position and activities are reported based on the existence or absence of donor-imposed restrictions. Accordingly, net assets and changes therein are classified and reported as follows:

Net Assets Without Donor Restrictions - Net assets available for general use and not subject to donor restrictions. The Board of Directors has designated amounts from net assets without donor restrictions to function as endowment. Net assets without donor restrictions also include the investment in property, plant and equipment, net of accumulated depreciation and related debt.

Net Assets With Donor Restrictions - Net assets subject to donor-imposed restrictions. Some donor-imposed restrictions are temporary in nature that may or will be met, either by the passage of time or the events specified by the donor. Other donor-imposed restrictions are perpetual in nature, in which the donor stipulates that resources be maintained in perpetuity. Restrictions that are permanent in nature may also include investment earnings on certain investments as stipulated by donor restrictions, as well as gains and losses from beneficial interests in perpetual trusts. Unexpended gains on endowments are also included in this category until appropriated for expenditure by the Board.

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Cash and Cash Equivalents

For purposes of the statements of cash flows, the Home considers all highly liquid investments purchased with a maturity date of three months or less to be cash equivalents. Cash and cash equivalents held by investment managers are considered part of investments.

The Home maintains its cash in bank deposit accounts that, at times, may exceed federally insured limits. The Home has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents.

Accounts Receivable

The Home records accounts receivable at estimated net realizable value when there is an unconditional right to consideration. Accounts receivable consist primarily of amounts related to grants and contracts from state and local governments and amounts due from third-party payor sources. Grants and contracts receivable are carried at the original invoice amount less amounts covered by other sources.

Management estimates the allowance for doubtful accounts based on history of collections and knowledge acquired about specific terms. Accounts receivable are written off when deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when received. An account is considered uncollectible when all efforts to collect the account have been exhausted. Interest is not charged on accounts receivable.

Investments

Investments are carried at fair value. Fair value is determined as per the fair value measurements policy in this section.

Net investment return is reported in the statements of activities and consists of interest and dividend income, realized and unrealized capital gains and losses, less external and direct internal investment expenses. Investment returns are allocated ratably to the funds that underlie the investments.

Fair Value Measurements

The Home reports required types of financial instruments in accordance with the fair value standards of accounting. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. These standards require an entity to maximize the use of observable inputs (such as quoted prices in active markets) and minimize the use of unobservable inputs (such as appraisals or valuation techniques) to determine fair value. In addition, the Home reports certain investments using the net asset value ("NAV") per share as determined by investment managers under the so called "practical expedient." The practical expedient allows NAV per share to represent fair value for reporting purposes when the criteria for using this method are met.

THE HOME FOR LITTLE WANDERERS

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Fair Value Measurements (Continued)

Instruments measured and reported at fair value other than those at NAV are classified and disclosed in one of the following categories:

Level 1 – Inputs are quoted prices in active markets for identical assets or liabilities that the Home has the ability to access at measurement date.

Level 2 – Inputs are other than quoted prices included in Level 1 that are either directly or indirectly observable.

Level 3 – Inputs are unobservable for the instrument and include situations where there is little, if any, market activity for the instrument. The inputs into the determination of fair value require significant management judgment or estimation.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest level of input that is significant to the fair value measurement in its entirety.

It is possible that redemption rights may be restricted or eliminated by investment managers in the future in accordance with the underlying fund agreements. Market price is affected by a number of factors, including the type of instrument and the characteristics specific to the instrument. Instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of market price observable inputs and a lesser degree of judgment used in measuring fair value. It is reasonably possible that change in values of these instruments will occur in the near term and that such changes could materially affect amounts reported in these financial statements.

Beneficial Interests in Perpetual Trusts

Beneficial interest in perpetual trusts are carried at fair value. Fair value is determined as per the fair value measurements policy in this section which at times includes the use of actuarial methods. These amounts are held by third party trustees and are considered to be restricted in perpetuity given that the Home does not have control over distributions from these trusts. Distributions to the Home are reported as contribution revenue without restrictions. These amounts are classified as Level 3 given the structure of how such assets are held, notwithstanding that the underlying investments may be liquid or have readily determinable fair values.

Property, Plant and Equipment

Property, plant and equipment acquisitions are recorded at cost or, if donated, at fair value on the date of donation when such items have an expected future life of greater than one year and the amount is greater than a management established capitalization threshold. Fair value of any donated land, buildings and equipment is recorded using a Level 3 market approach as per the fair value policies in this section. Also included in property, plant and equipment are costs associated with construction in progress. The Home capitalizes costs incurred in connection with various ongoing projects until such projects are completed at which time those costs are then reclassified to the appropriate fixed asset account. Expenditures for major renewals and improvements are capitalized, while expenditures for maintenance and repairs are expensed as incurred.

THE HOME FOR LITTLE WANDERERS

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Property, Plant and Equipment (Continued)

Depreciation and amortization of property, plant and equipment are provided over the estimated useful lives of the respective assets on a straight-line basis as follows:

	Years
Buildings and improvements	10-40
Leasehold improvements	Lesser of 10 years or life of lease
Computer and software	3
Furniture and equipment	3-10
Motor vehicles	5

Included in buildings and improvements are tenant improvements associated with an existing lease, with a corresponding liability recorded for the related tenant improvement allowance included in other liabilities. The asset and related liability are depreciated over the life of the lease.

Endowment Assets

The Board has interpreted Massachusetts General Law as requiring investment earnings on net assets with donor restrictions that are permanent in nature to be retained in a restricted net asset classification until appropriated by the Board and expended. Massachusetts General Law allows the Board to appropriate for expenditure as much of the endowment fund as the Home determines is prudent for the uses, benefits, purposes and duration for which the endowment fund is established. The Home shall act in good faith, with the care that an ordinarily prudent person in a like position would exercise under similar circumstances, and shall consider, if relevant, the following factors: the duration and preservation of the endowment fund; the purposes of the Home and the endowment fund; general economic conditions; the possible effect of inflation or deflation; the expected total return from income and the appreciation of investments; other resources of the Home; and the investment policy of the Home.

The Home has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets. Endowment assets include those assets of donor-restricted funds that the Home must hold in perpetuity or for a donor-specified period, as well as Board-designated funds. Endowment assets are invested in equities, mutual funds, fixed income funds, and alternative investments.

The Home's Board adopted a spending rate of 4.5% of the average fair value of the endowment investment portfolio over the preceding thirteen quarters, excluding the beneficial interest in perpetual trusts in 2022 and 2021. Spending approved for fiscal 2023 is \$3,420,000. Distributions from beneficial interests are in addition to these computed amounts. From time to time, the Board may approve additional spending for operations. See Note 10.

THE HOME FOR LITTLE WANDERERS

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Revenue Recognition and Operations

Revenues are reported as increases in net assets without donor restrictions unless use of the related asset is limited by donor-imposed restrictions. Under accounting standards, revenue may be earned under exchange transactions or contribution transactions as follows:

Earned Support

Exchange transactions are measured via a principles-based process that requires the entities: 1) identify the contract with the customer; 2) identify the performance obligations in the contract; 3) determine the transaction prices; 4) allocate the transaction price to the performance obligations; and 5) recognize revenue when (or as) performance obligations are satisfied. Exchange transaction revenues are under arrangements that are one year or less in length.

The Home reports third party revenue earned in its Clinic and Day Care programs net of contractual adjustments to the Home's usual and customary rates, as well as an adjustment based on historical and industry collection standards in order to report net realizable revenue from these programs.

Investment returns are reported as increases or decreases in net assets with donor restrictions until appropriated to net assets without donor restrictions under the board approved spending policy.

Contributed Support

Program revenue and contributions are considered contributed support.

Program revenue consists of cost-reimbursement and unit rate grants, contracts and tuition from state and local agencies that are considered conditional contributions in that a barrier to entitlement must be met prior to the Home having a right to the related resources. The Home recognizes revenue when it has met the barrier to entitlement such as meeting a service delivery requirement, matching provision or incurring specified qualifying expenses in accordance with a framework of allowable costs or other barriers as stipulated in the grants and contracts such as performance requirements and/or the incurrence of allowable qualifying expenses. The Home bills funding sources primarily on a monthly basis following the month in which expenses have been incurred or services rendered to a client subject to the limits provided for in those grants and contracts. If amounts are received in advance of meeting a barrier to entitlement, such amounts are considered refundable advances.

