Dept. Environmental Services, Drinking Water and Groundwater Trust Fund, Grants Non-Federal	

EXPLANATION

The Drinking Water and Ground Water Trust Fund (DWGTF) was created in 2016, using \$276 million of MtBE trial judgement funds, as authorized by RSA 485-F. The purpose of the DWGTF is to provide sustainable, long-term funding for the protection, preservation, and enhancement of the drinking water and groundwater resources of the state. The Drinking Water and Groundwater Advisory Commission (Advisory Commission) was established to administer and provide guidance to the State on the use of the DWGTF.

In 2021, the Advisory Commission approved \$200,000 for NHDES to create the Consolidation Study Assistance program. The program provides grants to public water systems to conduct a feasibility study to evaluate the cost-effectiveness of interconnecting to a larger community water system to address a drinking water exceedance of a maximum contaminant level (MCL) or Ambient Groundwater Quality Standard (AGQS). The feasibility study is intended to assist public water systems in making informed decisions regarding the best long-term options for maintaining safe, reliable drinking water for their users.

On October 16, 2023 the Advisory Commission voted to authorize a \$68,000 grant to the City of Concord (City) to conduct a Source Development Charge (SDC) Study to determine the potential charge required to cover expenses for new supply source projects to enable neighboring communities to interconnect. The City has been approached by several adjacent communities about obtaining potable water from Concord.

The City plans to act as a regional supply source, however, the City must require that any outside customers adequately cover the cost of their supply development so as not to burden the City of Concord's current users with this expense. The result of the SDC Study will be used to create a fee through which future customers pay for the investment required for adding a new supply source.

In the event that these funds become no longer available, General funds will not be requested to support this project. This agreement has been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

SCOPE OF SERVICES

City of Concord

The City of Concord (City) will use the grant funds to conduct a Source Development Charge (SDC) Study (the Study) to determine the potential charge required to cover expenses for new supply source projects to enable neighboring communities to interconnect. The City has been approached by several adjacent communities about obtaining potable water from Concord. The City plans to act as a regional supply source, however, the City must require that any outside customers adequately cover the cost of their supply development so as not to burden the City of Concord's current users with this expense.

The intent of the SDC is to create a fee through which future customers pay for the investment required for adding a supply source. The Study will provide a system-demand profile for the current and projected use through full utilization of plant capacity with a future new source. A projected user-profile of customers in neighboring communities that are likely to connect to the system will be done, and include estimates of timing and number of connections. In addition, data on future customer growth and/or future demand projections that have been developed will be analyzed and incorporated in the Study. The Study must be presented as a report or technical memorandum sealed by a professional engineer licensed in the State of New Hampshire and submitted to NHDES for review and approval.

This Agreement consists of the following documents: Exhibits A, B, C, and attachments, which are all incorporated herein by reference as if fully set forth herein.