The Home is subject to the regulations and rate formulas of the Massachusetts Executive Office for Administration and Finance Operational Services Division. Revenue is recorded by the individual programs either at the rate approved under negotiated contracts or at the rate of reimbursement as certified by the Massachusetts Operational Services Division. Excess of revenue over expenses from Commonwealth of Massachusetts supported programs, up to certain defined limits, can be utilized by the Home for expenditures in accordance with its exempt purposes provided such expenditures are reimbursable under the Operational Services Division regulations. Amounts in excess of these limits are subject to negotiated use or potential recoupment and are reported as a liability.

THE HOME FOR LITTLE WANDERERS

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Revenue Recognition and Operations (Continued)

Contributed Support (Continued)

Contributions, including unconditional promises to give, are recorded as revenues as either without or with donor restrictions in the period verifiably committed by the donor. Contributions of assets other than cash are recorded as per the fair value policies included elsewhere in this section. Unconditional promises to give that are expected to be collected in future years are recorded at the present value of the estimated future cash flows using a risk adjusted discount rate depending on the time period involved. Amortization of the discount is included in contribution revenue in accordance with the donor-imposed restrictions, if any, on the contributions. Contributions with donor-imposed restrictions that can be met through the passage of time or upon the incurring of expenses consistent with the purposes are recorded as net assets with donor restrictions and reclassified to net assets without donor restrictions and reported as "net assets released from restrictions" when such time or purpose restrictions have been satisfied. Donor-restricted contributions whose restrictions are met in the same reporting period are presented as unrestricted support.

Contributions received under \$10,000 with donor-imposed restrictions are reported as revenues of the net assets without donor restrictions category, however, donor-imposed restrictions are fulfilled in all cases regardless of reporting treatment. Contributions received over \$10,000 with donor-imposed restrictions are reported as revenues of the net assets with donor restrictions category.

The Home recognizes special events and fundraising revenue equal to the fair value of direct benefits to donors and contribution income for the excess received when the event takes place.

The Home recognizes support in the form of donated services as per the fair value policies included elsewhere in this section using Level 3 methods on the date the services are provided if the services create or enhance nonfinancial assets or the services are provided by persons possessing certain skills that would typically need to be purchased if not provided by donation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Operating and Non-operating Activity

The statements of activities report the change in net assets from operating and non-operating activities. Operating revenues consist of items attributable to the Home's program services, certain contributions, certain amounts utilized under the Home's spending policy and other sources. Non-operating activities include any investment return net of the spending policy, bequests, non-operating related contributions and certain other non-operating revenues and expenses.

THE HOME FOR LITTLE WANDERERS

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Functional Allocation of Expenses

The costs of providing the various programs and activities and supporting services have been summarized on a functional basis in the statements of activities. The statements of functional expenses present the natural classification detail of expenses by function. Accordingly, certain costs have been allocated among the programs and supporting services benefited. Depreciation of plant assets and operation and maintenance of plant expenses have been allocated to functional classifications based on square footage of facilities. Interest expense is allocated based on the functional purpose for which debt proceeds were used. Other costs have been allocated based on time and effort percentages.

Income Tax

The Home is organized as a public charity under Section 501(c)(3) of the Internal Revenue Code and is generally exempt from Federal and state income taxes. Accordingly, no provision for income taxes is made in the financial statements.

Uncertain Tax Positions

The Home accounts for the effect of any uncertain tax positions based on a "more likely than not" threshold to the recognition of the tax positions being sustained based on the technical merits of the position under scrutiny by the applicable taxing authority. If a tax position or positions are deemed to result in uncertainties of those positions, the unrecognized tax benefit is estimated based on a "cumulative probability assessment" that aggregates the estimated tax liability for all uncertain tax positions. Interest and penalties assessed, if any, are accrued as income tax expense. The Home has identified its tax status as a tax-exempt entity and its determination as to its income being related or unrelated as its only significant tax positions. However, the Home has determined that such tax positions do not result in an uncertainty requiring recognition. The Home is not currently under examination by any taxing jurisdiction. The Home's Federal and state tax returns are generally open for examination for three years following the date filed.

Future Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2016-02, *Leases*, which requires a lessee to recognize a right-of-use asset and a lease liability for all leases, initially measured at the present value of the lease payments, in its statement of financial position. The standard also requires a lessee to recognize a single lease cost, calculated so that the cost of the lease is allocated over the lease term, on a generally straight-line basis. The guidance also expands the required quantitative and qualitative disclosures surrounding leases. The ASU is effective for fiscal year ending June 30, 2023 for the Home. The Home is evaluating the impact of the new guidance on the financial statements.

Management believes that other pending accounting standards would have limited impact on the Home and, accordingly, have not outlined those standards here.

Notes to Financial Statements

Note 1 - Nature of Activities and Significant Accounting Policies (Continued)

Subsequent Events

The Home evaluated subsequent events through May 15, 2023, the date on which the financial statements were available to be issued.

Subsequent to year-end, the Home sold five parcels of land for a net price of \$1.42 million, the entirety of which will be recorded as a gain in fiscal 2023.

Also subsequent to year-end, in August 2022, a contract for a program with the City of Boston was discontinued. The program in question generated \$8 million in revenue from July 2019 through June 2022.

Note 2 - Liquidity and Availability

The Home regularly monitors liquidity to meet its operating needs and other contractual commitments, while also striving to maximize the investment of its available funds. The Home has various sources of liquidity at its disposal, including cash and cash equivalents, marketable debt and equity securities and a line of credit.

For purposes of analyzing resources available to meet general expenditures over a 12-month period, the Home considers all expenditures related to its ongoing program activities as well as the conduct of services undertaken to support those activities to be general expenditures.

Although not expected to be needed, the spendable yet restricted portion of the Home's net assets could be used to meet cash needs if necessary. Prudent investment management, however, must be considered to ensure the preservation of the funds for future use.

The following table shows the financial assets held by the Home that are available within one year of the statement of financial position date to meet general expenditures:

	2022	2021

The line is payable on demand with interest payable monthly equal to the LIBOR Advantage Rate plus 1.95% (3.40% and 2.05% at June 30, 2022 and 2021, respectively). The Home did not meet certain financial and non-financial covenants as of June 30, 2022 and 2021. Subsequently the Home's lenders waived such covenant noncompliance. Management is using the time afforded by such waivers to work with its lenders relative to forward arrangements; however, those arrangements have not yet been secured. In the event that the Home and its lenders do not reach satisfactory arrangements, Management believes that its unrestricted endowment funds, together with the available financial resources outside of those in the endowment, should be sufficient to pay off these obligations should the debt be called.

Notes to Financial Statements

Note 11 - Commitments and Contingencies

There are various legal proceedings pending that involve claims against the Home. These proceedings are, in the opinion of management, routine matters incidental to the normal business conducted by the Home. In the opinion of management, the ultimate disposition of such proceedings is not expected to have a material adverse effect, if any, on the Home's financial position, statements of activities, or cash flows.

Note 12 - Support Associated with COVID-19

Federal and State Grants

The Home applied for funding associated with the Provider Relief Program during fiscal year 2021, resulting in funding received in the amount of approximately \$843,000 throughout the year. The award stipulated that the funds could be used for COVID-19 related costs including personnel, personnel retention costs and other costs incurred prior to June 30, 2022. Such award has been recognized as revenue as costs were incurred during fiscal 2021.

During 2021, the Home was a beneficiary of approximately \$2,770,000 in Coronavirus Relief Fund assistance received through various departments of the Commonwealth of Massachusetts and the State of New Hampshire, all of which was used in 2021 to cover additional costs incurred as a result of COVID-19 for the operations of its residential education programs.

Work Experience

Assistant Vice President of Congregate Care

The Home for Little Wanderers - Boston, MA
May 2021 to Present

In my current role as Assistant Vice President of Congregate Care, I support and lead the agency's portfolio of congregate care programs and therapeutic schools in Massachusetts and New Hampshire. I directly supervise Program Directors and other high-level departmental staff in a division whose revenue exceeds \$40M. I have significantly supported the growth of the division's sole outpatient program, Out at Home, from a 3-client, .25FTE program to a robust 7FTE program with a Clinical Director, securing \$125,000 in annual HEALS grant funding, \$425,000 annual SAMHSA funding and partnerships with Boston University, Martha's Vinyard Community Health Center, Northeastern University's Employee Assistance Program and others. This program won the Provider's Council Innovation Award in 2023. I have directly recruited over 30% of new division leaders since taking this role. I supported the spend-down of over \$4M in federal funding between ARPA and EAASES programs and have presided over a significant reduction in staff turnover year-over-year since 2020. I have supported the redesign of the division's compensation structure to ensure employees have room to grow and that the agency remains at the top of the field.

I rebuilt a departmental leadership structure that aligned with best practices in the industry and filled 80% of new department leadership positions within two months. I built a Leadership Academy for direct-care staff who aspired to leadership positions in order to support retention efforts and to allow staff to walk into leadership roles having hands-on leadership training. I wrote a behavior support curriculum that aligns with agency values and evidence-based practices within the field.

- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This requested action includes nine (9) contracts and the Department plans to submit seven (7) additional contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Areas served: Statewide.

2. SERVICES TO BE PERFORMED. The State of New Hampshire, acting through the agency identified in block 1.1 ("State"), engages contractor identified in block 1.3 ("Contractor") to perform, and the Contractor shall perform, the work or sale of goods, or both, identified and more particularly described in the attached EXHIBIT B which is incorporated herein by reference ("Services").

3. EFFECTIVE DATE/COMPLETION OF SERVICES.

3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement, and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.17, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.13 ("Effective Date").

3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. Contractor must complete all Services by the Completion Date specified in block 1.7.

4. CONDITIONAL NATURE OF AGREEMENT.

Notwithstanding any provision of this Agreement to the contrary, all obligations of the State hereunder, including, without limitation, the continuance of payments hereunder, are contingent upon the availability and continued appropriation of funds affected by any state or federal legislative or executive action that reduces, eliminates or otherwise modifies the appropriation or availability of funding for this Agreement and the Scope for Services provided in EXHIBIT B, in whole or in part. In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. The State shall not be required to transfer funds from any other account or source to the Account identified in block 1.6 in the event funds in that Account are reduced or unavailable.

5. CONTRACT PRICE/PRICE LIMITATION/PAYMENT.

5.1 The contract price, method of payment, and terms of payment are identified and more particularly described in EXHIBIT C which is incorporated herein by reference.

5.2 The payment by the State of the contract price shall be the only and the complete reimbursement to the Contractor for all expenses, of whatever nature incurred by the Contractor in the performance hereof, and shall be the only and the complete

compensation to the Contractor for the Services. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

5.4 Notwithstanding any provision in this Agreement to the contrary, and notwithstanding unexpected circumstances, in no event shall the total of all payments authorized, or actually made hereunder, exceed the Price Limitation set forth in block 1.8.

6. COMPLIANCE BY CONTRACTOR WITH LAWS AND REGULATIONS/ EQUAL EMPLOYMENT OPPORTUNITY.

6.1 In connection with the performance of the Services, the Contractor shall comply with all applicable statutes, laws, regulations, and orders of federal, state, county or municipal authorities which impose any obligation or duty upon the Contractor, including, but not limited to, civil rights and equal employment opportunity laws. In addition, if this Agreement is funded in any part by monies of the United States, the Contractor shall comply with all federal executive orders, rules, regulations and statutes, and with any rules, regulations and guidelines as the State or the United States issue to implement these regulations. The Contractor shall also comply with all applicable intellectual property laws.

6.2 During the term of this Agreement, the Contractor shall not discriminate against employees or applicants for employment because of race, color, religion, creed, age, sex, handicap, sexual orientation, or national origin and will take affirmative action to prevent such discrimination.

6.3. The Contractor agrees to permit the State or United States access to any of the Contractor's books, records and accounts for the purpose of ascertaining compliance with all rules, regulations and orders; and the covenants, terms and conditions of this Agreement.

8.1.2 failure to submit any report required hereunder; and/or

8.1.3 failure to perform any other covenant, term or condition of this Agreement.

8.2 Upon the occurrence of any Event of Default, the State may take any one, or more, or all, of the following actions:

8.2.1 give the Contractor a written notice specifying the Event of Default and requiring it to be remedied within, in the absence of a greater or lesser specification of time, thirty (30) days from the date of the notice; and if the Event of Default is not timely cured, terminate this Agreement, effective two (2) days after giving the Contractor notice of termination;

8.2.2 give the Contractor a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the contract price which would otherwise accrue to the Contractor during the period from the date of such notice until such time as the State determines that the Contractor has cured the Event of Default shall never be paid to the Contractor;

8.2.3 give the Contractor a written notice specifying the Event of Default and set off against any other obligations the State may owe to the Contractor any damages the State suffers by reason of any Event of Default; and/or

8.2.4 give the Contractor a written notice specifying the Event of Default, treat the Agreement as breached, terminate the Agreement and pursue any of its remedies at law or in equity, or both.

8.3. No failure by the State to enforce any provisions hereof after any Event of Default shall be deemed a waiver of its rights with regard to that Event of Default, or any subsequent Event of Default. No express failure to enforce any Event of Default shall be deemed a waiver of the right of the State to enforce each and all of the provisions hereof upon any further or other Event of Default on the part of the Contractor.

9. TERMINATION.

9.1 Notwithstanding paragraph 8, the State may, at its sole discretion, terminate the Agreement for any reason, in whole or in part, by thirty (30) days written notice to the Contractor that the State is exercising its option to terminate the Agreement.

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.
6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

New Hampshire Department of Health and Human Services
Exhibit F

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.
12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

- 13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
Nashua Children's Home

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Nashua Children's Home, which comprise the statement of financial position as of June 30, 2022, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Nashua Children's Home as of June 30, 2022, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Nashua Children's Home and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Change in Accounting Principle

As discussed in Note 2 to the financial statements, in the year ending June 30, 2022, Nashua Children's Home adopted new accounting guidance, Accounting Standards Update 2020-07, *Contributed Nonfinancial Assets*. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United

Merrimack, New Hampshire
Andover, Massachusetts
Greenfield, Massachusetts
Ellsworth, Maine

States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Nashua Children's Home's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Nashua Children's Home's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Nashua Children's Home's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report on Summarized Comparative Information

We have previously audited Nashua Children's Home's fiscal year 2021 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated December 17, 2021. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2021 is consistent, in all material respects, with the audited financial statements from which it has been derived.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 23, 2023 on our consideration of Nashua Children's Home's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Nashua Children's Home's internal control over financial reporting and compliance.

NASHUA CHILDREN'S HOME

Notes to Financial Statements For the Year Ended June 30, 2022

1. Organization

Nashua Children's Home (the Organization) is a nonprofit organization established to provide residential care, educational, and family preservation services to Nashua area children who cannot live at home or attend public schools due to a variety of factors. The Organization impacts children's lives through three primary service areas:

- Residential Program – A comprehensive care and service program for New Hampshire children and families. The Residential Program offers a wide range of recreational and social activities on and off grounds. Children are encouraged to utilize the community's recreational and cultural resources.
- Educational Program - Provides services for students with educational disabilities between the ages of 7 and 15. The Educational Program is designed for students who cannot be appropriately educated in less intensive programs within the public schools. The Educational Program is certified by the New Hampshire State Department of Education.
- Independent/Transitional Living Program – Assists young adults in transitioning into self-sufficiency and prevents long-term dependency on the social service system. Housing is provided at a nominal rent, along with continuing staff support and guidance for young adults that have exited the child-protective or juvenile justice system.

2. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies used in preparing and presenting the accompanying financial statements.

Basis of Financial Statement Presentation

The financial statements of the Organization have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (GAAP).

Change in Accounting Principle

ASU 2020-07, Contributed Nonfinancial Assets

In fiscal year 2022, the Organization retrospectively adopted Accounting Standards Update (ASU) 2020-07, *Not-for-Profit Entities (Topic 958): Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets*. The new guidance requires

nonprofit entities to present contributed nonfinancial assets as a separate line item in the Statement of Activities, apart from contributions of cash or other financial assets. The standard also increases the disclosure requirements around contributed nonfinancial assets, including disaggregating by category the types of contributed nonfinancial assets a nonprofit entity has received. Adoption of this standard did not have a significant impact on the financial statements, with the exception of increased disclosure.

Comparative Financial Information

The accompanying financial statements include certain prior-year summarized comparative information in total, but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with GAAP. Accordingly, such information should be read in conjunction with the audited financial statements for the year ended June 30, 2021, from which the summarized information was derived.

Cash and Cash Equivalents

All cash and highly liquid financial instruments with original maturities of three months or less, and which are neither held for nor restricted by donors for long-term purposes, are considered to be cash and cash equivalents. Cash and highly liquid financial instruments invested for long-term purposes, including endowments that are perpetual in nature, are excluded from this definition.

Accounts Receivable

Accounts receivable consist primarily of noninterest-bearing amounts due for services and programs. The allowance for uncollectable accounts receivable is based on historical experience, an assessment of economic conditions, and a review of subsequent collections. Accounts receivable are written off when deemed uncollectable. Management has determined that no allowance is necessary.

Grants Receivable

Grants receivable, that is, those with a measurable performance or other barrier, and a right of return, are not recognized until the conditions on which they depend have been substantially met. Amounts recorded as grants receivable represent cost-reimbursable contracts and grants, which the incurrence of allowable qualifying expenses and/or the performance of certain requirements have been met or performed. The allowance for uncollectable grants receivable is based on historical experience and a review of subsequent collections. Management has determined that no allowance is necessary.

Investments

Investment purchases are recorded at cost, or if donated, at fair value on the date of donation. Thereafter, investments are reported at their fair value in the Statement of Financial Position. Net investment return/(loss) is reported in the Statement of Activities and consists of interest and dividend income, realized and unrealized gains and losses,

less external investment expenses. Investments include equity securities of public companies which are carried at fair value based on quoted market prices.

Property and Equipment

Property and equipment additions over \$1,000 are recorded at cost, if purchased, and at fair value at the date of donation, if donated. Depreciation is computed using the straight-line method over the estimated useful lives of the assets ranging from 3 to 40 years, or in the case of capitalized leased assets or leasehold improvements, the lesser of the useful life of the asset or the lease term. When assets are sold or otherwise disposed of, the cost and related depreciation is removed, and any resulting gain or loss is included in the Statement of Activities. Costs of maintenance and repairs that do not improve or extend the useful lives of the respective assets are expensed. Assets not in service are not depreciated.

The carrying value of property and equipment is reviewed for impairment whenever events or circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition. When considered impaired, an impairment loss is recognized to the extent carrying value exceeds the fair value of the asset. There were no indicators of asset impairment in fiscal year 2022 or 2021.

Net Assets

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor or grantor-imposed restrictions.

Net Assets Without Donor Restrictions

Net assets available for use in general operations and not subject to donor (or certain grantor) imposed restrictions. The Board has designated, from net assets without donor restrictions, net assets for a board-designated endowment.

Net Assets With Donor Restrictions

Net assets subject to donor (or certain grantor) imposed restrictions. Some donor-imposed restrictions are temporary in nature, such as those that will be met by the passage of time or other events specified by the donor. Other donor-imposed restrictions are perpetual in nature, where the donor stipulates that resources be maintained in perpetuity while permitting the Organization to expend the income generated by the assets in accordance with the provisions of additional donor-imposed stipulations or a Board approved spending policy. Donor-imposed restrictions are released when a restriction expires, that is, when the stipulated time has elapsed, when the stipulated purpose for which the resource was restricted has been fulfilled, or both. The Organization recognizes revenue from contributions and grants that were initially conditional, which became unconditional with restrictions during the reporting period, and for which those restrictions were met during the reporting period, as net assets without donor restrictions.

Revenue and Revenue Recognition

Revenue derived from board and care is recognized when the performance obligation of providing the services is met. Board and care revenue is billed twice monthly after the services are provided.

The Organization recognizes revenue from tuition during the year in which the related services are provided to students. The performance obligation of delivering educational services is simultaneously received and consumed by the students; therefore, the revenue is recognized ratably over the course of the academic year. Payment for tuition is required the month prior to when the educational services are provided. Amounts received in advance are deferred and are reported as contract liabilities until the performance obligation of providing those services has been met.

Rental income is recognized monthly when the performance obligation of providing space/housing is satisfied.

The Organization recognizes contributions when cash, securities or other assets, an unconditional promise to give, or a notification of a beneficial interest is received. Conditional promises to give, that is, those with a measurable performance or other barrier, and a right of return, are not recognized until the conditions on which they depend have been substantially met.

A portion of the Organization's revenue is derived from cost-reimbursable contracts and grants, which are conditioned upon certain performance requirements and/or the incurrence of allowable qualifying expenses. Amounts received are recognized as revenue when the Organization has incurred expenditures in compliance with specific contract or grant provisions. Amounts received prior to incurring qualifying expenditures are reported as refundable advances in the Statement of Financial Position.

Donated Services and In-Kind Contributions

Volunteers contribute significant amounts of time to program services, administration, and fundraising and development activities; however, the financial statements do not reflect the value of these contributed services because they do not meet recognition criteria prescribed by GAAP. GAAP allows recognition of contributed services only if (a) the services create or enhance nonfinancial assets, and (b) the services would have been purchased if not provided by contribution, require specialized skills, and are provided by individuals possessing those skills. Donated professional services are recorded at the respective fair value of the services received. Contributed goods are recorded at fair value at the date of donation and as expenses when placed in service or distributed. Donated use of facilities is reported as a contribution and as an expense at the estimated fair value of similar space for rent under similar conditions. If the use of the space is promised unconditionally for a period greater than one year, the amount is

reported as a contribution and an unconditional promise to give at the date of the gift, and the expense is reported over the term of use.

Advertising Costs

Advertising costs are expensed as incurred and are reported in the Statement of Activities and Statement of Functional Expenses.

Functional Allocation of Expenses

The costs of program and supporting services activities have been summarized on a functional basis in the Statement of Activities. The Statement of Functional Expenses presents the natural classification detail of expenses by function. Certain categories of expenses are attributed to more than one program or supporting function. Accordingly, certain costs have been allocated among the programs and supporting services benefited on a reasonable basis that is consistently applied. The majority of expenses are directly charged to the functional categories. The expenses that are allocated include salary and wages, employee benefits, payroll taxes, occupancy, depreciation, and insurance, which are allocated on the basis of time and effort estimates. Costs related to food and other certain occupancy costs are allocated based on budgetarily approved best estimates.

Income Taxes

The Organization has been recognized by the Internal Revenue Service (IRS) as exempt from federal income taxes under Internal Revenue Code (IRC) Section 501(a) as an organization described in IRC Section 501(c)(3), qualifies for charitable contribution deductions, and has been determined not to be a private foundation. The Organization is annually required to file a Return of Organization Exempt from Income Tax (Form 990) with the IRS. In addition, the Organization is subject to income tax on net income that is derived from business activities that are unrelated to its exempt purpose.

Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results may differ from those estimates.

Financial Instruments and Credit Risk

Deposit concentration risk is managed by placing cash with financial institutions believed to be creditworthy. At times, amounts on deposit may exceed insured limits or include uninsured investments in money market mutual funds. To date, no losses have been experienced in any of these accounts. Credit risk associated with receivables is considered to be limited due to high historical collection rates and because substantial portions of the outstanding amounts are due from governmental agencies supportive of the Organization's mission. Investments are made by diversified investment managers whose performance is monitored by the Board of Directors. Although the fair value of

investments are subject to fluctuation on a year-to-year basis, the Board of Directors believes that the investment policies and guidelines are prudent for the long-term welfare of the Organization.

Fair Value Measurements and Disclosures

Certain assets and liabilities are reported at fair value in the financial statements. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal, or most advantageous, market at the measurement date under current market conditions regardless of whether that price is directly observable or estimated using another valuation technique. Inputs used to determine fair value refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available. A three-tier hierarchy categorizes the inputs as follows:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and market-corroborated inputs.
- Level 3 – Unobservable inputs for the asset or liability. In these situations, inputs are developed using the best information available in the circumstances.

In some cases, the inputs used to measure the fair value of an asset or a liability might be categorized within different levels of the fair value hierarchy. In those cases, the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. Assessing the significance of a particular input to entire measurement requires judgment, taking into account factors specific to the asset or liability. The categorization of an asset or liability within the hierarchy is based upon the pricing transparency of the asset or liability and does not necessarily correspond to the assessment of the quality, risk, or liquidity profile of the asset or liability.

New Accounting Standards to be Adopted in the Future

Leases

In February 2016, the Financial Accounting Standards Board (FASB) issued ASU 2016-02, *Leases*. The ASU requires all leases with lease terms more than 12 months to be

capitalized as a right of use asset and lease liability on the Statement of Financial Position at the date of lease commencement. Leases will be classified as either finance leases or operating leases. This distinction will be relevant for the pattern of expense recognition in the Statement of Activities. This ASU will be effective for the Organization for the year ending June 30, 2023. The Organization is currently in the process of evaluating the impact of adoption of this ASU on the financial statements.

Credit Losses

In June 2016, the FASB issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments*. The ASU requires a financial asset (including trade receivables) measured at amortized cost basis to be presented at the net amount expected to be collected. Thus, the Statement of Activities will reflect the measurement of credit losses for newly recognized financial assets as well as the expected increases or decreases of expected credit losses that have taken place during the period. This ASU will be effective for the Organization for the year ending June 30, 2024. The Organization is currently in the process of evaluating the impact of adoption of this ASU on the financial statements.

3. Liquidity and Availability

Financial assets available for general expenditure, that is, without donor or other restrictions limiting their use, within one year of the date of the Statement of Financial Position, were comprised of the following at June 30, 2022 and 2021:

	<u>2022</u>	<u>2021</u>
Financial assets at year-end:		
Cash and cash equivalents	\$ 829,371	\$ 1,414,714
Accounts receivable	226,338	237,446
Grants receivable	19,942	13,768
Investments	<u>4,088,939</u>	<u>4,792,928</u>
Total financial assets	5,164,590	6,458,856
Less amounts not available to be used within one year:		
Board-designated endowment	(4,036,291)	(4,739,709)
Net assets with donor restrictions:		
Perpetual endowment - held in investments	(35,000)	(35,000)

Bank line of credit	<u> </u>	<u>250,000</u>
Total financial assets and liquidity resources available within one year	\$ <u>1,022,383</u>	\$ <u>1,899,498</u>

Endowment funds consist of donor-restricted endowments and funds designated by the Board to function as endowments. Income from donor-restricted endowments is restricted for specific purposes, with the exception of the amounts available for general use. The portion of endowment funds that are perpetual in nature are not available for general expenditure.

The board-designated endowment is subject to an annual spending rate as determined by the Board of Directors. Although there is no intention to spend from the board-designated endowment (other than amounts appropriated for general expenditure as part of the Board's annual budget approval and appropriation) these amounts could be made available if necessary.

The Organization regularly monitors liquidity required to meet its operating needs and other contractual commitments, while also striving to maximize the investment of its available funds. In addition to financial assets available to meet general expenditures over the next year, the Organization operates with a balanced budget and anticipates collecting sufficient revenue to cover general expenditures not covered by donor-restricted resources.

4. Accounts Receivable

Accounts receivable consisted of the following at June 30, 2022 and 2021:

The Organization contracts with an insurance carrier for excess liability coverage and an insurance consultant for claims processing. At June 30, 2022 and 2021, the claims liability of \$252,086 and \$172,260, respectively, represents an estimate of claims incurred but unpaid at fiscal year-end, based on past historical costs and claims paid subsequent to fiscal year-end.

10. Endowment

Types of Funds

The Board of Directors of the Organization has interpreted the New Hampshire Uniform Prudent Management of Institutional Funds Act (UPMIFA) as requiring the preservation of the fair value of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, the Organization classifies as perpetually restricted (a) the original value of the gifts donated, (b) the original value of subsequent gifts, and (c) accumulations to the perpetual endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in perpetually restricted is classified as purpose restricted until those amounts are appropriated for expenditure by the Organization in a manner consistent with the standard of prudence prescribed by UPMIFA.

The Organization's endowment consists of funds established either by donors (referred to as donor-restricted endowment funds) and/or by resources set aside by the Board of Directors to function as endowments (referred to as board-designated endowment funds). Donor-restricted endowment funds are further divided into those that provide a perpetual source of support for the Organization's activities (referred to as perpetual endowments) and those that are restricted by donors to investment for a specified term (referred to as term endowments). As required by GAAP, net assets associated with endowment funds, including funds designated by the Board of Directors to function as endowments, are classified and reported based on the existence or absence of donor-imposed restrictions.

Investment and Spending Policies

The Organization has adopted investment and spending policies, approved by the Board of Directors, for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment funds while also maintaining the purchasing power of those endowment assets over the long-term. Accordingly, the investment process seeks to achieve an after-cost total real rate of return, including investment income as well as capital appreciation, which exceeds the annual distribution with acceptable levels of risk. Endowment assets are invested in a well-diversified asset mix, which includes equity and debt securities, that is intended to result in a consistent inflation-protected rate of return that has sufficient liquidity to make an annual distribution, while growing the funds if possible.

The Organization's Board of Directors determines annually the amount of distribution each year based on the endowment fund's average fair value of the prior 12 quarters through the calendar year-end preceding the fiscal year in which the distribution is planned. In accordance with UPMIFA, the Organization considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds: (1) the duration and preservation of the various funds, (2) the purposes of the donor-restricted endowment funds, (3) general economic conditions, (4) the possible effect of inflation and deflation, (5) the expected total return from income and the appreciation of investments, (6) other resources of the Organization, and (7) the Organization's investment policies.

Funds with Deficiencies

Due to market conditions, the fair value of assets associated with individual donor-restricted endowment funds may fall below the level that the donor or UPMIFA requires the Organization to retain as a fund of perpetual duration. There were no deficiencies at June 30, 2022 and 2021.

	<u>Revenue Recognized</u>		<u>Utilization in Programs/Activities</u>	<u>Valuation Techniques and Inputs</u>
	<u>2022</u>	<u>2021</u>

14. Retirement Plan

All full-time employees may contribute up to 20% of gross wages to a 403(b) plan beginning on the first day of the month following the date of hire. The Organization is not required to contribute to this plan. In fiscal years 2022 and 2021, the Organization did not contribute to the 403(b) retirement plan.

15. Concentration of Risk

A material part of the Organization's revenue is dependent upon government sources, the loss of which would have a materially adverse effect on the Organization. During the years ended June 30, 2022 and 2021, funding from the State of New Hampshire accounted for 86% and 63%, respectively, of total revenues.

16. Commitments and Contingencies

Grants

Grant revenue from federal agencies is subject to independent audit under the Office of Management and Budget's Uniform Guidance, and review by grantor agencies. This review could result in the disallowance of expenditures under the terms of the grant or reductions of future grant funds. Based on prior experience, the Organization's management believes that costs ultimately disallowed, if any, would not materially affect the financial position of the Organization.

17. Reclassifications

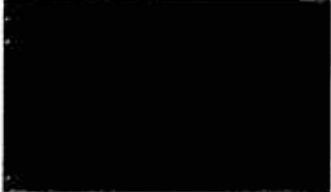

Certain reclassifications of amounts previously reported have been made to the accompanying financial statements to maintain consistency between periods presented. The reclassifications had no impact on previously reported net assets.

18. Subsequent Events

Subsequent events have been evaluated through March 23, 2023, which is the date the financial statements were available to be issued.

EXPLANATION

The purpose of this request is to provide behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs who have more intensive behavioral and mental health needs that cannot be met safely in the community without intensive supports.

The Contractors will deliver evidence-based and trauma-informed clinical services to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. The Contractors will support the Department's efforts to provide better long-term outcomes for youth by providing services that will be short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These

Individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2024.

The Contractors will provide varying residential treatment levels of care ranging from levels one through four, with four being the most intensive treatment. All Contractors will provide services that are family-driven, youth-guided, community-based, trauma-informed, and culturally and linguistically competent in accordance with RSA 135-F. Depending on the level of care, Contractors will provide services that may include but are not limited to:

- Residential/milieu services through direct care professionals;
- Trauma-informed treatment models including evidence based practices;
- Mental health/clinical services provided by clinical staff;
- Educational services, as approved by the Department of Education;
- Independent living/employment support;
- Positive Youth Development/Recreational opportunities;
- Safety and supervision; and
- Care coordination of all needs including medical/dental and other needs.

The Department will monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraint and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;
- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This requested action includes nine (9) contracts and the Department plans to submit seven (7) additional contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Areas served: Statewide.

8.2.2 give the Contractor a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the contract price which would otherwise accrue to the Contractor during the period from the date of such notice until such time as the State determines that the Contractor has cured the Event of Default shall never be paid to the Contractor;

8.2.3 give the Contractor a written notice specifying the Event of Default and set off against any other obligations the State may owe to the Contractor any damages the State suffers by reason of any Event of Default; and/or

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.
6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

 - 11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.
- 12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

Independent Auditor's Report

To the Members of the Board of
Orion House, Inc.

Opinion

We have audited the accompanying financial statements of Orion House, Inc. which comprise the statements of financial position as of June 30, 2023 and 2022, and the related statements of activities and changes in net assets, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Orion House, Inc., as of June 30, 2023 and 2022, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Orion House, Inc., and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Orion House, Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Orion House, Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Orion House, Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

ORION HOUSE INC.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEARS ENDED JUNE 30, 2023 AND 2022

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Orion House, Inc. is a voluntary, not-for-profit corporation, incorporated under the laws of the State of New Hampshire (RSA 292) and organized exclusively for tax-exempt charitable and educational purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1954, as amended. The organization is not a private foundation within the meaning of Section 509(a). The Organization is not a private foundation within the meaning of Section 509(a). Orion House provides residential care to youths that require out-of-home care. The current mission of the Organization is to be a provider of safe and effective family-centered services to youth and their families. The delivery of services to youths and their families focuses on five principal domains: Community, Family, Therapy, Residential and Educational.

Financial Statement Presentation

The financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP), which require the Organization to report information regarding its financial position and activities according to the following net asset classifications:

Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Organization. These net assets may be used at the discretion of management and the board of Directors.

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors, and grantors. The donor restrictions are temporary in nature; those restrictions will be met by certain actions or by the passage of time.

Basis of Accounting

The Organization presents its financial statements on the accrual basis of accounting. Under this basis, exchange revenues and related accounts receivables are recognized when earned. Non-exchange revenues (grants, contributions, donations, etc.) are recognized when received. Expenses and related payables are recognized when title to goods and services passes to the Agency.

Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Cash and Cash Equivalents

Cash consists of bank deposits held in checking and savings accounts. For purposes of reporting the statements of cash flows, if any, all highly liquid debt instruments purchased with a maturity of three months or less are considered to be cash equivalents.

Public Support and Revenues

The Organization derives its principal income mainly from tuition charged to sending public school districts. Revenue from this source are recognized on a monthly basis as services are invoiced to the sending school districts. Secondary support is obtained from counseling and home-tutoring services, private donations, interest, dividends and capital gains on investments.

Contributions

Contributions received are recorded as increases in net assets without donor restrictions or net assets with donor restrictions, depending on the existence and/or nature of any donor-imposed restrictions. Contributions that are restricted by the donor are reported as an increase in net assets without donor restrictions if the restriction expires in the reporting period in which the contribution is recognized. All other donor restricted contributions are reported as increases in net assets with donor restrictions, depending on the nature of restrictions.

When a restriction expires (that is, when a stipulated time restriction ends or purpose restriction is accomplished), net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the statements of activities as net assets released from restrictions.

From time to time, the Organization may receive donated services in carrying out the mission and fundraising activities of the Organization. Such donations meet the criteria for revenue recognition when all of the following conditions are met:

- Special skills are required
- The work is done by volunteers who have these skills
- The services would otherwise have to be purchased

The value of volunteer services is also recorded when the services create or improve upon a non-financial asset. In those cases, revenue is recognized in the amount of the value of the hours contributed or via the change in fair value of the altered asset. The Organization received no reportable donated services during fiscal years 2023 or 2022.

EXPLANATION

This request is **Retroactive** because upon review of the contracts for Webster House and Orion House, the Department discovered an error in the rate calculation. As part of the System of Care work, the Department competitively bid these contracts, and established daily rates in each contract under certain assumptions and many unknowns. Due the restrictive nature of procurement laws, the Department was unable to obtain all documentation necessary to mitigate

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 6

the unknowns, and was prohibited from providing advice to the Contractors on how they should account for their costs, resulting in inaccurate reporting. The ramification of this challenge was not fully realized until providers started billing and appropriate reporting was able to be derived from the system. The rate errors became clear upon review of this information once available, however, a year had elapsed from the start of the contract at that point. A comprehensive re-examination of the rate setting process was undertaken that took almost a year to implement appropriately with proactive considerations for future rate setting efforts. This rate setting process has since been streamlined and clarified in order to prevent further errors.

This request is **Sole Source** because the Department is increasing the price limitation by more than 10% of the original contract. These two Contractors provide critical services within the Children's Residential Treatment provider network, and are currently serving children under an old rate. This rate setting correction must be implemented in order to ensure that the Department maintains provider capacity and that the Contractors are able to continue serving children. Orion House's rates changed from \$211.70 for Level 1 and \$207.40 for Level 2 to \$184.39 for Level 1 and \$316.36 for Level 2. Webster House's rates changed from \$172.44 for Level 2 to \$327.08 for Level 2 for the period of July 1, 2021 to June 30, 2022, and \$369.39 for Level 2 for the period of July 1, 2022 forward.

The purpose of this request is to ensure that Contractors are reimbursed for children's residential services with the correct rate. The Contractors will continue to provide evidence-based and trauma-informed clinical behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs. The Contractors will also continue supporting the Department's effort to provide long-term outcomes for youth by providing services that are short-term, target treatment episodes, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These individuals may have specialty care needs, including intellectual and developmental disabilities, aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Across all of the Children's Residential Treatment programs approximately 400-500 individuals will be served annually through June 30, 2024.

The Department will continue to monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraints and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;
- Reduction of length of stay; and
- Reduction of staff turnover and retention of quality staff.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the original agreement, the parties have the option to extend the agreement for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and Governor and Council approval. The Department is not exercising its option to renew at this time.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 5 of 5

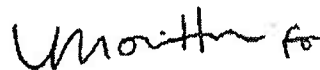

Should the Governor and Council not authorize this request, the Contractors will not be reimbursed at the appropriate rate; leaving the Department vulnerable to potentially losing these critical service providers, which would be detrimental to the overall capacity to serve youth in Level 1 and Level 2 programs in-state.

Area served: Services are located in Newport NH and Manchester, NH however they accept and treat children from across the state.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

EXPLANATION

The purpose of this request is to provide behavioral health services in residential treatment settings to children, youth and young adults who have behavioral health needs who have more intensive behavioral and mental health needs that cannot be met safely in the community without intensive supports.

The Contractors will deliver evidence-based and trauma-informed clinical services to reduce reliance on emergency rooms, hospital settings, and residential treatment programs outside of New Hampshire and New England. The Contractors will support the Department's efforts to provide better long-term outcomes for youth by providing services that will be short-term, target treatment episodes to reduce re-entry into residential treatment settings, and enable the State to meet the federal regulations regarding residential programs as mandated in the Families First Services Prevention Act.

The population served includes children and youth who display acute behaviors, medical needs and mental health symptoms that require treatment in residential settings. These individuals may have specialty care needs, including intellectual and developmental disabilities, fire setting behaviors, problematic sexual behaviors, highly aggressive behaviors, past attempts of suicide or significant self-harm. A qualified assessor will determine whether children and youth receiving services provided in the family home are eligible for the residential levels of care. Approximately 400-500 individuals will be served annually through June 30, 2024.

The Contractors will provide varying residential treatment levels of care ranging from levels one through four, with four being the most intensive treatment. All Contractors will provide services that are family-driven, youth-guided, community-based, trauma-informed, and culturally and linguistically competent in accordance with RSA 135-F. Depending on the level of care, Contractors will provide services that may include but are not limited to:

- Residential/milieu services through direct care professionals;
- Trauma-informed treatment models including evidence based practices;
- Mental health/clinical services provided by clinical staff;
- Educational services, as approved by the Department of Education;
- Independent living/employment support;
- Positive Youth Development/Recreational opportunities;
- Safety and supervision; and
- Care coordination of all needs including medical/dental and other needs.

The Department will monitor contracted services by collecting data on referrals, family and youth engagement, quality of treatment, and transition and discharge; conducting site visits; and reviewing client files. The Department will also monitor the following:

- Rapid Acceptance of Referrals;
- Reduction of Restraint and Seclusion;
- Improvement of Child and Adolescent Needs and Strengths (CANS) scores;

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 4

- Reduction of lengths of stay; and
- Reduction of staff turnover and retention of quality staff.

The Department selected the contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from 12/11/2020 through 3/8/2021. The Department received forty-nine (49) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached.

This requested action includes five (5) contracts in addition to the nine (9) contracts presented to the Governor and Executive Council on July 14, 2021 (item #14). The Department plans to submit the remaining two (2) contracts to a future Governor and Executive Council meeting.

As referenced in Exhibit A Revisions for Standard Agreement Provisions of the attached contracts, the parties have the option to extend the agreements for up to six (6) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department's Residential Treatment Transformation will not be able to move forward, which could:

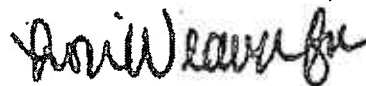

- Limit the amount of federal funding that the Department would have access to through the Family First Prevention Services Act and IV-E;
- Impact implementation of required trauma-informed models and evidence-based models for residential treatment programs;
- Impact the quality of services available to children and youth;
- Prevent in-state providers from accepting New Hampshire children and youth due to limited funding, which may result in referrals to out-of-state providers, limit the ability of youth to return home, and increase service costs.
- Impact the ability of the Department to implement RSA 135-F and support access to treatment for all youth.

Philosophy: The Philosophy can be summarized in two statements:

"There is no such thing as a bad boy."
"Children need and are entitled to their families."

Pine Haven feels that as a troubled boy has acquired destructive and unhealthy patterns of behavior, given the opportunity, he can relearn more productive and adequate habits.

Mission statement: "Pine Haven is committed to providing children with positive experiences and success oriented programs. The process is to identify appropriate behaviors: catching the child doing right. The ultimate goal is to have the youngster return to his family, school, and community. When reunification is not the plan, Pine Haven is committed to promoting the optimal, possible level of involvement between the child and his family. Pine Haven honors the dignity, resources and strengths of families and is dedicated to involving them in all major decisions affecting their children".

Vision: The vision of Pine Haven Boys Center is to offer care that is accessible, safe, ethical, culturally diverse and of high quality to promote and strengthen the health and well-being of our clients and, if possible, of their families.

Values: Pine Haven is committed to integrating the values of Respect, Integrity, Dedication, Quality and Professionalism into every activity and service provided.

Scope of services: With around-the clock-nurturing and state of the art therapy, Pine Haven's goal is to reintegrate the boys into their families, schools and communities by teaching them the skills necessary to succeed.

Location: Allenstown, NH – halfway between Concord and Manchester.

Hours of service: Pine Haven is open 24 hours a day all year long.

Characteristics of Children Admitted: Emotionally disturbed, attention deficit disorder, learning disabled, school phobic, runaways, CHINS, mild intellectual disability, verbally/physically aggressive, physically/sexually abused, sexually reactive (sexually acting out latency-age boys), developmentally delayed, Other Health Impaired, delinquent, on probation, children with psychiatric issues, speech & language disabled, and children who have misused fire.

Population: Males (age: 6-15; grades 1-8).

Intake Procedure: Initial telephone or email contact and referral information is provided to Pine Haven to start the process. Interview with the student, family and sending/referring agency. Emergency admissions are also an option as quickly as the same day (depending on bed availability).

January 2023

Programs and Services: Pine Haven is a private, non-sectarian, residential treatment center for twenty boys that provides specialized services to both the child and their families.

Educational Program: Four non-graded, small (up to six students), self-contained classrooms; individually prescribed instruction; summer school; transition programs into the public schools. Day students may be considered.

Therapeutic Programs: Master's Degree Therapists provide individual, group, family and sibling therapy as well as parenting groups. The clinical work with residents and siblings relies on hands-on techniques (play, puppets, sand therapy, art, etc.) to meet the needs of this young, immature population. Pine Haven is specialized in the treatment of sexually abused, sexually reactive, latency-age boys. Pine Haven's clinical consultant, Lynn Sanford, a nationally recognized expert in sexual abuse, provides monthly consultation to both residential and clinical departments.

Fire Setters Program: Pine Haven has a formal program including a psycho-educational component for the children and their families in fire education, understanding the dynamics of fire setting behavior, communication and limit setting.

In Home Family Program: Qualified/trained family workers or therapists offer a flexible, individualized array of services to empower families to reunite and successfully integrate into the community.

Residential Program: The boys live in a cottage-style residence. The focus is on treatment, life skill issues, and interpersonal relationships. Group meeting, supportive counseling, limit setting, behavior management and crisis intervention are provided. Each child has his own bedroom. A psychological evaluation may be provided at admission if necessary.

Recreational Program: A variety of physical activities on the premises and in the community, such as sports, hikes and field trips are available to the children.

Health Program: Routine preventive health care, physical activity, personal hygiene, adequate rest, and balance nutrition are also role modeled and encouraged.

Religious Program: Children of all religious denominations are accepted and opportunities to practice and share their faith are offered.

Additional Programs: Psychiatric services are provided by a psychiatrist licensed in NH and VT and a psychiatric nurse practitioner licensed in NH.

Respite Families: This program connects children with the opportunity to experience a safe adult relationship as well as to interact outside of Pine Haven to practice skills learned while on campus.

FROGS Program (Families Rediscovering Opportunities, Growth and Support). This program is geared toward helping children transition back into a community setting after the residential episode. They maintain the same therapist and case manager to help maintain stability. Services offer the opportunity to work on the issues that are impacting their functioning in their own homes and communities.

Tuition: There are no fees charged to the children served and to their families.

Treatment Modalities: Play therapy, Trauma Focused Cognitive Behavior therapy, Cognitive Behavior Therapy, Trust Based Relations Interventions, Medication management, Zones of Regulation, sexual abuse curricula.

Staffing: Psychiatric and psychological consultants, MA therapists, special education teachers, tutor, professional childcare workers, awake-overnight staff (all staff meet the requirements established by the State of New Hampshire).

The financial statements of Pine Haven Boys Center for the year ended June 30, 2021 were audited by another auditor who expressed an unmodified opinion on those statements on January 28, 2022.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Pine Haven Boys Center's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Pine Haven Boys Center's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Pine Haven Boys Center's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

PINE HAVEN BOYS CENTER

NOTES TO FINANCIAL STATEMENTS

Note 1. Nature of Activities

Pine Haven Boys Center ("the Center"), located in Allenstown, New Hampshire, is a voluntary not-for-profit corporation, incorporated under the laws of the State of New Hampshire (RSA 292) and organized exclusively for charitable and organizational purposes.

The Center operates a non-sectarian, therapeutic intervention and educational program for boys 6 through 15, who are referred by social agencies, schools, families and courts. The Center's goal of treatment is to return youngsters to community life in as short a time as possible, with improved coping skills.

Note 2. Significant Accounting Policies

Basis of accounting: The financial statements of the Center have been prepared on the accrual basis; consequently, revenues and gains are recognized when earned, and expenses and losses are recognized when incurred. The significant accounting policies followed are described below to enhance the usefulness of the financial statements to the reader.

Estimates and assumptions: Management uses estimates and assumptions in preparing financial statements. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported revenues and expenses. Accordingly, actual results may differ from estimated amounts.

Net assets: The Center reports information regarding its financial position and activities according to two categories of net assets: net assets with donor restrictions and net assets without donor restrictions. Descriptions of these net asset categories are as follows:

Net assets without donor restrictions: Net assets without donor restrictions are available for use at the discretion of the Board of Directors and/or management for general operating purposes. From time to time the Board of Directors designates a portion of these net assets for specific purposes which makes them unavailable for use at management's discretion.

Net assets with donor restrictions: Net assets with donor restrictions consist of assets whose use is limited by donor-imposed, time and/or purpose restrictions.

The Center reports gifts of cash and other assets as revenue with donor restrictions if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, the net assets are reclassified as net assets without donor restrictions and reported in the statements of activities and changes in net assets as net assets released from restrictions.

See Note 7 for more information on the composition of net assets with donor restrictions.

Cash and cash equivalents: For purposes of reporting cash flows, the Center considers all money market accounts to be cash equivalents. The Center had cash equivalents as of June 30, 2022 and 2021 amounting to \$1,301,970 and \$907,298, respectively.

NOTES TO FINANCIAL STATEMENTS

Accounts receivables: Accounts receivable are stated at the amount management expects to collect from outstanding balances. Management provides for probable uncollectible amounts through a provision for bad debt expense and an adjustment to an allowance based on their assessment of the current status of individual accounts. Balances that are still outstanding after management has used reasonable collection efforts are written off through a charge to the allowance and a credit to accounts receivable.

Property and equipment: Property and equipment is recorded at cost or, in the case of donated assets, at fair value. Items with an individual or aggregate cost of less than \$1,000 are expensed in the year of purchase.

Depreciation is computed using the straight-line method over the following estimated useful lives:

	Years
Building and land improvements	10 - 39
Furniture and fixtures	5 - 7
Office equipment	5 - 10
Equipment	5 - 7
Vehicles	5

Expenditures for repairs and maintenance are expensed when incurred and betterments are capitalized. Assets sold or otherwise disposed of are removed from the accounts along with the related accumulated depreciation and any gain or loss is recognized.

Income taxes: The Center qualifies as an organization exempt from income tax under Section 501(c)(3) of the Internal Revenue Code. The Center is also exempt from state income taxes by virtue of its ongoing exemption from federal income taxes. Accordingly, no provision for income taxes has been recorded in the accompanying financial statements.

The Center adopted the provision of FASB ASC 740, *Accounting for Uncertainty in Income Taxes*. Accordingly, management evaluated the Center's tax positions and concluded the Center had maintained its tax-exempt status, does not have any significant unrelated business income and had taken no uncertain tax positions that require adjustment or disclosure in the financial statements. With few exceptions, the Center is no longer subject to income tax examinations by the U.S. Federal or State tax authorities for tax years before 2019.

Functional allocation of expenses: The statement of functional expenses present expenses by function and natural classification. Expenses directly attributable to a specific functional area of the Center are reported as expenses of those functional areas. A portion of finance and administration costs that benefit multiple functional areas (indirect costs) have been allocated across programs and finance and administration based on estimates of time and effort.

Advertising: The Center expenses all advertising costs as incurred. Advertising expense for the years ended June 30, 2022 and 2021 amounted to \$9,784 and \$3,569, respectively.

PINE HAVEN BOYS CENTER

NOTES TO FINANCIAL STATEMENTS

Operating measure: The Center has presented the statements of activities and changes in net assets based on an intermediate measure of operations. The measure of operations includes all revenues and expenses that are an integral part of the Center's programs and supporting activities and net assets released from restrictions to support operating activities. Non-operating activities are limited to resources outside of those programs and services.

Revenue and revenue recognition: The Center recognizes revenue from educational services during the year in which the related services are provided to students. The performance obligation of delivering educational and therapeutic services is simultaneously received and consumed by the students; therefore, the revenue is recognized ratably over the course of the academic year. In addition, the Center offers room and board to all of its students. The performance obligation of providing access to housing and meals is satisfied ratably over the period in which the student lives on campus. The Center bills the students' local school districts, the State of New Hampshire, or the State of Vermont monthly based on daily rates established by the New Hampshire Department of Education (NH DOE). Payments are then received by either the student's local school district, the Division for Children, Youth, and Families (DCYF), the NH DOE, or counterpart agencies from other states.

The Center recognizes contributions received and made, including unconditional promises to give, as revenue in the period received or made. Contributions received are reported as either revenues without donor restrictions or revenues with donor restrictions. Contributions with donor restrictions that are used for the purposes specified by the donor in the same year as the contribution is received are recognized as revenues with donor restrictions and are reclassified as net assets released from restrictions in the same year. Promises to contribute that stipulate conditions to be met before the contribution is made are not recorded until the conditions are met. There were no conditional promises to give for the year ended June 30, 2022.

Recent accounting pronouncements: In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. This standard replaces the current guidance with regards to accounting for leases found in Leases (Topic 840) and will be effective with the issuance of ASU No. 2020-05 for the year ended June 30, 2023, for the Center. Under ASC 842, a lessee will recognize a lease liability for all long-term leases equivalent to the discounted payments due under the lease agreement, as well as an offsetting right-of-use asset. Lessees (for capital and operating leases) can apply a modified retrospective method of adoption or can adopt the transition alternative. Management has determined that the implementation of this standard will not have a material impact of the Center's financial statements.

Change in accounting principles: In September 2020, the FASB issued ASU No. 2020-07, *Not-for-Profit Entities (Topic 958): Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets*. This standard is intended to clarify the presentation and disclosure of contributed nonfinancial assets, including land, buildings, and other items. This update did not change existing recognition and measurement requirements for contributed nonfinancial assets. The adoption of ASU 2020-07 did not have a significant impact on the Center's financial statements.

PINE HAVEN BOYS CENTER

NOTES TO FINANCIAL STATEMENTS**Note 3. Concentrations**

The Center receives a substantial amount of its support from the New Hampshire Department of Health and Human Services, Division of Children, Youth and Families, in the form of board and care revenue, and from the New Hampshire Department of Education, for student instruction. In addition, the Center receives support from similar governmental agencies in other states.

The Center maintains cash accounts in multiple financial institutions. The Center's cash accounts are insured by the FDIC up to \$250,000 per depositor at each financial institution. At June 30, 2022, the Center's uninsured cash balances totaled approximately \$837,000.

In addition, at June 30, 2022, the Center had a cash balance amounting to approximately \$1,522,000 held through an Insured Cash Sweep Service (ICS) agreement between the Center and its bank. The ICS places the Center's funds at other FDIC insured banks in amounts that do not exceed the FDIC insured maximum. Through the ICS program, the Center can exclude specific banks to ensure the FDIC insured limit is never exceeded at the destination banks.

("the Order"), commencing July 1, 2022 through June 30, 2023, with an option to renew for seven additional periods through June 30, 2029. The lease provides for minimum annual rent based upon the sum of the following components: 1) an amount representing the total annual depreciation of buildings or improvements which the Order has constructed for use by the Center; and 2) an amount representing the total annual interest on borrowings used by the Order to construct or improve the buildings for use by the Center. The Center is also responsible for the payment of taxes, insurance, repairs and maintenance and utilities incurred in connection with the use of the property owned by the Order. Total rent expense under this lease amounted to \$- for both years ended June 30, 2022 and 2021.

The Center also leases a copier machine at \$100 per month for a total of 60 months, terminating January 2023. The lease expense under this lease amounted to \$1,194 for both years ended June 30, 2022 and 2021. Total future minimum lease payments under this lease amount to \$597, due during the year ending June 30, 2023.

As part of the Center's liquidity management, it has a policy to structure its financial assets to be available as its general expenditures, liabilities and other obligations come due. In addition, the Center has board designated funds of \$1,000,000. Although the Center does not intend to spend from these funds other than amounts appropriated for general expenditure as part of its annual budget approval and appropriate process, amounts from these funds could be made available if necessary.

Note 9. Supporting Organization - Pine Haven Boys Center Foundation

Pine Haven Boys Center receives annual contributions from the Foundation which are temporarily restricted for special projects and therapeutic programs not covered by other funding sources.
